11. SLO FEMA DRILL

Yahoo group: sloecc
Date: 2010-01-01 02:01:26 UTC
From: thesysop
Topic: 11 Message: 11

I don't know how many received this email but here it is:

To All Participants of the 2009 Camp Roberts Monitoring and Decontamination Exercise,
Thank you so much for your participation in the recent FEMA evaluated exercise at Camp Roberts. The countless hours, passion, and energy that you all put into the exercise certainly paid off as we not only successfully completed our objectives in protecting the public, but thoroughly impressed our FEMA evaluators. Although we have not received the final report, the preliminary feedback is that no ARCAs (area requiring corrective action) and no planning issues were found. We do believe there is always room for improvement though, so we would love to hear your feedback if you have ideas, thoughts, or comments.

Thank you again so much. We look forward to working with you over the coming months and years and hope to see you at the next exercise in 2015!

Kelly Van Buren, Anita Konopa, and Meg Swearingen (retired)
Emergency Services Coordinators
Office of Emergency Services
County of San Luis Obispo

HI all,

There is now a script here. Look in the files folder, near the bottom of the page. Hope this helps!

74. Amateur Radio Estate Sale!

Yahoo group: sloecc
Date: 2010-06-05 03:36:28 UTC
From: Marcel S
Topic: 74 Message: 74

QST QST For All Amateur Radio Operators in San Luis Obispo County QST QST

Bob Schremp KF6YIR is helping to liquidate a friend's estate and they've got tons of radio gear up for sale!

Here's the announcement from him:

I have put a list together of the major items from KG6AKL's estate. The list can be found at:
http://www.schrempp.us/bob/4sale/4sale-2.html

All items are available for pickup. I live in Atascadero and work at Poly. Please contact me at bschrempp@... with questions for for purchase.

Please pass this list along to others you think might be interested.

Bob
KF6YIR

Happy Hunting!

81. No August Meeting

Yahoo group: sloecc
Date: 2010-08-11 00:07:38 UTC
From: Avery
Topic: 81 Message: 81

To all concerned,

There was talk of holding an August meeting at one time. We discussed this at the SLOECC board meeting and decided that since we don't normally hold a meeting in August and there is no compelling reason to do so this year, we will not be holding a meeting this month.

See you in September!!!!

Avery KD4GBA
President, SLOECC

Hi Ron,

Please pass on to all interested:

The repeater at Pt Sur Lighthouse is now on

146.94 minus PL 94.8

There is also a APRS Digipeater there on 144.39.

Please report any problems this repeater is causing to Lopez machine to:

Jim Lacalamita wb6yam@... or Tom Tengdin wb9vxy@...

Thanks for the help getting the word out.

We also interested in the coverage reports from the lighthouse south.

T3

92. Cal Poly License Testing Session Results!

Yahoo group: sloecc
Date: 2010-10-04 05:45:44 UTC
From: Marcel S
Topic: 92 Message: 92

Hello all,

Yesterday we had a *phenomenal *testing session! Here are the glorious numbers that all stand for themselves:

Total number of test takers: *65*
Overall Pass rate: *93%*
Passing rate from Ham Cram Attendees:* 100%!!!*

Total number of new hams on the market: *52*

Total number of General Class upgrades: *5*
*Also 100% pass rate! Plus all of these folks had gotten their technician licenses at a past Cal Poly testing session! =D

*A big CONGRATULATIONS to all those that passed the exams and a THANK YOU to everyone who helped out! We had record numbers at this session (largest in SLO County ever, I'm told!) which unfortunately did mean that we had to keep people waiting for a while during the ID check (thank you FCC) and then during our lightning-fast grading period immediately after the exam. Thanks for being patient!

A hug thanks to Milton AI6MD for leading the testing session, Ashley KF7JDL (our Test Session Manager) for a superb job organizing the event, to our the Volunteer Examiners (VEs) Bill KE6RKT, John KI6QDF, and myself, and to the other club volunteers that helped make the exam run more smoothly. The exam forms are in the mail shipped to go get processed by the FCC. Hopefully the new call signs will be up by the end of the week. We'll keep you posted!

In the meantime, Michael KJ6GLV, our Weekly Net Coordinator is looking for new voices to run one of our weekly nets, either on Tuesday or Thursday nights (see: http://w6bhz.org/nets.html). Don't be shy! There's a script that you simply read off to run the on-the-air meeting using the radio in the Shack. We'll also have a mentor HAM there with you to help get you started. Please email Michael if you're interested: mspahn@...

That's all folks! Keep in mind our next Club Meeting will be in two weeks on Thursday, October 14th at 6:30pm. Probably in 20-128 again.

Thanks,

-Marcel Stieber, KI6QDJ*

Record Numbers at Cal Poly Amateur Radio Club Licensing Session

SAN LUIS OBISPO – On Saturday, October 2nd, 2010 the Cal Poly Amateur Radio Club (CPARC) hosted their quarterly Amateur Radio License Testing Session, where a record 53 new ham radio operators passed their exam to gain their Technician Class License. Breaking their numbers from their previous high of 38 licenses in Fall 2009, the club set the record again in hosting San Luis Obispo County’s largest Amateur Radio License Testing Session in the books. These 53 new operators (in addition to 5 who upgraded their license class to General) will join the other 700,000+ hams in the US in providing volunteer and emergency communications support for everything from local bike rides and parades to disasters such as the Haiti earthquake earlier this year.

These ground-breaking numbers are largely due to the Cal Poly Electrical Engineering Department’s renewed support of engineering clubs this year.

Marcel Stieber (KI6QDJ), CPARC President and a 4th year EE student remarks, “The EE Department has been fundamental in making clubs like ours successful this year. It’s been great to have such strong support from the school.” Dr. Dennis Derickson (AC0P), newly appointed EE Department Chair is just as excited to get students more involved, “It’s been wonderful to give students access to such a great hobby that really exemplifies Cal Poly’s Learn By Doing philosophy.” CPARC members are regularly getting their hands dirty with radios doing everything from retuning input filters on mobile radios and building APRS GPS tracking devices to building directional antennas for the upcoming transmitter hunt.

Founded in 1947, the Cal Poly Amateur Radio Club has a long tradition of communications service on campus and in the community of San Luis Obispo. The club maintains Emergency Communications Station No.16 on the Cal Poly Campus for the San Luis Obispo Emergency Communications Council (SLOECC) which is fully equipped with emergency power and radio equipment to support various public safety agencies in the event of a disaster. The club trains routinely with local agencies in mock-disaster situations and has provided emergency communications during the Highway 41 Fire, the Loma Prieta earthquake, and other disasters both local and statewide. The club also supports other, non-emergency events such as bicycle races, triathlons, and parades including the SLOBC Lighthouse Century and the Avia Wildflower Triathlon. For more information about the club please visit www.w6bhz.org or email to calpolyradioclub@gmail.com.

99. Need extender boards for Yaesu FT-990

Yahoo group: sloecc
Date: 2010-11-02 02:13:39 UTC
From: Marcel S
Topic: 99 Message: 99

Hello all ye SLO hams,

The Cal Poly Amateur Radio Club has our two main HF radios that are in need of repair and we need the help of the community to make that happen.

Our Yaesu FT-990 has a PLL issue that we might be able to get fixed locally (W6FM or W6RKA) but we need the extender boards in order to work on the boards inside and troubleshoot.

Our Yaesu FT-920 has a low-power output that is possibly due to blown finals but currently unknown.

Does anyone have the means to do these repairs or have the extender cards from the FT-990 so that we can commence work? We have the complete technical manuals and schematics for both radios. The club is currently running on our old Kenwood TS-440s (which we just used for School Club Roundup two weeks ago) but would desperately need to get at least one of these rigs back on the air. I spoke with Yaesu today and they do not work on the 990 anymore (only some repair shop in South Dakota) but they would be able to fix the 920 for their usual charges for parts and labor.

Many thanks in advance for any advice or help you're able to give us and please forward this email on to anyone else you think might have some wise words.

Cheers,

-Marcel Stieber, KI6QDJ*

SLOECC / Estero ARC General Meeting
Wednesday January 26, 2011
7:00 pm - 9:00 pm
(The next reminder for this event will be sent in 2 days, 2 minutes.)
Location: Bill Bailey's Residence
Street: 1680 Nipomo Ave.
City State Zip: Los Osos, CA
Phone: (805) 534-1524

Notes:
If coming from the 101, take Los Osos Valley Road into Los Osos. As you come in to the edge of Los Osos, you will pass Los Osos Valley Memorial Park on the right. Go to the seventh (approx) road on the right. This should be Willow Dr. Turn right and go to the end and turn right again on Nipomo Ave. and look for the antennas on the left. (Pick the second house with antennas as the first belongs to Max!) 1680 Nipomo Ave., Los Osos, CA

113. Fw: Documenting PG&E Siren Grant expenses

Yahoo group: sloecc
Date: 2011-01-29 05:10:36 UTC

Subject: Documenting PG&E Siren Grant expenses
To: "'Dr. Richard Dickey'" <w6rka@...>
Cc: "Natalie Schaefer" <schaefern@slo-redcross.org>, "'Avery Wright'" <kd4gba@...>
Date: Monday, January 24, 2011, 4:27 PM

Dear Dr.
Dickey,

Thank you for
calling me earlier this afternoon to discuss how to document the expenses that
SLOECC wants to claim under the PG&E Siren Grant.

As I
explained, we need to submit as part of our final grant report
proper documentation supporting the expenditures made under the grant that show
how the items purchased are consistent with the purpose of the grant. Failing to
do so might cause PG&E to question whether San Luis Obispo County VOAD
should continue to serve as the administrator of the grant in the future.

I appreciated your
explanation of how the Internet service and uniform embroidery that were
included in your report could be justified as enhancing SLOECC's ability to
function in the event of an emergency. SLOECC's letter requesting reallocation
of funds should include similar explanations. I have serious doubts that the
Siren Drill Subcommittee would consider the purchase of stationery as consistent
with the purpose of the grant, so I recommend that you include if possible a
different item of similar value that is more directly related to enhancing
SLOECC's emergency response capabilities.

You and I
discussed three ways that Bill Bailey could provide receipts for his
expenditures. I have listed them below in order of
preference:

A copy of the
receipt from the vendor. Most vendors keep detailed transaction records and
could provide a copy of the original receipt, or a statement, to Mr.
Bailey.
Copies of Mr.
Bailey's relevant credit card statements. Before submitting them, he could
black out with a marking pen unrelated personal information such as the credit
card number and other purchases. If he does not have copies of these
statements, he should be able to obtain them online or with a phone call to

the credit card company.
An invoice from
Mr. Bailey for each item. Each invoice should include the following
information:

Vendor
information, including name, mailing address, and telephone number (in this
case Mr. Bailey's)
Customer
information, including name and mailing address (in this case
SLOECC)
An invoice date
and (optional) invoice number
An item
description and cost
I have attached a
Word invoice template that Mr. Bailey's could use to prepare invoices to be
submitted to the Siren Drill Grant Subcommittee if he cannot provide original
vendor invoices.

Best,

Eric

Office: (805) 679-6675 • Mobile: (805) 450-9924
Fax:
(805) 682-4655 • www.VOADsbc.org

Santa Barbara County VOAD
facilitates communication and collaboration
among organizations throughout
the county to increase disaster
preparedness and to improve services to
people affected by disasters.

Dear Dr. Dickey,

I am following up on our telephone conversation
yesterday about the documentation that SLOECC submitted to fulfill the terms of
the PG&E 2010 Siren Grant. As I mentioned, the documentation provided does
not satisfy the terms of the grant. Please follow up with the other SLOECC
officers to resolve this problem.

The award letter that San Luis Obispo County VOAD
sent to SLOECC on July 27, 2010 (see attached), indicated that the PG&E

Siren Drill Grant Subcommittee authorized
funding to SLOECC in the amount of $3,150 (later revised to
$3010).The letter also stated:

Your agency will be required to submit a
budget report to the American Red Cross - SLOVOAD no later than December 31st,
2010, attesting that funds granted were spent on items that enhanced
the organization's ability to function in the event of an emergency.
If capital items were purchased, copies of all receipts must be
included with the report. (Emphasis
added)
The documentation that SLOECC provided does not
satisfy either of these conditions.

Differences
between Items Requested and Purchased
SLOECC's request for
funds under the Siren Grant listed the following proposed expense categories:

Radios
Antenna
Transceivers
Wiring cables
The documentation that SLOECC provided earlier
this week listed several items that are not in these categories and do not
appear to "enhance the organization's ability to function in the event of an
emergency." These include:

Internet service
Uniform embroidery
Stationary
The items within the scope of your grant request are:

KPC-9612 PLUS Packet Controller
Three units of Kantronics 9612+ Terminal Node
controller
Three units of Yaesu FT-7900
transceiver
Missing Receipts
Of the the
three items within the scope of the grant, SLOECC provided a vendor
receipt only for the KPC-9612 PLUS Packet Controller. It has not provided vendor
receipts for:

Three Kantronics 9821+ Terminal Node
Controllers
Three Yaesu FT-7900 Transceivers
Ways to Address
these Issues
The simplest way for SLOECC to address these issues
will be to provide vendor receipts totaling at least $3,010 for items in the
categories in SLOECC's grant request: radios, antenna, transceivers, and wiring

cables.

If SLOECC
cannot provide vendor receipts for purchases in these
categories, please submit a letter to
the PG&E Siren Drill Subcommittee requesting permission to
reallocate the funding allotments. This
letter should (a) list the items,
(b) explain how they enhance SLOECC’s ability to function in the event of an
emergency, and (c) include vendor receipts for the items.

Please submit the receipts, including (if needed) the letter requesting permission to
reallocate
your funding allotment, to:

PG&E Siren Drill Grant Subcommittee
c/o
American Red Cross
225 Prado Road, Suite A
San Luis Obispo, CA
93401

Fax: 805-544-1921
I have included at the end of this message a summary of
the items listed in the documentation that
you submitted earlier this week.

I appreciate your help in resolving this
matter.

117. Ron Patterson

Yahoo group: sloecc
Date: 2011-02-05 22:09:31 UTC
From: Avery Wright (KD4GBA)
Topic: 117 Message: 117

Received this a few minutes ago from one of the PRARC members:

I spoke with Ron yesterday and he is back home and in recovery mode. He spends a lot of time on his back resting. Ron spent some time in a care facility and then had to have surgery. They wanted to keep him a bit longer but he said he had enough. Ron asked me to encourage everyone to get their dues paid. Mary, W6ROX collected them at the last meeting. You can either pay at the meeting next week or mail it to Ron. He added he will not be able to attend the meeting but expects to be back at full strength by the March meeting.

123. Standby in-case you are needed

Yahoo group: sloecc
Date: 2011-03-11 18:24:51 UTC
From: Avery
Topic: 123 Message: 123

Dear VOAD members,

The American Red Cross has opened six evacuations centers in response to today's tsunami. VOAD members are asked to be on standby in case their services are needed.

There may be additional tsunami activity today. The surge height could increase as the tide rises.

As of 9:22 am this morning, the latest estimates from the National Weather Service of tsunami wave height amplitudes are:

```
MORRO BAY............... 3.9 FT
PORT SAN LUIS HARBOR.... 7.1 FT
PISMO BEACH............. 2.4 FT
SANTA MARIA............. 3.3 FT
SANTA BARBARA........... 1.6 FT
CARPINTERIA............. 1.6 FT
VENTURA................. 2.9 FT
MALIBU.................. 1.2 FT
SANTA MONICA............ 2.8 FT
REDONDO BEACH........... 2.1 FT
SAN PEDRO HARBOR........ 1.3 FT
HUNTINGTON BEACH........ 2.3 FT
```

For latest official updated on the tsunami impact, visit the SLO County Office of Emergency Services website at http://www.slocounty.ca.gov/OES/emergencyinfo.htm.

From: Neal & Ardella Swanberg
Topic: 123 Message: 124

Early morning on March 11, 2011, the Estero Area CERT Coordinator requested CERT volunteers muster at the Morro Bay Community to provide evacuation support for the expected tsunami.
We arrived just after 8:00 am. 6 CERT volunteers reported. Ham Operators included the Swanbergs, Jo, Mike and Neal who are also CERT volunteers.
We were asked to standby for briefing.

At the same time Fire Chief Pond who is the MB EOC Director requested that we mobilize ECC-5 which we did.
The CERT team was demobilized at 10:00 am and was not needed. ECC-5 was demobilized at 1:00 pm.

During the event, ECC-5 provided general communications to the ham community and exercised the packet station. No emergency traffic was handled

Red Cross International Family Linking for Japan

The Red Cross has launched a special Family Links website to help people seeking to re-establish contact with family members and friends.

People in Japan and abroad can register on the website to inform their family and friends that they are safe and provide their current contact details, while those looking for people can check the list for information. They can also register the names of family members and friends, encouraging them to get in touch.

The website is at <http://www.icrc.org/familylinks> http://www.icrc.org/familylinks.

The Red Cross is not yet able to actively search for missing persons in Japan. We encourage you to utilize the Red Cross family links website and to keep calling and to trying to contact other family members who live in the region. Even though communication networks are overloaded right now, the situation may change and access to mobile networks and the internet may improve.

You may also find these other family linking resources helpful.

126. CPARC in need of 90 degree antenna clamps

Yahoo group: sloecc
Date: 2011-03-15 17:42:17 UTC
From: Marcel S
Topic: 126 Message: 126
Attachments: 1 described; binary payloads are missing from this source WARC

Hello friendly hams!

The Cal Poly Amateur Radio Club is in need of at least 4 additional antenna clamps to mount 1-1/4" OD antennas to some tower segments for the Wildflower Triathlon that we provide communications for each year (>7000 athletes!). We setup a large radio installation at Lake San Antonio with 6 repeaters on a hill top (see photo) along with a dispatch center and 5-digipeater APRS network to name a few. Historically, we've been seen jury-rigging antennas to aluminum crossbars with everything from zipties to bright green duck tape! A more eloquent solution is desired this year. Can you help?

Any and all advice is welcome. We need clamps by the first weekend in April in order to setup the site. Otherwise, we'll end up buying 4 of these:
http://www.tessco.com/products/displayProductInfo.do?sku=23151

Many thanks!

Cheers,

-Marcel Stieber, KI6QDJ*

Marcel,

Have you considered going to CED and looking at some of the
clamps they have? If I worked there I would help.

133. SLOECC Website Update

Yahoo group: sloecc
Date: 2011-04-03 23:15:56 UTC
From: Neal & Ardella Swanberg
Topic: 133 Message: 133

After our board meeting on Tuesday, I will stop by the Comm Shop and take care of any updates needed for the SLOECC website.

Right now, I plan to add the list of controllers for the Tuesday night county net to the end of the net script so the controllers can have the list along with the script.

If you have any changes, bring a hardcopy mark-up to the meeting and I will take care of it.

Best to all

News from ECC16!
de KI6QDJ

---------- Forwarded message ----------
From: Cal Poly Amateur Radio Club <calpolyradioclub@...>
Date: Wed, Apr 13, 2011 at 2:50 PM
Subject: CPARC in the News - Tsunami Communications Support and Wildflower Triathlon
To: W6BHZ Local <calpolyradioclub@...m>, alumni@...

CPARC just made it into the news again, twice!

The EE Department Newsletter published a nice article highlighting the club's involvement with the Wildflower Triathlon with a splendid photo of Andrew KI6UOC, John KI6QDF, and myself setting up the Pleyto Digi last year. (See attached!)

The Cal Poly Report for April 13, 2011 also published a short blurb highlighting the Club's involvement with Tsunami Communications Support after the Japanese Earthquake. See:
http://calpolynews.calpoly.edu/cpreport/11_reports/April_13.html

Keep up the great work folks! It's awesome to see the club really getting into the public eye. To give you an idea, our "little" test session this weekend at open house already has over 25 RSVP's, more than double what we expected!

Cheers,

**Amateur Radio Club Members Help with Emergency Communications for March 11 Tsunami

Members of the Cal Poly Amateur Radio Club assisted with emergency communications for tsunami warnings along the West Coast on March 11,

following the massive earthquake in Japan. Throughout the day, club members (who are all licensed ham radio operators) relayed first-hand reports of the tsunami's North American impact along the Pacific coast. The Cal Poly club worked with radio operators at the Morro Bay Fire Department, relaying reports on wave surges and swells to the nationwide Salvation Army Team Emergency Radio Network (SATERN).

Established in 1947 and currently the nation's largest collegiate amateur radio club, CPARC has participated in communications support for several historic disasters, including the Highway 41 Fire and the Loma Prieta earthquake. For more information about the club, visit http://www.w6bhz.orgor contact Marcel Stieber at ext. 6-2737 or calpolyradioclub@....

142. CARLA has extended into SLO County

Yahoo group: sloecc
Date: 2011-04-19 16:52:28 UTC
From: Andrew Crawford KG6TZM
Topic: 142 Message: 142

For those who do not know, CARLA is a UHF Motorola system that now reaches as far south as SLO and the Grapevine, up into Oregon, and east into Nevada. Try it out on the link, there are many great radio minds who monitor and maintain the system.

The repeater is on Tass at the commercial site.

We are pleased to announce the latest addition to CARLA.

System 29 located in San Luis Obispo, CA.

Frequency & PL information:
443.500+
Local PL: 100.0Hz
Link PL: 162.2Hz

CARLA 29 is located on Tassajero Peak along the Cuesta Ridge which is located to the west of the Cuesta Pass on Hwy 101. It overlooks San Luis Obispo and surrounding communities. This system has been several years in the making.

>From the North along US-101 coverage starts at about Camp Roberts and continues south along the 101 corridor all the way to Santa Maria and just North of Los Alamos. It covers to the West along Hwy 1 from San Simeon to the North to parts of Lompoc & Vandenberg AFB to the South.

When visiting the greater San Luis Obispo area including Cal Poly, Paso Robles, Cambria, Hearst Castle, Pismo Beach, Morro Bay, Avila Beach and much more, CARLA System 29 should provide ample coverage.

Additionally, several weeks ago a major upgrade at CARLA 4 was performed to allow for the back haul of link traffic from CARLA 29 into the rest of the network. Be aware that you will need to leave enough time for the links to open up from one end of the network to the other. For instance, from CARLA 29 (SLO) to CARLA 5 (Oakland) involves 4 hops. From CARLA 29 to CARLA 28 (Mt. Shasta) requires 6 hops.

A special thanks to all those who were involved with making this project happen.

153. New 440Mhz Repeater

Yahoo group: sloecc
Date: 2011-05-12 17:14:04 UTC
From: Avery
Topic: 153 Message: 153

All,

Have just been informed by Paul Porter, County Comm Chief, that our 440 repeater on Lopez hill is now active. Here is the info:

444.025 PL is 127.3

Give it a try!

73,
Avery Wright, KD4GBA

154. RE: [sloecc] New 440Mhz Repeater

158. Re: New 440Mhz Repeater

Yahoo group: sloecc
Date: 2011-05-12 23:10:13 UTC
From: kk6dj
Topic: 153 Message: 158

Some technical details:

Radio is a Tait TB8100. This is the County's new generation radio used on all the public safety systems.

Power out= 100W to a dual isolator and duplexer making about 55W to the antenna

Antenna is a Sinclair dual element exposed dipole at 40ft on the new Lopez tower.

The repeater is currently a stand-alone box with tx and rx ctcss of 127.3Hz @400Hz deviation

The callsign is KK6DJ/R

Due to coordination issues with Tass, the frequency may be moved to Tass and the Tass frequency moved to this site.

Have a great day!

I'll update the SLOECC website.

We should figure out a way to add the new frequency to the PG&E Motorola HT 1000's that were distributed to the ham community. There are 200+ of them. I think Bill Bailey has the only software to reprogram them. We need a challenge like that.

I am happy to program them when around as well.

Perhaps the Comm shop could lend a tech to assist with the challenge at one of the monthly meetings.

Cal Poly ARC also has a laptop capable of programming the HT1000's along with the cable. Maybe we'll set a crew to work at the BBQ on the 29th? Otherwise someone could borrow it from us. We have about a dozen that'll need the reprogram as well.

181. Tass UHF frequency change 444.025

Yahoo group: sloecc
Date: 2011-06-16 17:28:19 UTC
From: kk6dj
Topic: 181 Message: 181

Hello all,

I am in the process of coordinating all the SLOECC repeaters including new future systems. As many may or may not be aware, none of our repeaters are officially coordinated including our Tassajara 443.975 repeater. There is a coordinated repeater on that pair in King City which is linked to a system in the Bay Area.

Due to the existing coordination of the King City linked system, and the longer term plan to link all our UHF repeaters into one countywide system, I feel the best course of action is to coordinate another frequency for Tass.

Before coordination can be granted, the repeater must be on the air. As such, I have decided to swap the Tassajara and Lopez Hill frequencies. 443.975 in the AG area should not present any coordination problems.

The tentative date for the change is Wednesday, July 7th, 2011. This will begin the testing phase of the new frequency. Assuming no problems in July, I will begin formal coordination in August. Should there be a problem, we will explore the tentative Black Mountain frequency of 443.925.

If you notice, these frequencies are very close to minimize duplexer tuning and possibly allow for a hybrid voting, multicast, network in the distant future.

My face-to-face discussions with SLOECC members indicate this should not be a problem with only some administrative details to address (web site updates, announcements on nets, etc).

I am opening this to any ideas/problems to be addressed.

73,

John, KK6DJ

Thank you. I failed to check the repeaters in non-county owned sites. I expect the second round of coordination will address the Cambria repeater. I also see a coordination for the 147.99 repeater.

Wednesday June 22, 2011
7:00 pm - 9:00 pm
(This event repeats every month on the fourth Wednesday.)
Location: San Luis Obispo Sheriff's Auditorium
Street: 1585 Kansas Ave.
City State Zip: San Luis Obispo, CA 93405

Notes:
Kansas Avenue T-junctions (from south) into Highway 1, at the first signal west of the entrance to the California Men's Colony (one mile). Drive almost to the end of the road. The EOC and the auditorium are the last buildings on the south side of the road. Look for Flag pole and other hams in the parking lot.

195. Tass and Lopez UHF repeaters swapped

Yahoo group: sloecc
Date: 2011-07-07 18:51:19 UTC
From: kk6dj
Topic: 195 Message: 195

Hello All,

Yesterday I swapped the frequencies for Tass and Lopez.

Tass is now 444.025+ 127.3
Lopez Hill is now 443.975+ 127.3

Please put the word out.

We are in testing mode at Tass so let me know if any problems surface.

73,

John, KK6DJ

From: kf7hni
Topic: 215 Message: 215

The Cal Poly Amateur Radio Club's fall quarterly test session will take place on Saturday, October 1st. Location is on the Cal Poly campus, room TBD. The ham cram starts at 8am and is $25 (which includes a packet of the test bank, snacks, and the examination fee). Otherwise, you can sign up for just the examination for $15 and show up at 4pm. Please bring a pencil, SSN (card not necessary), and 2 forms of ID. Details, updates, and sign-ups at http://w6bhz.org . Please contact calpolyradioclub@... if you have questions.

237. EMAD Exercise and EOC update

Yahoo group: sloecc
Date: 2011-10-17 23:03:26 UTC
From: mtimbang@co.slo.ca.us
Topic: 237 Message: 237
Attachments: 2 described; binary payloads are missing from this source WARC

SLOECC members,

Hope all is well. This is a follow up to our FEMA evaluated Nov / Dec exercises and EOC issues discussed during last week's monthly meeting. As far as your participation during the 9 Nov Dress Rehearsal and 7 Dec Evaluated Exercise, it is not required. The EMAD's objectives will be focusing on specific radiological monitoring and decontamination tasks of public evacuees. As discuss and agreed with FEMA, this will not be a Full Scale exercise in which all functions to include the EOC will be activated. The agreement document call the "Extent of Play" highlights what FEMA will expect to see and evaluate, of which ARES/RACES, EOC activation, County Health Agency DOC, among many other functions are not included. Again this is due to the limited scope of this exercise. We do need additional volunteers / mock evacuees for the exercise on both dates and would appreciate your assistance, please refer to the attached flyer. In addition, during next year's NPP plume phase exercise we plan for SLO ARES/RACES participation.

In regards to the Comm Unit Leader position move at the EOC, it has partially taken place. Please refer to the attached diagram with RED arrows delineating the move. The Communication Unit Leader computer has been established and the ARES/RACES workstation will be moved according to the diagram. There were no ARES/RACES radios/equipment at the moved workstation. The Comm Unit Leader's radio and phone only need to be moved a short distance across the divider.

Please let me know if you have any questions or concerns.

v/r

Both the UHF repeater and VHF repeater are back in operation.

The VHF repeater was inadvertantly left disabled after a preventative maintenance service last week where it was discovered the UHF antenna had failed.

Yesterday, a new antennas was installed on UHF and VHF re-enabled.

Have a great day!

calpolyradioclub@...

96 Amateur Radio Licenses Granted at Cal Poly Licensing Session

SAN LUIS OBISPO – On Friday, November 4, 2011, a record 114 Electrical Engineering freshman students from Cal Poly attempted their FCC amateur radio technician-class license exam in the largest amateur radio licensing event ever in San Luis Obispo County. A record-breaking 96 students succeeded in passing the official exam and join the next generation of Ham Radio Operators in the US.

Dr. Dennis Derickson (AC0P), Cal Poly Electrical Engineering Department Chair, conceived the Freshman Licensing Initiative which gives every student a chance to get their radio license as part of the EE111

Introduction to Electrical Engineering Course curriculum. This test session was administered during the 50-minute class period and counted as one of the midterm exams for the freshman students. 11 Volunteer Examiners assisted in checking IDs and administering the exam along with a dozen other volunteers to coordinate the event. Of the 189 students enrolled in the class, 114 opted to take the official FCC exam and attempt to get their licenses. The 85% that succeeded already had their callsigns posted to the FCC website on Monday due to tremendous efforts from the ARRL VEC (American Radio Relay League Volunteer Examiner Coordinator office) to process the results, letting these students get on the air in no time.

Hosted by the Cal Poly Amateur Radio Club (CPARC), this event broke its previous record of 62 new licensees, set earlier this year on Oct 1, 2011. This session is likely the largest Amateur Radio License Testing Session ever held at the collegiate level. Special testing arrangements were made with the American Radio Relay League (ARRL) to accommodate this large group. These 96 new amateur radio operators will join more than 700,000 other hams in the US in providing volunteer and emergency communications support for everything from local bike rides and parades to global disaster relief, including the 2011 earthquake and tsunami in Japan.

Members from CPARC hosted review sessions to help students prepare to pass their exam and get introductory knowledge on a wide variety of electrical engineering topics. Getting an amateur radio license is the first step towards many career opportunities in the communications industry, from engineering UAVs, integrating Wi-Fi on the Amazon Kindle, to creating 4G cell phone networks, to designing communication subsystems on DirecTV satellites. CPARC members are regularly learning about radios through retuning filters on radios, building directional antennas for transmitter hunts, and putting together an emergency vehicle tracking network for the Wildflower Triathlon using two dozen radios and GPS units, digital repeaters, and internet gateways.

Founded in 1947, the Cal Poly Amateur Radio Club has a long tradition of communications service on campus and in the San Luis Obispo community. The club maintains Emergency Communications Station No. 16 on the Cal Poly Campus for the San Luis Obispo Emergency Communications Council (SLOECC) which is equipped with emergency power and radio equipment to support various public safety agencies in the event of a disaster. More information about the club can be found at www.w6bhz.org.

For more information please contact: calpolyradioclub@....

279. New RACES Repeater 444.150 on Black Mtn

Yahoo group: sloecc
Date: 2012-01-04 17:52:59 UTC
From: kk6dj
Topic: 279 Message: 279

Hello All,

A new repeater is installed on Black Mtn at the County site for RACES/ARES systems. The frequency is 444.150 ctcss 127.3. The coverage area for this site is North county out to California Valley.

Of note:

This machine has been on the air for the last week, beaconing every 10 minutes. It is now set to a normal ID function. Coordination will start at the end of January although the frequency seems clear.

This machine is linked full time to the Arroyo Grande 443.975 machine.

The id is sent without ctcss. The machine normally transmits 127.3 so if you set up decode on your radio, you will not hear the id.

Test it out and let me know if there are any problems.

73, John KK6DJ

284. Re: [sloecc] New RACES Repeater 444.150 on Black Mtn

Yahoo group: sloecc
Date: 2012-01-10 21:53:26 UTC
From: Andrew Crawford, KG6TZM
Topic: 279 Message: 284

John,

Thank you for all of your hard work to support RACES and amateur radio in general in the county. The new repeater is a pleasure to have on the air and use.

Andrew

Hello W6BHZ Members, Community Members, and Alumni!

Some of you may have heard that *we are replacing our Tri Ex W-80 antenna tower* that's served us so well since 1976 when it was graciously donated by former Tri Ex Tower owner Frank Clement W6KPC (SK). The tower is reaching the end of its life and through the generous new donation of a US Tower TX-472MDPL 72ft telescoping tower, our shack can still keep its HF legacy on campus! US Tower Corp. has kindly donated the tower, Yaesu is donating a suitable rotor, and Ham Radio Outlet is giving us the antennas and materials we need *at cost*! The club has some funding available to help with installation and associated hardware costs but *we're looking for some generous folks that can sponsor an antenna for the new tower!* Our existing antennas need to be replaced as well (our 40m dipole just broke a brace this quarter), so the whole setup is getting rebuilt: tower, antennas, coax, etc.

Here are the specific items we're hoping to find sponsors for (note that these were chosen from HRO's catalog for discount pricing):
- *Tri Band Antenna* - Cushcraft X-7 (List ~$800) or Hy-Gain TH-7DX (List ~$800) or similar
- *40m 2 Element Beam Antenna *- Cushcraft XM-240 (List ~$830) or M2 40M2L (~$1300) or similar
- *80m Wire Dipole Antenna* - (List ~$100)
- Coax Feed-line - (List ~$500 tbd)

"What do I get out of this?" you may ask. Besides the personal satisfaction of supporting the club for the next 30 years with excellent equipment, getting a tax write-off (we can process the forms for you), and being able to visit the shack any time and say that you bought that antenna? We'll also happily include your name and callsign on the new tower plaque along with the other major donors. If you send us your t-shirt size and address, some other club swag may find its way into your mail box as well! There will also be a decent amount of University and local media coverage when the new tower is finished.

"Sounds great! How do I help?" Send me an email (ki6qdj@...) or give me a call sometime (970-462-7235) and we can arrange the details. A check to the club is easiest. Otherwise we can coordinate the purchase directly from HRO for you. More info can be found here: http://w6bhz.org/donations.html We're also looking for knowledgeable people to help with the installation of the new tower and antennas in the coming months.

Many thanks for taking the time to read this email and for considering our proposal!

All the best,

305. Tassajera UHF frequency change March 21st

Yahoo group: sloecc
Date: 2012-02-21 19:09:01 UTC
From: kk6dj
Topic: 305 Message: 305

QST

The short story:

The 444.025 machine on Tassajera will change frequency up one channel to 444.050 on March 21st due to interference from a southern california repeater on 449.020.

The longer story:

The 444.025 machine which received a clear coordination from NARCC and no negative coordination from the Southern CA coordinator is getting interference from a repeater coordinated on Santa Ynez Peak on 449.020; 5kHz off our input. They are part of a wide area system covering southern california and were likely not noticing our interference to them as there are few users on that input. The signal from them to our receiver was about -70dBm. This is a higher signal than many of our field units.

Regarding the new frequency:

NARCC indicates this too should be clear. Southern CA has not responded to inquiries as to any potential problems with this frequency. Since their standard frequencies are 444.040 and 444.060, as a worst case, we will be 10kHz from them.

73, John, KK6DJ

306. 444.100 @ Rocky Butte now linked to Black Mtn & Lopez Hill

Yahoo group: sloecc
Date: 2012-02-22 00:58:04 UTC
From: kk6dj

Hello SLOECC,

As announced on the net this evening, Cal Poly ARC is hosting a t-hunt this weekend. Details are in the email below. This is a great opportunity to learn about ARDF (amateur radio direction finding) that is used in search and rescue and is even an international sport!

Hope to see you there! Feel free to email me with any questions.

To: W6BHZ Local <calpolyradioclub@...>

Hey CPARC!

Our annual T-Hunt is coming up on* Saturday, February 25th*! If you're interested in participating, please fill up the sign-up form at the bottom of this email.

If there are adequate supplies, you can build your own yagi antenna! If you're interested, the kit cost $60 and the build session starts at *9am at Cal Poly - Building 20 (Engineering East), Room 116*. You can also come by and help out too!

The actual T-hunt starts at 11am, outside the shack. Come with your antenna and with a $5 donation fee for participation. If you don't have an antenna, you can always borrow one from the club, so don't miss out on this exciting event!

Attached should be a flyer for this event and a map showing the location of our meeting place. More info can be found at http://www.homingin.com/joemoell/calpoly0212.html.

Sign up at https://docs.google.com/spreadsheet/viewform?formkey=dHNmdlVScG9LNkltaGtNRnhXM0V4OFE6MQ#gid=0

Feel free to contact me if there are any questions! Hope you see you guys there!

313. New VHF RACES repeater on Black Mtn. 146.835

Yahoo group: sloecc
Date: 2012-03-07 22:13:45 UTC
From: kk6dj
Topic: 313 Message: 313

QST

The last of a series of new ARES/RACES repeaters is on the air at Black Mtn for testing. This proved a difficult task to coordinate with Northern CA and Southern CA. I believe we have a clear channel.

Testing has been in progress for the last two months with 2 frequency changes due to co-channel user issues. We will continue testing until mid-April at which point we will apply for formal coordination.

The frequency is 146.835 output/ 146.235 input, ctcss 127.3Hz in and out.

Give it a try and see how it works. I can get into it with a handheld from outside the County EOC.

73,

John, KK6DJ

320. 444.050 in service at Tassajera

Yahoo group: sloecc
Date: 2012-03-22 17:15:20 UTC
From: kk6dj
Topic: 320 Message: 320

FYI

Yesterday I changed the frequency of the Tassajera UHF repeater to the new 444.050.

Additionally, the cross connects were put in place such that if we successfully complete 30 days of testing, I can connect it to the rest of the UHF network (Rocky Butte, Black Mtn. and Lopez Hill)

Coverage of Tass has not changed. Please let me know if you hear any problems.

73,

John, KK6DJ

FOR IMMEDIATE RELEASE

Contact: Javen O’Neal
805-285-2836
calpolyradioclub@...

Cal Poly Hosts Radio Contact with International Space Station on Tuesday, March 27th

SAN LUIS OBISPO – The Cal Poly Amateur Radio Club and the Electrical Engineering Department of Cal Poly are hosting an amateur radio contact on Tuesday, 27 March 2012 with astronaut Daniel C. Burbank, callsign KC5ZSX, who is currently aboard the International Space Station. The event will be held on the Cal Poly campus in the Advanced Technology Laboratories (Building 7), Keck Lab from 11:30am-2:30pm..

The event is much more than just talking to an astronaut in low earth orbit and is heavily focused on education, including guest presentations and club demonstrations.

As a cooperative program between the National Aeronautics and Space Administration (NASA), the Amateur Radio Relay League (ARRL), and AMSAT, the Amateur Radio on the International Space Station (ARISS) program is designed to promote science, technology, engineering, and mathematics

activities for students from kindergarten to college.

The International Space Station, at an altitude of around 300km, orbits the earth about every 90 minutes, and has a communication window of around 10 minutes for any given ground station. As its first time hosting an ARISS contact, Cal Poly will be using a telebridge, which is a phoneline connection from Cal Poly to a ground station operated by Richard Flagg, callsign AH6NM, in Hawaii. The ground station, equipped with directional yagi antennas, will communicate wirelessly over amateur radio frequencies to the ISS, using a voice uplink and downlink channel.

The actual contact will take place between 1:13pm and 1:25pm, Pacific Daylight Time. During the contact window, students will be able to ask Burbank questions about life in space and what it means to be an astronaut.

This event is open to the public. Event updates and parking information can be found on the Cal Poly Amateur Radio Club website, w6bhz.org.

326. Cal Poly ARISS Contact Article and Thank You

Yahoo group: sloecc
Date: 2012-03-29 06:52:08 UTC
From: Marcel S
Topic: 326 Message: 326

Hello all,

Just wanted to send a big thanks to the Estero and Satellite ARCs for attending and assisting at our International Space Station Contact yesterday at Cal Poly! The event was a wonderful success and it was great to have several SLOECC members in attendance to show the wonders of Ham radio to around 150 attendees including countless 5th graders and several Boy Scouts. Thank you to Bill AE6EQ, Neal KG6AYI, John W6NBC, Bill KA9A, (and I'm sure I'm missing someone else) for helping out!

Here's the Mustang Daily Article on the event featuring Javen KF7JO and Bill KA9A:
http://mustangdaily.net/radio-club-makes-contact-with-international-space-station/

Also our KSBY appearance:
http://www.ksby.com/videos/cal-poly-connects-with-outer-space/

339. 444.050 linked to 443.975, 444.100 & 444.150

Yahoo group: sloecc
Date: 2012-04-26 14:55:38 UTC
From: kk6dj
Topic: 339 Message: 339

444.050 has operated for more than a month with no apparent interference problems so now is in coordination.

Additionally, it is now linked to the Black Mtn (444.150), Rocky Butte (444.100) and Lopez Hill (443.975) repeaters full time.

Give it a try and let me know your thoughts.

73,

John, KK6DJ

340. Re: [sloecc] 444.050 linked to 443.975, 444.100 & 444.150

Yahoo group: sloecc
Date: 2012-04-30 15:16:41 UTC
From: Neal & Ardella Swanberg
Topic: 339 Message: 340

I was at Hwy 58 & Shell Creek Road with the Wildflower Ride on Saturday.
I made a good contact with the Black Mtn UHF (444.150) repeater to a ham in the hills near Lopez Lake obviously through the links.
I tried the Black Mtn VHF repeater (146.835) and couldn't raise it. Is it working?

I suspect it may have been left powered off. We are doing major work at Black with re-racking equipment. The box was moved to another rack but my have not been powered up. We will have someone up there tomorrow.

351. Fw: SLOECC Emergency Communications Training Exercise

Yahoo group: sloecc
Date: 2012-05-14 20:22:45 UTC
From: Neal & Ardella Swanberg
Topic: 351 Message: 351

Note to all: This is Saturday of Memorial Day Weekend.

Hope you all have a great holiday!
73

Neal

From: Max Sicher
Sent: Monday, May 14, 2012 9:22 AM
To: Neil Swanberg
Subject: Exercise

Neal, Will you please forward to all e-mail lists.

QST QST QST

SLOECC/ARES/RACES will be conducting a training exercise on Saturday, May 26, from 9 AM till 1200 PM.

The exercise will be conducted at the following locations:

ECC 1 County EOC (Net Control)

ECC-5 Morro Bay EOC, Community Center

ECC-11 Los Osos Fire Station

ECC-15 Sheriff's South Station, Oceano

We will be using VHF/UHF voice, through repeaters and simplex for instructions and messaging.

Additionally, sending and receiving e-mail utilizing VHF Packet (paclink) and HF Pactor will be practiced.

Time permitting we will attempt HF voice contacts on 160, 80 and 40 meters.

Coordination will be on the 146.67 repeater.

If you are interested in participating in this training contact the following:

ECC-1 Max Sicher, msicher@... 528-5065

ECC-5 Neal Swanberg njswanberg@... 995-3181

ECC-11 Oscar Bautista oscar.bautista@... 323-775-6981

ECC-15 Phil Henry phenry@... 781-1525

There are space limitations in some of the ECCs so don't delay.

354. 444.100 Rocky Butte failed receiver

Yahoo group: sloecc
Date: 2012-05-16 16:49:12 UTC
From: kk6dj
Topic: 354 Message: 354

FYI

The receiver for the 444.100 repeater at Rocky Butte has failed. The transmitter is still enabled to carry audio from the 443.975, 444.050 and 444.150 repeaters.

The failed module is in our shop. I will announce when it is fully back in service.

73,

John, KK6DJ

356. 444.100 rx back in service (for the most part)

Yahoo group: sloecc
Date: 2012-05-18 16:33:31 UTC
From: kk6dj
Topic: 356 Message: 356

The 444.100 receiver is back in service. The receiver module being a 425-450 unit had to be sent in for service (looks like a blown front end). I do not have an estimated turn-around time but it went out yesterday.

I have temporarily installed a 450-470 module which is 25dB less sensitive (squelch open at -93dBm). The repeater has significantly less coverage on the input for now. I can get into it from SLO on my mobile running 10 watts.

73,

John, KK6DJ

358. Cal Poly ARC Radio Equipment for Sale

Yahoo group: sloecc
Date: 2012-05-21 16:18:23 UTC
From: Marcel S
Topic: 358 Message: 358

Hi SLOECC,

The Cal Poly ARC has gotten lots of gear donations to the club in the last year and it's time to find homes for the things that the club doesn't have a direct use for.

Please visit the "Club Equipment for Sale" link at w6bhz.org or click here<https://docs.google.com/document/pub?id=1zbcYKA32dgG0W4NKqVvLtGZUI7iBhgUXLPINpW8Sj0Y> to
see the list.

If you find something that you'd like, please send me an email pronto with your interest. The prices listed on the upper items are what they current value is on eBay, not what we're "charging". We want to find a good home for the radios and want priority to go to our active membership. That in mind, anyone can send me an email with interest and an offer if they would like something. Not everything on the list has been tested fully yet, that link will get updated as sales progress.

Please send me your interest before the end of the week so we can start divvying up the gear to people. The club is using this to raise some money as well, so please make a fair offer based on what you can afford and what it's worth to you. That in mind, we are serving to starving college students, so please email me any financial concerns and we can happily make something work out for you.

Cheers,

-Marcel Stieber, AI6MS*

361. SLOECC President Nominations

Yahoo group: sloecc
Date: 2012-05-22 14:44:57 UTC
From: Neal & Ardella Swanberg
Topic: 361 Message: 361

With the recent resignation of its president, the San Luis Obispo Emergency Communications Council (SLOECC) is soliciting nominations for this position.

The purpose of SLOECC is to provide logistics support and a cadre of trained amateur radio operators whose primary goal is to provide and support emergency radio communications in San Luis Obispo County.

The duties of the SLOECC President include leading the organization toward achieving its goals and serving as chairperson for all meetings of the organization.

If you are interested in joining us on the council or know of someone who may be, please contact me or any of the board members copied in this email.

Best wishes to all for a great summer.

Neal Swanberg, KG6AYI
SLOECC Board Member

Note: You receive copies of these general information e-mails because of your past interest in amateur radio communications. If you would prefer not to receive them, please contact me by return e-mail and I will be happy to remove your name from the list.

363. Saturday Emergency Communication Exercise

Yahoo group: sloecc
Date: 2012-05-23 04:24:22 UTC
From: Neal & Ardella Swanberg
Topic: 363 Message: 363

Just a reminder that SLOECC/ARES/RACES will be conducting a training exercise on Saturday, May 26, from 9 AM till 1200 PM.

The exercise will be conducted at the following locations:

ECC 1 County EOC (Net Control)

ECC-5 Morro Bay EOC, Community Center

ECC-11 Los Osos Fire Station

ECC-15 Sheriff's South Station, Oceano

We will be using VHF/UHF voice, through repeaters and simplex for instructions and messaging.

Additionally, sending and receiving e-mail utilizing VHF Packet (paclink) and HF Pactor will be practiced.

Time permitting we will attempt HF voice contacts on 160, 80 and 40 meters.

Coordination will be on the 146.67 repeater.

If you are interested in participating in this training contact the following:

ECC-1 Max Sicher, msicher@... 528-5065

ECC-5 Neal Swanberg njswanberg@... 995-3181

ECC-11 Oscar Bautista oscar.bautista@... 323-775-6981

ECC-15 Phil Henry phenry@co.slo.ca.us 781-1525

There are space limitations in some of the ECCs so don't delay. ECC 1 and ECC 15 are county facilities so county badges will be needed.

You can also monitor the exercise on the 146.67 repeater.

370. Fw: Annual Amateur Radio Field Day and Equipment Auction

Yahoo group: sloecc
Date: 2012-06-09 14:37:56 UTC
From: Neal & Ardella Swanberg
Topic: 370 Message: 370

For information contact:

Neal Swanberg - 805-995-3181

PO Box 585, Cayucos, CA 93430

njswanberg@...

The Estero Radio Club will be participating in the NATIONAL AMATEUR FIELD DAY, JUNE 23 &24. This is an annual national event where amateur radio operators (hams) try to make as many short wave radio contacts as possible in a 24 hour period.

In the San Luis Obispo area, the Estero Radio Club will be demonstrating Amateur Radio at the ham station and residence of Bill Bailey, 1680 Nipomo Ave., Los Osos. They invite the public to come and see ham radio's capabilities and learn how to get their own FCC radio license before the next disaster strikes.

The hours of operation will be from 11:00 am, Saturday, June 23, to 11:00 am, Sunday, June 24, 2012.

In addition, from 2:00 pm to 4:00 pm on Saturday, we will be holding a silent auction of amateur radio equipment including HF, handheld and mobile radios, towers, antennas and other gear. Everyone is invited to stop by and find something to add to their ham shack.

From: Neal & Ardella Swanberg
Topic: 374 Message: 374
Attachments: 2 described; binary payloads are missing from this source WARC

Greetings all, Hope you are having a great summer!

Don't forget to stop by the Estero Radio Club - Ham Radio Field Day Event - next Saturday and Sunday, June 23 and 24, at Bill Bailey's ham shack in Nipomo.

We'll be on the air from 11:00 am Saturday to 11:00 am Sunday. Anyone is welcome work contacts.

We'll also be holding a silent auction with lots of ham radio gear from 2:00 pm to 4:00 pm Saturday afternoon. Attached is a list of the items we have now and more may come in. Proceeds will go to the Estero Radio Club.

As an added attraction, we have 9 GM-300 UHF mobile radios available FREE to new hams, (first come, first served).

Bill's place is at 1680 Nipomo Ave., in Los Osos. Parking is available in back on Willow Road (the gravel part).

Pass this on to your friends, all are welcome.

See you there

73

380. Rocky Butte 444.100 repaired

Yahoo group: sloecc
Date: 2012-06-26 16:27:35 UTC
From: kk6dj
Topic: 380 Message: 380

Yesterday I installed the repaired receiver for the 444.100 repeater at Rocky Butte. The repeater is working normally again.

For you techie folks...

The receiver 12dB SINAD is 0.5uV/ -113dBm at the antenna port of the duplexer. Since this is a fairly quiet site, I'd like to add a preamp at some future point but overall this is fine.

Additionally, the failed component was the front end rf amplifier. I am unsure why it failed but it is repaired now.

Have a great day!

390. W6BHZ 65th Anniversary Celebration - Saturday, September 15th, 2012 in SLO!

Yahoo group: sloecc
Date: 2012-08-06 06:45:33 UTC
From: Marcel S
Topic: 390 Message: 390

To all W6BHZ Members, Alumni, Supporters, Community Members, and Friends!

The Cal Poly Amateur Radio Club will be hosting the *Club's 65th Anniversary of W6BHZ on Saturday, September 15, 2012* in beautiful San Luis Obispo. This event will also double as the 30th anniversary of the NAACP (Northern Amateur Alumni of Cal Poly)! All are welcome!

Details will follow, but please plan for some informal activities on campus in the morning, a new Antenna Tower induction ceremony in the afternoon, and then a BBQ, t-hunt, and additional festivities in the evening. As a little warning, school starts on the 18th, so campus will be getting a little busy, but don't let that be a hindrance to coming to SLO and celebrating 65 years of amateur radio excellence at Cal Poly.

Mark your calendars! Saturday, September 15th, 2012. Details and RSVP form to follow shortly. Get excited!

Cheers,

David Troy KJ6RPX (Current Club President) kj6rpx@...
Garrett Dong KI6YML (Club Alum and Former Treasurer) ki6yml@...

392. RE: [sloecc] SLOECC Board Meeting, 8/14/2012, 9:00 am

Yahoo group: sloecc
Date: 2012-08-11 16:25:37 UTC
From: Fred Campbell
Topic: 391 Message: 392

Gentlemen:

I have received word that Denton Hyder will attend our Tuesday morning Board meeting.

He is the chief emergency communication honcho for the LDS South SLO County/North SB County Stake (I don't know his real title but that is close enough).

Based on what I observed at a meeting of their "emergency Communications group" that I attended last week in Arroyo Grande, I believe that their "informal integration" into SLOECC would be mutually beneficial.

There were about 9 members in attendance at this meeting with experience levels ranging from the (yet) unlicensed to seasoned Hams. The gross number of involved LDS Hams appears to be about 25.

Denton is very knowledgeable in the field of communications. He is a retired USCG communications officer. One of his roles as the leader of this group is training. The training session that he gave involved messaging protocols and documentation. He is an effective and knowledgeable instructor.

I suggest that we welcome him (and his group) as "comrades-in-arms". I believe that they can provide invaluable support during emergencies (as we can t them).

393. Fwd: [CPARC] W6BHZ 146.76 Repeater PL Changed to 91.5 Hz

Yahoo group: sloecc
Date: 2012-08-17 19:18:16 UTC
From: Marcel S
Topic: 393 Message: 393

QSTQSTQST

The 146.76MHz W6BHZ 2m Repeater at Cal Poly ECC16 has a *changed input PL tone to 91.5Hz*. Please note the change in your radios. The output PL remains at 127.3Hz to prevent intermod with the 147.36 machine on Mt Lowe.

Questions can be directed to ki6qdj@.... See email below for additional details.

Thanks,

-Marcel AI6MS
ECC16 Cal Poly

---------- Forwarded message ----------
From: William Blodgett <wnb1997@...>
Date: Fri, Aug 17, 2012 at 12:07 PM
Subject: [CPARC] W6BHZ 146.76 Repeater PL Changed to 91.5 Hz
To: Cal Poly Radio Club <calpolyradioclub@...>

All,

The W6BHZ 146.76 repeater input PL tone has been changed to 91.5 Hz.

To access the VHF repeater, you will need to update your radio memory channels programed with 146.76.

The VHF output PL is still 127.3, so you'll need to set up a split PL if you wish to use tone squelch and your radio allows it. If your radio does not do split PL, you will need to disable tone squelch.

The UHF (442.3) repeater input and output PL's are both still 127.3 so you can still access the repeater on that frequency without changing anything.

If you need any help with radio programming, see one of the club officers.

We made this change to alleviate our Mt. Lowe intermod problem and it was successful. The intermod signal still exists, but it no longer keeps the repeater keyed up with noise. The signal may interfere with weaker stations transmitting on 2M. With some testing I've done, it seems this may not be much of a problem. Our several years of hard work may have finally paid off!

Bill

394. Cal Poly W6BHZ 65th Anniversary Celebration on Sept 15 in San Luis Obispo - RSVP

Yahoo group: sloecc
Date: 2012-08-20 07:52:15 UTC
From: Marcel S
Topic: 394 Message: 394

Hello W6BHZ Members, Alumni, Supporters, Community Members, and Friends!

Coming up on September 15, 2012 the Cal Poly Amateur Radio Club will be hosting the 65th Anniversary of W6BHZ on the Cal Poly campus and you are invited. This event will also celebrate the 30th anniversary of the NAACP (Northern Amateur Alumni of Cal Poly). Please be sure to RSVP HERE<https://docs.google.com/spreadsheet/viewform?formkey=dDgwUGxmT1lLZ2ZRWU9UV2wyR2VSc1E6MQ#gid=0>
by August 31st so we can prepare the festivities.

Some more details:

Saturday Morning - Shack Tours and WOW Club Showcase @ Cal Poly
The club shack will be open for tours to check out how things have changed since you were here and hop on the air on the club station. Plus WOW Club Showcase should be happening in the H16 lot so you can see what the rest of the campus clubs are up to.

*3pm on Saturday - **New Antenna Tower induction Ceremony** @ The W6BHZ Shack*
The new tower dedication ceremony will take place at about 3:00 pm in the Shack courtyard (marked in red, on this map<http://www.w6bhz.org/sites/default/files/shackymap.jpg>
). We'll have people around the Shack throughout the morning and afternoon, so feel free to stop by. We'll be sending out maps closer to the event to help you find the optimal parking lots.

5pm on Saturday - Anniversary BBQ @ Santa Rosa Park
We'll be holding the BBQ off campus at Santa Rosa Park (Location shown on this Google Maps link<https://maps.google.com/maps?q=Santa+Rosa+Park,+San+Luis+Obispo,+CA&hl=en&ll=35.28975,-120.664902&spn=0.003957,0.003449&sll=10.61166,-61.297842&sspn=0.006738,0.006899&oq=santa+rosa+park+san+&t=h&hq=Santa+Rosa+Park,+San+Luis+Obispo,+CA&z=18>
). We'll be firing up the grill at 5:00 PM and eating around 6:00 PM. There will be mini T-hunts and a portable HF station for some DXing.

Please RSVP HERE<https://docs.google.com/spreadsheet/viewform?formkey=dDgwUGxmT1lLZ2ZRWU9UV2wyR2VSc1E6MQ#gid=0>
by
August 31st so that we can get a head count for food. If you have any questions, please feel free to contact any of us directly or just email the club at calpolyradioclub@....

We look forward to seeing you there!

73,

David Troy KJ6RPX (Current Club President) kj6rpx@...

Cal Poly Amateur Radio Club Antenna Tower Induction Ceremony on Saturday, Sept 15th

*
*

SAN LUIS OBISPO –The Cal Poly Amateur Radio Club (CPARC) is holding a ribbon-cutting ceremony on Saturday, September 15th, 2012 at 3pm to unveil their new 72-foot antenna tower. Please join us at the Electrical Engineering Building 20 on the Cal Poly Campus. Directions can be found by going to the Shack at w6bhz.org/meetings.

The new tower is the result of over $30,000 of support from industry, individuals, and alumni. This TX-472MDPL 72-foot telescoping antenna tower was donated by the US Tower Corporation with additional support for equipment and materials from Ham Radio Outlet. Through the generous donation of antennas from Robert Ferrero W6KR, financial support from Joe Cardoza KJ6TPW and Barry Soben K6BRS, and a $10,000 grant from the Peterson Charitable Remainder Unitrust, CPARC was able to make the dream for a new tower a reality.

Electrical Engineering Department Chair, Dr. Dennis Derickson AC0P, was also instrumental in supporting the project from its earliest planning stages. A special recognition must go to Dr. Bill Kellogg, Department Head of Agricultural Education and Communication, for his tremendous assistance with all the technical aspects of the project including support from Bob's Crane Service and a concrete donation from CalPortland. Thanks to the generosity of many, the new antenna tower will provide state of the art communications infrastructure that will allow world-wide communications for the campus.

The club was founded in 1947 and the Founding Advisor, Dr. Harry Wolf W6NKT, will be joining us for the ceremony. At 103 years old, Dr. Wolf is one of the oldest active amateur radio operators in the world! The Amateur Radio Club will also be receiving national-recognition as a Special Service Club by the American Radio Relay League (ARRL). Santa Barbara Section Manager, Robert Griffin K6YR, will be presenting the award at this ceremony. The tower is being dedicated in memory of George Varvitsiotes K6SV (1954-2012) who was the initial driving force in making the project possible.

The Cal Poly Amateur Radio Club has a long tradition of communications service on campus and in the community of San Luis Obispo. The club maintains Emergency Communications Station No.16 on the Cal Poly Campus for San Luis Obispo County which is fully equipped with emergency power and radio equipment to support various public safety agencies in the event of a disaster. The club also supports other, non-emergency events such as bicycle races, triathlons, and parades. For more information about the club please visit www.w6bhz.org or send an email to calpolyradioclub@....

Note to Editors: Reporters, photographers, and television crews are invited to cover this event. Please contact Marcel Stieber if you plan to attend: mstieber@....

399. Using Your Repeaters on September 29, for SLOBC Lighthouse Century

Yahoo group: sloecc
Date: 2012-09-18 00:21:59 UTC
From: Shaun Koide
Topic: 399 Message: 399

To SLOECC,

SLOBC and the Cal Poly Amateur Radio Club will be helping to provide communications for the SLOBC Lighthouse Century bike ride that will take place during September 29th. It will last from about 5 AM to 6 PM. We'd like to use two of your repeaters (146.860 and 146.670) during those times. If this information can be passed onto anyone that would be appropriate, I'd really appreciate it.

I'm CPARC's events coordinator for the Fall so if you have any questions, comments or concerns, let me know. My phone number is (808)651-1929 and email is shaun.koide@...

Thanks,

Shaun Koide, KH6EI
Vice President 2012-2013
Cal Poly Amateur Radio Club

Topic: 399 Message: 400

Hi Shaun,

Just a thought since it's been a few years since I did the event. I recall the ride goes up the coast quite a ways (cambria?) You may need coverage from Rocky Butte to cover north of Cayucos. Rocky is the 146.620 machine and can be heard down to cuesta college. The 146.860 machine is a low level machine in Los Osos. 146.670 on Tass gets rough north of Cayucos.

As a side note, the Tass and Rocky UHF machines (444.050 & 444.100) are linked full time and may make coordination easier as everyone can hear most traffic.

73,
John, KK6DJ

403. Cal Poly Ham Cram and Test Session - This Sunday, Oct 7th

Yahoo group: sloecc
Date: 2012-10-03 07:49:40 UTC
From: Marcel S
Topic: 403 Message: 403

Hello SLOECC,

Please see the email about the upcoming test session this weekend. Sorry for the short notice, hopefully this will help some people get their licenses or upgrade. Details on our club website at w6bhz.org.

Feel free to email me with any questions.

73,

-Marcel Stieber, AI6MS*

From: Neal & Ardella Swanberg
Topic: 404 Message: 404

This is a little short notice, but if you are ready to get your ham license or upgrade, here is the chance this Sunday.

The Cal Poly Amateur Radio Club does a test session every quarter. The exact dates are set a few weeks before the test, so check their website when you are ready to test/upgrade.

410. Cal Poly Equipment Sale

Yahoo group: sloecc
Date: 2012-11-29 01:33:03 UTC
From: Marcel S
Topic: 410 Message: 410

Hi SLOECC,

In case you weren't aware, the Cal Poly ARC has had an ongoing gear sale for the last year or so. We had a large amount of donations over the past 2 years, not all of which are usable by the club in the shack so it gets sold to the community to benefit the club.

Local hams and supporters can get this stuff for ridiculously cheap, so don't mind the prices listed there. If you are interested in anything, please email me asap so we can work something out and get you your presents in time for Christmas!

Here's the posting:
https://docs.google.com/document/pub?id=1zbcYKA32dgG0W4NKqVvLtGZUI7iBhgUXLPINpW8Sj0Y
Also on craigslist here: http://slo.craigslist.org/ele/3288001724.html

Happy shopping and 73

444. HSMM-MESH

Yahoo group: sloecc
Date: 2013-05-30 17:00:22 UTC
From: thesysop
Topic: 444 Message: 444

Hi All,

Has anyone considered starting a HSMM-MESH net around here? I have. With a Mesh net you have transfer speeds of up to 54mbs instead of 1200-9600 baud. It's very cheap to get into:

1) Used Linksys router (reprogrammed with free software)
2) Some high quality coax
3) External antenna: I've seen directional ones from China for $7.00.

If we put a node on Cuesta, the whole county could link up. Applications can include(but not limited to), IRC, VOIP, email, ETC!

Check it out: http://hsmm-mesh.org/

73,
Jim

Topic: 444 Message: 446

Thanks Phil for your response,

I want to start finding the used Linksys routers and start tinkering with it. There is a list of the ones that will work with their software on the web site. Some are saying you can pick them up at Goodwill sometimes for $5 or $10. I will probably start looking on my vacation next week. I have a friend that wants to give me an old one he has plus he has a 2.4ghz antenna he will give me also. There is a learning curve, I will have to become a computer nerd again. I use to run a web server & BBS at my house MANY years ago.

Keep in touch, it may take me a awhile with all the stuff in life but I want to do it in my 'spare' time.

73,
Jim

SLOECC / Estero ARC General Meeting
Wednesday June 26, 2013
7:00 pm - 9:00 pm
(GMT-08.00) Pacific Time (US & Canada)
Location: San Luis Obispo Sheriff's Auditorium, 1585 Kansas Ave., San Luis Obispo, CA 93405

Notes:
Kansas Avenue T-junctions (from south) into Highway 1, at the first signal west of the entrance to the California Men's Colony (one mile). Drive almost to the end of the road. The EOC and the auditorium are the last buildings on the south side of the road. Look for Flag pole and other hams in the parking lot.

454. Kenwood tk 2140's

Yahoo group: sloecc
Date: 2013-06-28 00:25:55 UTC
From: Shane Faulkenberry
Topic: 450 Message: 454

For anyone who is interested I have a friend in Anaheim hills who just got a bunch of VHF kenwood 2140's from Las Vegas metro pd, it's the radio, antenna, belt clip, rapid charger, and speaker mic all for 175, these are very nice radios in great clean condition.

455. Re: HSMM-MESH

Yahoo group: sloecc
Date: 2013-07-03 02:01:31 UTC
From: kennethfinnegan2007
Topic: 444 Message: 455

SLOECC,

I've been mulling this over for the last month, and I really like the idea of a higher speed digital network around SLO county. Some of us here at Cal Poly have been playing with APRS and Winlink quite a bit, and been hitting many of the limitations of those systems.

Looking real hard at the HSMM project, I'm a little concerned that they've hidden a few more knobs and tried to make it more simple than I like. It should be fairly straight forward to take devices running vanilla OpenWRT and write our own configuration files for exactly what we want for SLOECC and never have to deal with the HSMM-MESH distro.

I've got enough OpenWRT devices in my personal collection laying around my apartment that I've started playing with the underlying protocols HSMM is built on, and have already had some success in my mock-ups around my apartment.

Before I put too much more time into poking at this project, I'd like to see SLOECC brainstorm what we would want to do with a 1-10Mb data link between the ECCs and other participating nodes:
* Do we only use it to upgrade the Winlink system?
* Do we have a single server providing network services for the county? Do we set this server up in SLO EOC? Is there a better place with hardened power for such a server?
* Do we only provide internal services for the ECCs, or do we advertise default routes on nodes with Internet connections? I've been told that our sat link is billed by the byte, which means we'd want it to have a high metric, but I'm unsure if we could count on cheaper gateways being retracted when they disappear due to infrastructure failure.

From some centralized server, what services would be useful for SLOECC-MESH?
- HTTP intranet web server? With wiki, CAD, etc?
- Samba/FTP file sharing?
- More sophisticated file sharing protocols such as BitTorrent Sync?
- IRC chatrooms?
- SIP VoIP?

I've had quite a bit of difficulty during my prototyping to get mesh encryption working and actually being secure. WEP works, but is a broken protocol. WPA-NONE seems possible, but I just haven't found all the switches needed to get that working. This then raises the question of whether SLOECC is willing to have ECC traffic move around SLO county using frequencies and protocols where Joe Schmuck can read it? Is this project a non-starter until encryption works, or do we even use encryption at all to make it easier to add additional nodes to the mesh?

Hi Kenneth,

I have 2 HSMM mesh nodes up and running and I have Ham Chat running on one them. I am in the experimenting stage right now. I plan on putting out a quick video in a couple of weeks for those who have very little experience with routers. The good part about being part of HSMM is that it's becoming more common nationwide. So if someone is driving through they can connect without knowing anything about the local network. I personally am not as worried about security at this point or if the 'served' agencies want to use it. I am sure future firmware updates will include many more options in regards to that. I'm planning on setting up external directional antennas and maybe a couple of small bi-directional amps. Step three for me will be to build a web server for the mesh. As you know with a web server you can serve any kind of applications that you desire and within those aps set whatever security you would like.

With that all said, maybe others prefer to take it all in another direction which would be fine by me if it works for them. Thanks for your thoughtful post in exploring the possibilities.

Jim

459. [Press Release] Cal Poly Students Respond to County-Wide Power Outage

Yahoo group: sloecc
Date: 2013-07-09 06:45:08 UTC
From: Kenneth Finnegan
Topic: 459 Message: 459
Attachments: 1 described; binary payloads are missing from this source WARC

Greetings,

Please find the attached press release from the Cal Poly Amateur Radio Club regarding the San Luis Obispo county amateur radio response to the power outage in San Luis Obispo county, California on 23 June 2013.

--
Kenneth Finnegan
CPARC Officer, Projects Manager
http://blog.thelifeofkenneth.com/

July 8th, 2013
FOR IMMEDIATE RELEASE
For information, contact:
Kenneth Finnegan, W6KWF
(408) 663-3324, kwfinneg@...

Cal Poly Students Respond to County-Wide Power Outage

SAN LUIS OBISPO, CALIFORNIA - On the evening of Sunday, June 23rd, 2013, over 145,000 customers in San Luis Obispo County experienced a major power-outage that was caused by equipment failure at a PG&E substation. Several Cal Poly students and alumni from the Cal Poly Amateur Radio Club (CPARC, callsign: W6BHZ) mobilized to assist in the amateur radio response to the outage. This response consisted of collecting information from remote stations as to their current status, and broadcasting information obtained by net control from official channels.

CPARC demonstrated the importance of amateur radio emergency communications support in a professional and timely manner, providing the most current first-hand reports to the community. At least one public radio station, KPYG-FM [1], reportedly lost power and was unable to provide the public with emergency updates regarding the power outage. Several community residents also noted that “we have no local radio news stations reporting” [2] and that there was just “‘canned’ programming” [2] but no actual emergency updates. Fortunately, some residents have radio scanners and were listening to the radio net managed by CPARC on 146.67MHz quoted having “always been my source for independent reports of accounts throughout the county” and “providing the most updates” [2]. These statements all reinforce the need for more effective emergency response from the local news agencies and emphasize the necessity for a well developed amateur radio communications network such as the one supported in San Luis

Obispo County (www.sloecc.org).

San Luis Obispo county maintains several emergency communication centers throughout the county, including ECC-16 located on the Cal Poly campus and operated by the Cal Poly Amateur Radio Club in the Electrical Engineering Building, Room 123. In addition to both short and long range radios, ECC-16 equipment includes emergency backup batteries and generator power to ensure that communication equipment and room lighting are kept online during any event which includes power loss.

Initial reports of power outages and brownouts in San Luis Obispo occurred at 2120 on the local W6BHZ club repeater (146.760MHz and 442.300MHz). Once it was ascertained that this was not a momentary glitch, a group of CPARC members started heading to campus to activate the club's radio room as ECC-16. While these operators were en-route to campus, a temporary "ECC-16 portable" was assembled from personal equipment by Marcel Stieber AI6MS and Kenneth Finnegan W6KWF near Santa Rosa Park. This allowed CPARC to quickly begin a communications net to begin collecting information as to how many amateur radio operators were available to assist and how far the power outage spread. No other ECCs had yet stepped up as net control on the county-wide SLOECC repeater (146.670MHz), so ECC-16 portable opened the county-wide net as well.

Once the generator at ECC-16 was brought online, net control was passed from "ECC-16 portable" to David Troy KJ6RPX and Chris Blackmer KJ6MNK at ECC-16 on the Cal Poly campus to continue running the city and county-wide nets.

No serious incidents were reported on the SLOECC net, but having the single channel for collecting and curating information on the power outage was likely reassuring to listeners. The PG&E Info line was quickly overloaded, and other customers began calling 911 emergency services for information on the outage [3], which demonstrates the need for this kind of information broadcasting in SLO county. If the power outage were to escalate or become protracted, there would have been great value in the SLOECC net already being active for county-wide communications. As power began to be restored to customers and any further major events appeared unlikely, the SLOECC net was closed at 2327 local time and ECC-16 deactivated.

460. Black Mtn updates

Yahoo group: sloecc
Date: 2013-07-12 18:11:09 UTC
From: kk6dj
Topic: 460 Message: 460

Just a couple of updates on Black Mtn. if you have heard the testing in the last few days.

--The 146.835 machine was getting into itself since being moved to the new transmit combiner/receiver multicoupler with the other public safety systems. An interim solution was to move its transmitter to the old VHF repeater antenna (which was to be repurposed for packet). Yesterday, I installed a new notch can on the transmitter. The transmit combiner only included a single pass can which didn't turn out to be enough. It should be working much better now, both tx and rx.

--The 444.150 seems to have more than 14dB of desense. A troubleshooting trip will happen next week to investigate more as I ran out of time at the site yesterday.

73,

John, KK6DJ

SLOECC / Estero ARC General Meeting
Wednesday July 24, 2013
7:00 pm - 9:00 pm
(GMT-08.00) Pacific Time (US & Canada)
Location: San Luis Obispo Sheriff's Auditorium, 1585 Kansas Ave., San Luis Obispo, CA 93405

Notes:
Kansas Avenue T-junctions (from south) into Highway 1, at the first signal west of the entrance to the California Men's Colony (one mile). Drive almost to the end of the road. The EOC and the auditorium are the last buildings on the south side of the road. Look for Flag pole and other hams in the parking lot.

SLOECC / Estero ARC General Meeting
Wednesday July 24, 2013
7:00 pm - 9:00 pm
(GMT-08.00) Pacific Time (US & Canada)
Location: San Luis Obispo Sheriff's Auditorium, 1585 Kansas Ave., San Luis Obispo, CA 93405

Notes:
Kansas Avenue T-junctions (from south) into Highway 1, at the first signal west of the entrance to the California Men's Colony (one mile). Drive almost to the end of the road. The EOC and the auditorium are the last buildings on the south side of the road. Look for Flag pole and other hams in the parking lot.

Correction: SLOECC / Estero ARC General Meetings reportedly do not occur in July or August. You will be sorely disappointed if you try and attend tomorrow like I was planning on doing so.

465. Cuesta Peak 442.700 out of service

Yahoo group: sloecc
Date: 2013-07-29 14:58:55 UTC
From: kk6dj
Topic: 465 Message: 465

When it rains, it pours.

During a preventative maintenance at Cuesta last week, I found the receiver on the 442.700 machine failed. I have taken it back to the shop and expect to work on it this week.

The 146.800 machine is working normally.

I will update with information as I have it.

73,

KK6DJ

470. Black Mtn 444.150 fully back in service

Yahoo group: sloecc
Date: 2013-08-09 17:09:59 UTC
From: kk6dj
Topic: 470 Message: 470

Yesterday I installed an new duplexer for the 444.150 machine at Black Mountain. The previous one was 450-470MHz, 4-can unit that didn't play well out of band. I have installed a 6-can, 440-450 unit which operates much better. The previous unit had 7dB of insertion loss and more than 8dB of desensitization.

The new duplexer has 1dB of insertions loss and no desense. The 12dB receive level at the antenna port is -121 dBm with a squelch opening at -124dBm. So much for needing a pre-amp!The transmitter is now making 60 watts to the antenna.

Additionally, the 442.700 machine at Cuesta is still out of service pending me getting time in my schedule to work on it.

73,

John, KK6DJ

John, I am unable to access Lopez and Tass UHF repeaters. I have Lopez as 443.975 + and 127.3, while Tass is 444.05 + 127.3. Are these wrong?

Thanks,
Phil

Phil:

I accessed Tass last night at 8:00 (after the net) on my BaoFeng from Nipomo.. Has a QSO with Neal Swanberg.

Just now I "broke" the 443.975 Lopez repeater with the same equipment. Seems to be working.

Jo and I went to the top of the ranch and with her 5w HT we activated all 4 backbone repeaters. WB6MIA and I had a contact through both Tassajera and Lopez. They seem to be all working. I'm having trouble getting enough power out of the HT-1000s to hit the repeaters. Will work on that.

Thanks Neal, I appreciate the testing you have done. My HT1250 is
putting out 5 watts, which should be the same as the HT1000. I might
need to get a new antenna.

Perhaps I am in a black hole of RF... :)

RF is as much a black art as a black hole. These hills can be very tricky.
At our house which is at about 650' elev., but in the hills, I need a 50'
tower to get out with 25 watts. Up at 1000', a 5 watt HT & ducky will cover
a lot of the county.
Good luck
Neal, KG6AYI

483. Re: [sloecc] Black Mtn 444.150 fully back in service

Yahoo group: sloecc
Date: 2013-08-28 16:55:12 UTC
From: Phil Ehrke
Topic: 470 Message: 483

Who should I contact to get on the North County Net list? I am
relocating from Grover Beach to Templeton and would like to participate.

Thank you,

Phil KK6PE

510. Packet installed at Black Mtn- 145.090

Yahoo group: sloecc
Date: 2013-10-31 20:49:41 UTC
From: <kk6dj@...>
Topic: 510 Message: 510

Today, Bill (KA9A), Bill (AE6EQ) and I put the 145.090 packet node at Black Mtn in service. AE6EQ confirmed connectivity with the EOC and the WinLink connection. This will allow north county ECCs as well as field stations in the eastern area of the county including California Valley system access.

73,

John, KK6DJ

Topic: 510 Message: 511

Hi John,

Thanks for another Packet node. What is the call sign and alias?

Thank you,
Jim
KA6MLE

517. Urgent: VE's needed for Cal Poly Test Session Tomorrow: Fri 11/7 10:30am-11:30am

Yahoo group: sloecc
Date: 2013-11-07 17:29:59 UTC
From: Marcel S
Topic: 517 Message: 517

Dear SLOECC VEs,

Please see if you can help the Cal Poly ARC tomorrow in their HUGE test session in the morning (over 100 students!). They need about 3-4 more VEs to just help with ID checks at the beginning of the test session. Please contact Ryan ASAP if you can help them: 707-480-7885 <+17074807885> or rmavella@....

Thank you!

-Marcel AI6MS

Subject: Cal Poly Amateur Radio Club - Test Session still looking for VE's

Hello all,

The Cal Poly Amateur Radio Club is hosting our annual test session tomorrowto license approximately 100 electrical engineer freshmen at Cal Poly.
However, we are still short on VE's. Currently we have volunteers helping from 10am-2pm. We are primarily looking for VE's to help with ID checks from 10:30am to 11:30am.

If anyone is available from 10:30am-11:30am tomorrow and would not mind lending a hand, please get a hold of me at my email below. Thanks!

Ryan Avella
Test Session Coordinator
Cal Poly Amateur Radio Club

546. Rocky Butte UHF audio fixed

Yahoo group: sloecc
Date: 2014-01-10 22:50:08 UTC
From: <kk6dj@...>
Topic: 546 Message: 546

The short story:

The hollow sound on the Rocky Butte 444.100 when using its input is fixed.

The longer story:

When audio is received from the local receiver, it is routed to the local transmitter and the audio line out. When external PTT is activated, audio from the local receiver is muted to the transmitter but not the line out. When the station is activated, COR and rx audio is sent via microwave to the Sheriff vault where it is summed with audio from the other three sites. The audio and keying is then sent to all hilltops including back to Rocky.

The problem was Rocky was not muting its local receiver audio to the tx. What we ended up with was local audio summed with its delayed audio from the network. Yuck!

Since I could not get the mute to function properly (Tass works fine) I eliminated the audio path of Rocky's audio back to itself via the microwave. Audio from the other three sites is still routed to Rocky and Rocky's local receiver routes to its transmitter.

I expect to leave it this way until we upgrade the box from a Mastr III to a Tait TB8100.

73,
John KK6DJ

616. Fwd: ARRL Field Day - Saturday, June 28, 11am at the shack! Come join the fun!

Yahoo group: sloecc
Date: 2014-06-07 22:21:05 UTC
From: Marcel S
Topic: 616 Message: 616

Hi SLOECC,

In case you'd like to check out the Cal Poly ECC-16 during Field Day, please see the email with details below. Feel free to drop by anytime. We'll be operating all 24hrs this year from ECC-16 on campus. Directions at w6bhz.org

Hope to hear you on the air!

Cheers,

-Marcel AI6MS
---------- Forwarded message ----------
From: "Marcel S" <KI6QDJ@...>

Subject: ARRL Field Day - Saturday, June 28, 11am at the shack! Come join the fun!
To: "W6BHZ Local" <calpolyradioclub@...>
Cc:

Hi everyone,

Hope you're having a good last week of the quarter before finals.

ARRL Field day is the biggest international radio event each year with thousands of amateur radio stations setting up stations around the world to operate, contest, and get the word out there about amateur radio. (See also: http://www.arrl.org/field-day) If you're in SLO for the summer or want to learn to operate the club's HF radio and antenna towers, then come experience field day at our shack on campus!

Last year, we had an amazing event hosted at the Shack on campus with over a dozen members participating. We made hundreds of contacts with dozens of different countries and almost all 50 states across most of the amateur radio bands! This year will be no different. We will operate again as a 2F station (meaning two simultaneous transmitters at an Emergency Operations Center). Any and all are welcome to attend for the event and either get on the radio and contest or help with logging the contacts. Last year we peaked at a rate of over 120 contacts per hour so you can imagine the fun!!

Details:

When: The event runs 11am Saturday, June 28 until 11am Sunday, June 29 (setup on Friday probably and on Saturday morning ~9/10am. I'll send more details to those that sign up as we get closer)

Where: at the Shack 20-123 on the Cal Poly Campus (ECC-16)

What: just bring yourself and a smile. Maybe some food/beverages to share and a pillow/blanket if you're staying for the graveyard shift. (Last year we operated 23 out of 24hrs...)

Please RSVP if you know you will attend. Sign up here: https://docs.google.com/spreadsheet/ccc?key=0AqU_mzpXJ6y-dExrZmFMbkFGNzNBTnAyaFVmeGhraHc&usp=docslist_api

For those not in SLO, I highly encourage you to find a club near you that you can go participate with. They are always looking for younger folks to help run the night shifts on the HF SSB stations. (That's where Kenneth and I met at the WVARA field day in Saratoga.) Find a site near you by using this tool: http://www.arrl.org/field-day-locator

CPARC will operate using our vanity call sign of N6CP for this contest. Feel free to try and reach us on the air during the contest.

Hope to see you there! Email me with any questions.

Cheers,

Marcel AI6MS

"SLOECC / Estero ARC General Meeting" reminder

When

Thursday, 25 September 2014

03:00 AM

to

05:00 AM

(GMT) Greenwich Mean Time - Dublin / Edinburgh / Lisbon / London

Where

San Luis Obispo Sheriff's Auditorium, 1585 Kansas Ave., San Luis Obispo, CA 93405

Notes

Kansas Avenue T-junctions (from south) into Highway 1, at the first signal west of the entrance to the California Men's Colony (one mile). Drive almost to the end of the road. The EOC and the auditorium are the last buildings on the south side of the road. Look for Flag pole and other hams in the parking lot.

682. Cal Poly Upcoming Test Sessions - VE's Needed Nov 7+8

Yahoo group: sloecc
Date: 2014-10-21 18:18:13 UTC
From: Marcel S
Topic: 682 Message: 682

Hi SLOECC and Friends!

The Cal Poly ARC needs some help at their upcoming test sessions. If you are able to help out as an ARRL VE for either their two sessions on Fri Nov 7 (midday) and/or Sat Nov 8th (afternoon) that would be greatly appreciated. Please reach out to Keenan Swafford KK6FRC < kaswaffo@...> and see the volunteer signup links and details below.

Cheers,

-Marcel AI6MS

---------- Forwarded message ----------
From: Keenan A. Swafford <kaswaffo@...>
Date: Wed, Oct 15, 2014 at 11:10 AM
Subject: [CPARC] Upcoming Test Session Announcements
To: calpolyradioclub@...

Howdy Hams!

Keenan here with some announcements regarding upcoming test sessions:

It is once again time for the annual fall Ham Cram & Exam! If you or someone you know are interested in getting or upgrading their amateur radio license, now is the perfect time! This event takes place on Saturday, November 8th and includes an overview and study of test questions on the Technician amateur radio license exam (the "Ham Cram") followed by the actual test. In short, you can get your amateur radio license in a single day! Show up at 8:30am with $25 dollars for the Ham Cram & Exam, or show up at 3:30pm with $15 if you are just taking the exam. Be sure to bring a pencil, your social security number, and two forms of ID (one must be a government issued photo ID).

If I've sold you on this great opportunity, follow this link to register for the event: http://goo.gl/forms/zBXZc5Q4el

Alternatively, if you'd like to give back to CPARC we are in need of volunteers for both the above mentioned test session as well as the EE111 test session taking place on Friday, November 7th. This is a full technician amateur radio licence test session like the Ham Cram & Exam, only larger! We are in need of 15 VEs for the EE111 test session and 10 VEs for the Ham Cram & Exam. You can still help at either event even if you are not a VE or you do not have a license, so don't be shy! We greatly appreciate all of your help in advance.

Sat Nov 8 - Ham Cram & Exam Volunteer Signup Link:
http://goo.gl/forms/1T9GPkI3Sx

Fri Nov 7 @ 11am- EE111 Test Session Volunteer Signup Link:
http://goo.gl/forms/ykp1ylZ9or

Thanks,
Keenan Swafford KK6FRC

From: Marcel S
Topic: 705 Message: 706

I personally prefer the Baofeng UV-5R radio series, I own 3 Baofengs. They are only ~$30/each for an FT-60R equivalent radio:
http://smile.amazon.com/Baofeng-UV5R-136-174-400-480-Dual-Band/dp/B007H4VT7A
They all use the Kenwood speaker mic and programming interface. Easily programmed via CHIRP or similar programs. The Cal Poly ARC has a standardized programming file for its loaner radios that we use via CHIRP.

To quote my friend, "everyone should own at least one cheap Chinese HT (like the PX-888 or UV-5R), but everyone should also have a real radio as a backup."

73,

-Marcel AI6MS

708. Thesis Defense on APRS

Yahoo group: sloecc
Date: 2014-12-08 21:03:37 UTC
From: Kenneth Finnegan
Topic: 708 Message: 708

Gentlemen,

Anyone interested is welcome in attending the defense of my thesis this Friday.

Kenneth Finnegan Thesis Defense
Friday, December 12
9:10 a.m.
EE Conference Room - 20A-206

Title:
Examining Ambiguities in the Automatic Packet Reporting System

Abstract:
The Automatic Packet Reporting System (APRS) is an amateur radio packet network that has evolved over the last several decades in tandem with, and then arguably beyond, the lifetime of other VHF/UHF amateur packet networks, to the point where it is one of very few packet networks left on the amateur VHF/UHF bands. This is proving to be problematic due to the loss of institutional knowledge as older amateur radio operators who designed and built APRS and other AX.25-based packet networks abandon the hobby or pass away. The purpose of this document is to collect and curate a sufficient body of knowledge to ensure the continued usefulness of the APRS network, and re-examining the engineering decisions made during the network's evolution to look for possible improvements and identify deficiencies in documentation of the existing network.

A draft copy of my written report is available here:

729. Technician License Class

Yahoo group: sloecc
Date: 2015-01-20 22:51:31 UTC
From: w6rox@...
Topic: 729 Message: 729

It's not too late to sign up for the Technician License Class.
See the post below for all the information.
Class starts tomorrow.

Wednesday Evenings
January 21st through February 25th
6:30-8:30 PM

At the First Presbyterian Church, Templeton
Corner of 6th St. and Crocker St.
Templeton

This class will prepare you to take the Technician Test. There will be six class sessions with one additional class for review if the group feels it is needed. The class will include Power Point presentations, discussions, and hands-on activities. The test date will be determined by the class. There is $15.00 fee to take the FCC licensing exam.

Reference book will be the Gordon West Technician Class Manual. Online resources include Ham Academy (http://ah0a.org/HA7/index.html http://ah0a.org/HA7/index.html) and Ham Exam (http://hamexam.org http://hamexam.org).

For More information or to register for the class contact:

734. Fwd: [Bulk] [CPARC] Fwd: Electronics Store in Santa Maria

Yahoo group: sloecc
Date: 2015-01-30 20:47:42 UTC
From: Ron Patterson
Topic: 734 Message: 734

-------- Forwarded Message --------
Subject: [Bulk] [CPARC] Fwd: Electronics Store in Santa Maria
Date: Fri, 30 Jan 2015 11:57:21 -0800
From: Sean O'Brien <sean@...>
To: W6BHZ Local <calpolyradioclub@...>

CPARC,

I wanted to pass along info about the relocation of the former Electronic Parts Supermart in Santa Maria. Bonnie had retired and sold the business off late last year in October. Here is info about the new location and owner. It is nice that we still have a place in this area to go to when you need electronics parts and materials for projects.

*Subject: *Electronic Parts Store

All,

I am very pleased to pass along some good news for the Amateur Radio community: The Electronic Parts Store is now open for business at 1403 South Broadway in Santa Maria, next-door to the JC Penney store. The new owner, Miguel Sanchez, has acquired the stock of the now-closed Electronic Parts Supermart on Blosser Road.

While in Santa Maria on business, I stopped in at the new store and picked up some heat-shrink tubing while chatting with the same fellow who used to work at the old store. The current plan is to be open 9 to 6, Monday through Saturday. Sunday operation has yet to be determined. The phone number remains 925-8604.

743. W6BHZ needs some Rohn 25G Tower Sections...can you help?

Yahoo group: sloecc
Date: 2015-02-17 07:31:03 UTC
From: Marcel S
Topic: 743 Message: 743

Calling all hams!

Do you have spare tower sections laying around in your backyard? Know someone who does? Maybe you can help!

W6BHZ (aka CPARC) is looking for 2-4 sections of Rohn 25G tower section that we can have/borrow for the Wildflower Triathlon in May this year for our temporary radio sites. If you have any Rohn 25G sections available, please contact me at your earliest convenience.

Rohn 25G tower section details here: http://www.rohnnet.com/rohn-25g-tower

Details about donations to the club here: http://w6bhz.org/content/donate

Thanks!

I've got 60' of lattice tower in two 30' sections that can be joined or used separately.
See photos. I forgot what brand and model they are, but can get that later.
I started fabricating base hinges, but they still need some work
They are available for donation to CPARC.
Will deliver

This appears to be a Universal freestanding tower. The top two sections are 13 1/4" triangles, the middle two sections are 17" triangles and the bottom two sections are 20 3/4" triangles.
It's aluminum so would be lighter to handle than the Rohn steel towers.
I'd feel more comfortable using guys rather than freestanding especially for a temporary set up.

Let me know where to deliver it.

748. Cal Poly Test Session this Saturday - Feb 21st at 9:30am!

Yahoo group: sloecc
Date: 2015-02-18 08:27:55 UTC
From: Marcel S
Topic: 748 Message: 748

CPARC here with some announcements regarding our upcoming test session:

On Saturday February 21st, we are holding our Winter Quarter amateur radio licensing session. Show up to the Cal Poly campus, Building 20 Room 126, at 9:30am with $15 and be sure to bring a pencil, your social security number, and two forms of ID (one must be a government issued photo ID). Tech, Extra, and General exams will be offered.

Follow this link to register for the event: http://goo.gl/forms/RgXc7Lzsht

Alternatively, if you'd like to give back to CPARC we are in need of VEs for the above mentioned test session. We greatly appreciate all of your help in advance.

Exam Volunteer Signup Link: http://goo.gl/forms/3uD8Hlt0tG

Hi Again!

The San Luis Obispo Bike Club is hosting their annual Wildflower Century Bike Ride and they need ham volunteers! If you haven't signed up already, you should! The event will be on Saturday, April 25th. There is a mandatory meeting Thursday, April 23rd, at the San Luis Obispo County Library in downtown. If you cannot make this meeting, let us know, and we'll relay the important information to you. To volunteer, click the link below and fill out the form!

https://docs.google.com/forms/d/1ZLaSj9sG6CVu4XABZhcgsOZZceiw-0Fh74opO16soDc/viewform?c=0&w=1

See you at the event!

Stanton Wu - KK6AEE
Vice President of the Cal Poly Amateur Radio Club
(510)-610-8028

766. Ham Support for Eroica Bike Ride

Yahoo group: sloecc
Date: 2015-03-30 17:22:41 UTC
From: w6rox@...
Topic: 766 Message: 766

The Eroica Bike Ride folks are looking for six hams to provide support for their bike ride on Sunday, April 12th.There is a need for 2 rest stop people, 3 sag wagon people and one person as net control at the start/finish line in Paso City Park. We would be starting around 7:30 am and be done around 2:00. This ride supports Hospice SLO a nonprofit all volunteer hospice group in the county.
This is an international event and it is the first time the event has been held in the U.S.
Riders must ribe bikes built in 1987 or earlier and must wear vintage clothing.
Please consider helping with this event.

Please call me at 238-0107 if you would like to participate. It will be a fun time and a chance to exercise your ham skills and equipment.

Thanks,
Mary

W6ROX

767. Fwd: [CPARC] Wildflower Century Sign Up!

Date: 2015-03-30 21:43:17 UTC
From: Marcel S
Topic: 767 Message: 767

Howdy Howdy!

It's almost April, which means it's almost time for 2015's Wildflower Century! The San Luis Obispo Bike Club is hosting their annual Wildflower Century Bike Ride and they need volunteers! Everyone is welcome to volunteer! If you have an amateur radio license, even better! The club will provide the necessary radio equipment. No prior experience is necessary.

The event will be on Saturday, April 25th. There is a meeting at 7:00 pm Thursday, April 23rd, at the San Luis Obispo County Library in downtown. If you cannot make this meeting, let us know, and we'll relay the important information (and free t-shirt!) to you. To volunteer, click the link below and fill out the form!

Sign up Here!
https://docs.google.com/forms/d/1ZLaSj9sG6CVu4XABZhcgsOZZceiw-0Fh74opO16soDc/viewform?c=0&w=1

See you at the event!

Stanton Wu - KK6AEE
Vice President of the Cal Poly Amateur Radio Club
(510)-610-8028

770. Wildflower Triathlon 2015 Communications Crew - Volunteers wanted!

Yahoo group: sloecc
Date: 2015-04-06 05:52:44 UTC
From: Marcel S
Topic: 770 Message: 770

Hello San Luis Obispo County Amateur Radio Operators!

Please see email below about volunteering with the Cal Poly ARC (ECC16) for the Wildflower Triathlon from May 1-3. Please forward to your respective ECC members and friends as necessary.

Thanks and 73,

-Marcel AI6MS

****

Do you have your amateur radio license? Want to actually use it? Interested in what it takes to support communications for a large event?

Then JOIN <https://docs.google.com/forms/d/1SQDyTrRD2UWDWM0pNPPIW6erwWQVPR0F2hUWdgz3AKU/viewform> the Wildflower 2015 Communications Crew!! *

*About**:* The Wildflower Triathlon is known for bringing tens of thousands of spectators, volunteers, and athletes every year! It's a whole city built over night. That's where you come in! Communications is the most important part of Wildflower Triathlons; without it, there would be no race. For over 20 years, the Cal Poly ARC (W6BHZ) and the Communications Crew have been providing all emergency medical dispatching, keeping the aid stations running, giving live race standing updates, providing athlete support on the course, and a lot more!

Who can volunteer with Communications?: *ANYONE*! While we especially encourage students and licensed amateur radio operators to help out, we welcome anyone with an interest in communications to come join us. This includes students, alumni, staff, faculty, community members, and more!

When: Wildflower Triathlon is *Friday-Sunday, May 1st-3rd, 2015* (arrive before 8pm Friday night)

Where: Lake San Antonio (near Paso Robles)

Food: *Food will be provided*, but if you have specific dietary restrictions, it's advised to bring your own food just in case.

Camping: Most people bring tents and camp, but RVs are also welcome.

Transportation: Carpool rides are always available from San Luis Obispo.

*Sign ups <https://docs.google.com/forms/d/1SQDyTrRD2UWDWM0pNPPIW6erwWQVPR0F2hUWdgz3AKU/viewform> will

close next Friday, April 10th.* *Please sign up ASAP. **Positions
<https://drive.google.com/file/d/1L88AlLRex-UsVq3E7sSc4hszaqlXQcusbze48jPzcQFxYWsIRHJadf9Od5--/view?usp=sharing>
**are
first come, first served.*

*Wildflower Communications Crew is a separate volunteering group from the
generic Cal Poly Wildflower volunteers.

Join us for a fun and exciting weekend. It's guaranteed to be entertaining!

Please let me know if you have any questions! :)

Have a great weekend,

Arianne Olarig KK6QFQ

786. Fwd: [CPARC] Spring Test Session

Yahoo group: sloecc
Date: 2015-05-08 23:02:52 UTC
From: Marcel S
Topic: 786 Message: 786

---------- Forwarded message ----------
From: "Keenan A. Swafford" <kaswaffo@...>
Date: May 9, 2015 12:13 AM
Subject: [CPARC] Spring Test Session
To: <calpolyradioclub@...>
Cc:

Greetings, Hams!

Keenan here with some announcements regarding upcoming events:

On May 16th we are holding an amateur radio licensing session. Show up to the Cal Poly campus, Building 20 Room 126, at 9:30am with $15 and be sure to bring a pencil, your social security number, and two forms of ID (one must be a government issued photo ID).

Follow this link to register for the event: http://goo.gl/forms/BL1rHFRtzY

Alternatively, if you'd like to give back to CPARC we are in need of VEs for the above mentioned test session. We greatly appreciate all of your help in advance.

Exam Volunteer Signup Link: http://goo.gl/forms/tc8xTfZzQw

Thanks,
Keenan Swafford KK6FRC

Just a little correction:

This month's meeting will be in Oceano at the Sheriff's Station, 1681 Front St., Oceano. The subject will be "Antennas" by Tom Schiller.

7:00 pm, Wednesday, May 27.

See you there,
Neal Swanberg, KG6AYI
Secretary, SLOECC & ERC

828. Battery Back up - Contingency Back up Frequencies

Yahoo group: sloecc
Date: 2015-09-01 14:51:37 UTC
From: James Smith
Topic: 828 Message: 828

I'm curious about how many of our ARES net repeaters have battery back up? Do we have simplex frequencies chosen for all of our ECC areas if repeaters are not available? We can of course use 146.52 as a default in Ham Radio. Just thinking.

829. Re: [sloecc] Battery Back up - Contingency Back up Frequencies

Yahoo group: sloecc
Date: 2015-09-01 16:27:46 UTC
From: John
Topic: 828 Message: 829

The primary, high level repeaters on UHF and VHF located in County facilities have backup batteries and on-site generators.

Those repeaters are:
146.620 Rocky Butte
146.670 Tassajera
146.800 Cuesta Peak
146.940 Lopez Hill
146.835 Black Mtn.
443.975 Lopez Hill
444.050 Tassajera
444.100 Rocky Butte
444.150 Black Mtn.

442.700 Cuesta Peak
Additionally, Cambria 147.270 is battery backed up with on-site standby generator.
Those are the only repeaters of which I have direct knowledge.
73,
John, KK6DJ

Subject: [sloecc] Battery Back up - Contingency Back up Frequencies

I'm curious about how many of our ARES net repeaters have battery back up? Do we have simplex frequencies chosen for all of our ECC areas if repeaters are not available? We can of course use 146.52 as a default in Ham Radio. Just thinking.

I have direct knowledge that

147.36 W6FM +600 KHz 127.3 Hz Mt. Lowe SLOECC

has battery backup and onsite generation. It is
colocated with county and state communications resources.

from sloradio.net:

Ares/Races/SLOECC Tuesday Night Net Repeater and Simplex Frequencies
The SLOECC Tues. Night check-in frequency is shown below for the individual Emergency Control Centers (ECC) which is usually simplex for most of the stations or repeater for areas where simplex is not practical. These stations check in from 1900 to 1930. The main SLOECC net starts at 1945 on Tues. nights with a request for QST's and QSO's. The net control then requests the number of check-ins from each of the ECC's. After each ECC is interrogated, then a request is made for individual check-ins from that area. The Net Control operates from the 146.670 repeater with a minus offset and a P/L of 127.3 Hz.

Primary simplex (P) or Secondary (S).
ECC01 - San Luis Obispo County main ECC at the Sheriff's Station P = 146.520, S = 147.500
ECC02 - South County, Oceano Fire Station P = 146.580, S = 147.530
ECC03 - Atascadero Fire Dept. P = 147.470, S = 147.530
ECC04 - Grover Beach Fire Station P = 146.580, S = 147.530
ECC05 - Morro Bay Community Center P = 147.530 and 146.86 (-) 127.3, S = 147.470
ECC06 - Paso Robles Fire Station P = 146.550, S = 147.530
ECC07 - Cuesta College P = 146.580, S = 147.530
ECC08 - San Luis Obispo Fire Station No. 1 P = 147.560, S = 146.430
ECC09 - San Luis Obispo County Red Cross P = 147.440
ECC10 - SLO County CDF/USFS P = 146.460
ECC11 - Los Osos Fire Station P = 146.86 (-) 127.3 Clark Valley , S = 146.400
ECC12 - Cambria Fire Station P = 146.580 S = 147.410
ECC16 - Cal Poly Amateur Radio Club P = 146.490
The primary simplex frequency is used only on the first Tues. of each month.

Net check-in is made for South County residents on the 146.700 repeater at all other times. This repeater has a minus offset and a P/L of 127.3 Hz.

856. Fwd: [CCCMB] Fwd: West Cuesta Road Closure

Yahoo group: sloecc
Date: 2015-11-03 19:04:27 UTC
From: Marcel S
Topic: 856 Message: 856
Attachments: 2 described; binary payloads are missing from this source WARC

FYI, for anyone that needs motorized vehicle access to Cuesta or Tassajara Peak Radio Sites until Oct 2016. Not the road closure documents attached.

"Los Padres National Forest officials announced that West Cuesta Ridge Road (a.k.a. TV Tower Road) will be temporarily closed to motorized vehicles until road repairs are completed. Forest Order 15-12 is effective from November 1, 2015, through October 31, 2016, unless rescinded earlier upon completion of road repairs."

"The closure order for public motorized vehicle use is needed until repairs to the road are completed and the area is safe for vehicle use. Forest officials are working with communication site lease holders to conduct environmental planning and a road repair plan to reestablish safe motorized access along this popular road in San Luis Obispo County."

Regards,

-Marcel AI6MS

Board Meeting reminder
When: Tuesday, 10 November 2015 09:00 AM to 10:00 AM
(GMT-08:00) Pacific Time (US & Canada)

Where: Joint Information Center

Notes: 1133 Kansas Avenue.
San Luis Obispo
Exit Hwy. 1 onto Kansas Avenue. Continue on Kansas Ave until it begins to turn to the right toward the jail. The Joint informatin Center will be on the left just as you begin your right turn. It is the portable building in the rear.

FYI:

FCC Not Processing License and Exam Session Files Again

The FCC Universal Licensing System (*ULS* <http://wireless.fcc.gov/uls/index.htm?job=home>) electronic batch filing (*EBF* <http://wireless.fcc.gov/uls/index.htm?job=about_ebf>) system was working for a brief window of time yesterday after being down since Friday November 13. Some files were processed through the system Wednesday, but the FCC is having a problem processing all VEC license and examination session files today. ARRL VEC Manager Maria Somma, AB1FM, said her office again had to alert the FCC IT staff, which are said to be looking into the issue but did not estimate how long the system would be down. Somma said it was the third time the EBF system has gone down since late September, when the FCC said a process had stopped running on an FCC server.
The FCC doesn't have a long term fix in place yet and it appears the same issue is happening again with more frequency. The amateur community should expect delays in exam license processing until the FCC can get this resolved. The FCC apologies for the continued inconvenience this is causing the community. "We transmit the exam sessions to FCC as soon as possible, which is usually 24 to 48 hours from the day received in our office," Somma said. "We make every effort to process each session quickly and efficiently while following FCC rules. Unless there is missing candidate information or paperwork, we normally aim to send the session to the FCC within a few days, because most of the VEC staff understands what it feels like to wait for your call sign to be issued." Somma expressed the hope that applicants and VEs will be understanding and patient while the FCC resolves the problem.

Amateur Radio Parity Act Passes Senate Committee, Gains Cosponsors

The Amateur Radio Parity Act S. 1685 took an essential step forward on November 18, when the US Senate Committee on Commerce, Science, and Transportation voted to report the bill favorably and without amendment. It was one of a half-dozen bills that were approved by the committee in a brief markup session. S. 1685 was approved on a voice vote, with two Senators -- Bill Nelson (D-FL) and Brian Schatz (D-HI) -- asked to be

recorded as voting "no."

"Our work is not finished on the Senate side of Capitol Hill, although this is a huge step forward," said ARRL President Kay Craigie, N3KN. She urged ARRL members to continue to write, call and e-mail their Senators about S. 1685 to build up its support for the future, saying, "We know that members' response to the call for a communications blast last week made all the difference for some Senators on the committee."

S. 1685 picked up another Senate cosponsor on November 18, when Senator Jerry Moran (R-KS), who sits on the Commerce Committee, signed aboard the bill. "ARRL members in Kansas should contact his office to say thanks," President Craigie said. "Having an additional cosponsor who's on the Committee is especially good news."

On hand to observe the Committee mark-up session were ARRL Hudson Division Director Mike Lisenco, N2YBB; ARRL CEO David Sumner, K1ZZ, and ARRL General Counsel Chris Imlay, W3KD.

President Craigie encouraged ARRL members in Florida and Hawaii to keep contacting Senators Schatz and Nelson, urging them to change their minds about the legislation. "Don't be harsh or angry," she advised. "Keep it factual and courteous, and don't give up."

(L-R) ARRL General Counsel Chris Imlay, W3KD; Hudson Division Director Mike Lisenco, N2YBB, and ARRL CEO David Sumner, K1ZZ, were on hand to observe the Senate committee markup session on November 18.

On November 5, US Senator Al Franken (D-MN) signed on as the second cosponsor of S. 1685. That legislation and its US House twin, H.R. 1301, call on the FCC to extend the limited federal pre-emption of PRB-1 to cover private land-use restrictions such as deed covenants, conditions, and restrictions (CC&Rs).

H.R. 1301 has 114 cosponsors as of November 18. President Craigie said ARRL members should continue to urge their Representatives to cosponsor H.R. 1301 and to thank those who already have signed on.

The Amateur Radio Parity Act of 2015 page <http://www.arrl.org/amateur-radio-parity-act> on the ARRL website has more information on how you can become involved. Read more <http://www.arrl.org/news/amateur-radio-parity-act-passes-senate-committee-gains-cosponsors>
.
World Radiocommunication Conference Approves Global 60 Meter Allocation!

The Plenary Meeting of the 2015 World Radiocommunication Conference (WRC-15 <http://www.itu.int/en/ITU-R/conferences/wrc/2015/Pages/default.aspx>) in Geneva has approved an allocation of 5351.5-5366.5 kHz to the Amateur Service on a secondary basis, with a power limit of 15 W effective isotropic radiated power (EIRP). The November 18 decision on Agenda Item 1.4 was adopted on two back-to-back readings. Some Region 2 countries --

but not the US -- will be permitted up to 25 W EIRP. With this action, and despite conditions that are more restrictive than had been hoped at the start of the Conference, the Amateur Service has obtained its first new global HF allocation since 1979. While the Final Acts of the conference are expected to take effect on January 1, 2017, the new band will not become available to amateurs until their national telecommunications administration amends its rules and licensing conditions. Those administrations that already permit amateurs to operate in the 5 MHz range under certain conditions and on a not-to-interfere basis, including the FCC, will be considering whether, how, and when to modify those arrangements in light of the international allocation.

The International Amateur Radio Union (IARU <http://www.iaru.org/>) team is doing what it can to influence the agenda for WRC-19. The agenda could include addressing amateur spectrum requirements in the 50-54 MHz band in Region 1, which could lead to at least partial harmonization of the 6 meter band worldwide. A proposed agenda item to align the 160 meter allocation in Region 1 with the rest of the world is no longer under active consideration.

The WRC-19 agenda will also likely pose spectrum defense challenges, including possible consideration of the 420-450 MHz band to accommodate a new allocation to the space operations service for satellites in non-geostationary orbit that are described as "small satellites" or "satellites with short duration missions." One or more bands above 10 GHz may be up for consideration for 5G smartphone use. The bounds of these potential defensive items, however, are still under discussion by the conference and will not be settled until its final week.

The IARU team continues to monitor several other WRC-15 items that appear to be headed toward acceptable conclusions. WRC-15 continues through the signing of the Final Acts on November 27.
FCC Not Processing License and Exam Session Files Again

The FCC Universal Licensing System (*ULS* <http://wireless.fcc.gov/uls/index.htm?job=home>) electronic batch filing (*EBF* <http://wireless.fcc.gov/uls/index.htm?job=about_ebf>) system was working for a brief window of time yesterday after being down since Friday November 13. Some files were processed through the system Wednesday, but the FCC is having a problem processing all VEC license and examination session files today. ARRL VEC Manager Maria Somma, AB1FM, said her office again had to alert the FCC IT staff, which are said to be looking into the issue but did not estimate how long the system would be down. Somma said it was the third time the EBF system has gone down since late September, when the FCC said a process had stopped running on an FCC server.

The FCC doesn't have a long term fix in place yet and it appears the same issue is happening again with more frequency. The amateur community should expect delays in exam license processing until the FCC can get this resolved. The FCC apologies for the continued inconvenience this is causing the community. "We transmit the exam sessions to FCC as soon as possible, which is usually 24 to 48 hours from the day received in our office," Somma

said. "We make every effort to process each session quickly and efficiently while following FCC rules. Unless there is missing candidate information or paperwork, we normally aim to send the session to the FCC within a few days, because most of the VEC staff understands what it feels like to wait for your call sign to be issued." Somma expressed the hope that applicants and VEs will be understanding and patient while the FCC resolves the problem.

ARRL Reiterates Call for FCC to Make Historical Licensee Data Available

At the request of the FCC, the ARRL on November 13 filed supplemental comments urging the Commission to continue to make available via the Universal Licensing System (ULS <http://wireless.fcc.gov/uls/index.htm?job=home>) historical Amateur Radio license information not associated with a current licensee or a pending application. The League filed its initial comments <http://apps.fcc.gov/ecfs/comment/view?id=60001068403> in the proceeding, WT Docket 15-81, last June. In its earlier comments, the ARRL argued that historical license data not associated with a current license is a primary means for volunteer examiner coordinators (VECs) to research the validity of exam credit on the basis of a license once held by the candidate. ARRL General Counsel Chris Imlay, W3KD, who filed the supplemental comments on November 13, said the Commission now wanted to know how many applicants were taking advantage of lifetime examination credit, which went into effect in the summer of 2014.

ARRL told the FCC that its VEC currently transmits an average of five applications with expired license credits each week, and has handled some 300 such applications since July 2014. The W5YI VEC told ARRL that it relies heavily on historical license information too. ARRL argued that the number could grow, as word of the expanded opportunity for exam element credit continues to spread.

"The Commission, having obligated VECs to validate claims of former licensee status and the data associated therewith cannot fairly take away a key resource for objectively evaluating the validity of applicants' claims and documentation," the League said in its supplemental comments. "To do so decreases substantially the ability of VECs to maintain the historically high degree of integrity of the Amateur Radio licensing process. Since the Commission clearly has no intention of assuming any of the burden of the validation process -- and is ill equipped to do so in any case -- the proposal is both unfair and illogical."

ARRL said that researching expired license credit is just one of several instances in which VECs might need to access historical license data. Other possibilities, the League said, could include using historical data to validate a candidate's identification, and to research exam credit for pre-1987 Technician licenses.

The League concluded by again asking the FCC to continue to make available historical license data at least to VECs, if not the general public.

VY1AAA Hopes for Better Conditions in Phone Sweepstakes

If you missed working one of the two stations handing out the super-rare Northern Territories multiplier in the CW weekend of the 2015 ARRL November Sweepstakes <http://www.arrl.org/sweepstakes>, you may have better luck during the phone event, November 21-23. VY1AAA logged 335 contacts in 73 ARRL/RAC sections during the CW event. Hal Offutt, W1NN, and J Allen, VY1JA, operated VY1AAA from VY1JA, near Whitehorse, Yukon Territory. Offutt operated remotely from within the US, while Allen operated locally. VY1AAA spent 18 hours battling rough conditions during the CW weekend in the multioperator, high-power category, logging the lion's share of its contacts on 20 meters.

"Knowing how popular and needed the NT mult is, I hoped to put at least 1000 contacts in the log and enjoy some fun pileups all weekend," Offutt said in a post on 3830scores.com. "I was not counting on something called a coronal mass ejection (CME)." The CME threw the proverbial monkey wrench into the plans of many operators in the US and Canada, although a lot of other stations reported favorable conditions.

"Friday night J sent some pictures of the aurora that was visible from his QTH in Whitehorse, and it began to sink in that I might not have those pileups I had been hoping for," Offutt said. He reported missing the NH, RI, SFL, PR, QC, ONE, GTA, MB, AB, and NL multipliers.

Hal Offutt, W1NN, has operated VY1AAA from the US and Japan.

VY1AAA is the call sign of the Yukon CanAm Contest Club (YCACC), established by Allen and Gerry Hull, W1VE. Its primary purpose is to support Allen in making the Yukon Territory multiplier available in major contests. Hull will helm VY1AAA for the SSB event, hanging out near band edges and following the MUF during the day. At his gray line, he'll shift to 40 meters, and will be on 40 early in the morning for the US East Coast too.

John Boudreau, VE8EV, in Inuvik, Northwest Territories, was planning an all-out effort this year, but yielded to poor conditions and to the VY1AAA operation, and only spent an hour on the air. "When conditions picked up a bit Sunday afternoon, I ran for an hour just to prove I could do it," he said in a 3830 post. "I'm expecting much better conditions...for SS Phone. See you then!"

At the other end of Canada, Gus Samuelson, VO1MP, in the also-rare NL multiplier, said, "Conditions [were] about as poor as I have ever heard for Sweeps." He missed NNY, ID, NE, WY, NT, and PAC. Roughly one-half of his contacts were on 15 meters.

The phone weekend of the 2015 ARRL November Sweepstakes gets under way at 2100 UTC on Saturday, November 21, and runs through 0259 UTC on Monday, November 23. The 2015 ARRL November Sweepstakes operating guide <http://www.arrl.org/files/file/Contest-Operating-Guides/2015/2015%20ARRL%20November%20Sweepstakes%20Package%20-%2030%20Sep%202015.pdf>

is available on the ARRL website.

National Parks on the Air (NPOTA) Map Now Available

In cooperation with ARRL, CQmaps <http://cqmaps.myshopify.com/> has introduced a 2016 National Parks on the Air (NPOTA) map <http://cqmaps.myshopify.com/pages/national-parks-on-the-air-2016-map>. The full-color map includes all NPOTA <http://cqmaps.myshopify.com/pages/national-parks-on-the-air-2016-map>units within the US, including Alaska, Hawaii, Puerto Rico, US Virgin Islands, Guam, Saipan, and American Samoa. All sites are clearly labeled and include the park name along with the ARRL park designator.

Each 24 × 36 inch map is offered in either a laminated heavyweight paper or DuPont Tyvek.

The NPOTA laminated map is well suited for using a dry-erase marker to check off your progress in chasing the parks. The map is personalized with your Amateur Radio call sign. The price is $25, including US shipping. Add $10 for international orders.
AO-85 Commissioned and Turned Over to AMSAT-NA Operations

Fox-1A (AO-85) has been formally commissioned and turned over to AMSAT Operations, which is now responsible for the scheduling and modes. Fox-1A is AMSAT-NA's first CubeSat.

Many new techniques are incorporated, and lessons will be learned, as with any new 'product,'" said AMSAT Vice President-Engineering Jerry Buxton, N0JY. "We will incorporate changes from what we learn in each launch, to the extent possible, in subsequent Fox-1 CubeSats. To our members, we want to say that the Fox Team is very proud and pleased that our first CubeSat is very successful and hopefully will be for some time."

The Fox-1 Project is a series of CubeSats. A total of five will be built and flown. Launches already have been scheduled for three more, and a new NASA CubeSat Launch Initiative proposal will be submitted for the fifth launch.

The Fox Team noted that an apparent lack of receiver sensitivity and difficulty in turning or holding on the repeater with the 67 Hz CTCSS tone are probably the most notable observations about AO-85.

"We have determined a probable cause for the sensitivity issue, and while that can't be fixed on AO-85, we are taking steps to prevent similar issues on the rest of the Fox-1 CubeSats," Buxton assured. The November/December edition of *AMSAT Journal* will include full details on these technical issues. Read more <http://www.arrl.org/news/ao-85-commissioned-and-turned-over-to-amsat-na-operations>.
-- *Thanks to AMSAT News Service via Jerry Buxton, N0JY*
New UK/EI DX Contest to Launch in December

A new contest to promote activity between stations in the UK and in Ireland (UK/EI) and the rest of the world debuts with an SSB event in December 5-6

and a CW event January 23-24. Both get under way at 1200 on Saturday and end 24 hours later. The United Kingdom and Ireland Contest Club (UKEICC <http://www.ukeicc.com/which-contest/contest-rules/uk-ei-dx-contest>) is sponsoring the new contest.

"All UK and EI contesters, including those with modest stations and antennas, will experience the fun of being a multiplier in a worldwide contest," the announcement <http://www.ukeicc.com/which-contest/contest-rules/uk-ei-dx-contest> said. While the eventual goal is to have UK/EI stations work the rest of the world, all entrants may work all other entrants for points and multipliers.

"For the first year or two we have to take into account that UK/EI participation may take time to build up and that there are long periods when DX stations cannot work UK/EI stations, because there is no propagation," the announcement pointed out. "Accordingly, we are initially allowing DX-to-DX contacts, which will make the contest more interesting for DX stations." Full information <http://www.ukeicc.com/which-contest/contest-rules/uk-ei-dx-contest> is on the UK/EI DX Contest web page. Read more <http://www.arrl.org/news/new-uk-ei-dx-contest-to-launch-in-december>.

Support ARRL as You Shop this Holiday Season!

As you browse for great deals online this Black Friday and Cyber Monday, we invite you to shop at AmazonSmile <https://smile.amazon.com/ch/06-6000004>, choosing the ARRL as your charity of choice. With every qualifying purchase you make <https://smile.amazon.com/ch/06-6000004>through AmazonSmile, Amazon will make a contribution to ARRL. When you shop at AmazonSmile, you will be helping the League to extend its reach in public service, advocacy, education, technology, and membership. Bookmark the link <https://smile.amazon.com/ch/06-6000004> and support ARRL every time you shop. ARRL wishes you a wonderful Thanksgiving holiday and hopes you'll remember us when you shop on Amazon this season.

AmazonSmile allows shoppers to enjoy the same wide selection of products, low prices, and convenient shopping features as on Amazon.com. When customers shop on AmazonSmile, the AmazonSmile Foundation will donate 0.5 percent of the price of eligible purchases to the charitable organizations selected by customers. As a 501(c)(3) organization, ARRL -- the national association for Amateur Radio® is a registered charity of AmazonSmile.
Willis Island VK9WA DXpedition Going Smoothly

The eight-member international team <http://vk9wa.com/team> now activating VK9WA from Willis Island November 14-23 reports the DXpedition <http://vk9wa.com/> is going smoothly for the most part. VK9WA has generated substantial pileups over the past week and had logged some 24,000 contacts as of November 18. The 160 meter receiving antenna has been repaired, and the team said that its new frequency on that band will be 1827 kHz. The team is operating from the 4-acre Middle Cay, some 280 miles off the eastern coast of Australia. Operation is on all bands, 160-10

meters, SSB, CW, and RTTY. The team has begun running RTTY on 10.142 MHz.

"Our primary focus will be providing new contacts with this highly demanded, rarely activated entity with an emphasis on difficult paths -- primarily US East Coast, Europe, and Africa," the DXpedition website states.

The DXpedition team will be on the island until November 22 and plans to tear down all but two stations the afternoon prior to leaving. Two stations will run overnight before departure. VK9WA has been arriving via long path to the US on 17 and 20 and via short path on 15, 12, and 10. They are using verticals plus one two-element Yagi. Signals into South America and southern Africa "have not been good," the team reported this week.

Willis Island, which has not had a significant activation since 2008, is number #32 on the ClubLog Most Wanted DXCC <https://secure.clublog.org/mostwanted.php> list. The weather there, where it is spring, is reported to be "extremely hot." ClubLog statistics show fairly even contact percentages for Asia, Europe, and North America.

A reminder to those hoping to work VK9WA (or any other major DXpedition): Do *not* call the DX station on its frequency; you *must* operate split. Pay attention to the operator's instructions.

Oregon SM Pledges Continued Cooperation with Office of Emergency Management After Rift

ARRL Oregon Section Manager Everett Curry, W6ABM, has told the Section's Amateur Radio Emergency Service Emergency Coordinators that Oregon ARES/RACES will continue to work with the Oregon Office of Emergency Management (OOEM). Curry's statement comes nearly a week after the OOEM severed its working relationship with Oregon Section Emergency Coordinator Vince Van Der Hyde, K7VV. Van Der Hyde remains as SEC.

"Nothing that OOEM has done alters your commitment to your served agency -- in most cases your county -- and the commitments of Oregon ARES/RACES to work with you in meeting the commitments made to your county," Curry told the ECs. "I will work with OOEM for the present."

State Communications officer and Oregon RACES Officer Terry Pietras, W7JOC, wrote Van Der Hyde on November 9, informing him that OOEM had decided to sever the relationship between Van Der Hyde and the OEM Amateur Radio (ARES) Unit. Pietras cited Van Der Hyde's decision not to participate in a November 12 OOEM drill to test RACES emergency communications capabilities and operations.

In a November 16 joint OOEM/ARRL Oregon Section statement, the OOEM stressed that its relationship with Oregon ARES/RACES continues. "We...are committed to work with and develop this relationship to enhance emergency communications capabilities throughout Oregon," said the statement, signed by Curry and OOEM Manager, Operations and Preparedness Section Matthew T. Marheine.

Curry was scheduled to meet with Marheine this week. "It is my expectation that we will achieve the mutual and respectful working relationship that we desire," he said. He said he hopes to appoint an Emergency Coordinator for the OOEM Amateur Radio Unit soon.
Ham Radio Accessory Dealer, Publisher Idiom Press Changing Hands

Idiom Press <http://www.idiompress.com/> of Merlin, Oregon, has announced the sale of its assets to Ham Supply <http://www.hamsupply.com/> of Elizabeth, Colorado. Owned by Wayne Ordakowski, N0UN, Ham Supply is a new business formed to manufacture and distribute the products previously offered by Idiom Press, as well as other new Amateur Radio products.

Ham Supply will honor warranties for existing Idiom Press products, and once production is resumed, Ham Supply will honor all existing orders placed with Idiom Press after reconfirming them with the customer. Ordakowski has said he intends to have the new business in full operation by the first week of January 2016, although some previously placed orders may ship earlier.

Idiom Press published *The Complete DXer* by Bob Locher, W9KNI, who started the business before turning it over to his son Rob, W7GH, who is returning to the computer programming field.

Past Pacific Division Director Bradley W. "Brad" Wyatt, K6WR, SK

Past ARRL Pacific Division Director Brad Wyatt, K6WR, of Los Gatos, California, died on November 10 after an illness. He was 86. An ARRL

Past Pacific Division Director Brad Wyatt, K6WR.

Life Member, Wyatt served as the Pacific Division Director from 1994 until 2000, when he decided not to run for another term. He previously served as Vice Director of the Pacific Division from 1992 until 1994.

Wyatt retired from IBM in 1984. He received bachelor's and master's (MBA) degrees from Stanford University. Wyatt was a past president of the Los Gatos Kiwanis Club.

In November 2001, Wyatt's article, "Remote Controlled HF Operation over the Internet," appeared in *QST*. A year later, Wyatt and co-authors Stan Schretter, W4MQ, and Keith Lamonica, W7DXX, won the *QST* Cover Plaque Award for their collaboration on the article, "A Ham Radio Public Utility HF Station."
In Brief...

Special Event W1Q will Mark QST Centennial: Special Event station W1Q will be on the air December 1-15 to celebrate *QST*'s 100th anniversary. The first issue of *QST* was published in December 1915. ARRL COO Harold Kramer, WJ1B, and volunteer operators will be on the air. This is *not* an official ARRL operation, and Kramer will handle all details, QSL cards, and LoTW entries. He will post additional information on his WJ1B *QRZ.com* page. *-- Thanks to Harold Kramer, WJ1B*

Astronaut Kjell Lindgren, KO5MOS, Tweets Anniversary Greetings to ARISS: Astronaut Kjell Lindgren, KO5MOS, has tweeted greetings to the Amateur Radio on the International Space Station (ARISS <http://www.ariss.org/>) program on the 15th anniversary of the first Amateur Radio contacts between the ISS and Earth. "First QSOs conducted from the ISS ham radio station 15 years this weekend. Happy Anniversary ARISS! 73!" Lindgren tweeted on November 15. ARISS International Chair Frank Bauer, KA3HDO, noted the auspicious occasion on November 13, in a post to the AMSAT-BB. "15 years ago today the ARISS team inaugurated the ham station on ISS with the first set of QSOs with the crew," Bauer recounted. "These contacts were conducted on this date in Moscow, Russia; Greenbelt, Maryland, and Houston, Texas. Lou McFadin, W5DID, and I were on the mic at the Greenbelt, Maryland location." That occasion marked the first use of the NA1SS call sign from space. Lindgren, who arrived at the ISS in July, will return to Earth in late December. During his duty tour, he has participated in several ARISS school contacts.

Fall 2015 Issue of Radio Waves is Now Available: The fall 2015 edition of *Radio Waves* <http://www.arrl.org/files/file/Radio%20Waves%20Newsletter/Fall%202015%20Radio%20Waves.pdf> is now available via the ARRL website. This issue includes such articles as "Using Sensors to Explore Terraforming," "STEM School and Academy ARC Builds Repeater," and "Community College's DIY Spirit Shines for ARISS Contact." Published quarterly by ARRL Education Services, the fall 2015 edition also looks at how ham radio can help Boy Scouts to earn the Radio merit badge; news, ideas, and support for instructors; ham radio instruction for people with disabilities, and the evolution of a licensing class. Current and back issues of *Radio Waves* are available <http://www.arrl.org/radio-waves> on the ARRL website. *Radio Waves* is available free as a PDF.

The K7RA Solar Update

Tad Cook, K7RA, Seattle, reports:

Solar activity declined again this week, with average daily sunspot numbers for the November 12-18 reporting week at 43.3, down from 72.3 during the previous seven days. Average daily solar flux was 105.5, down from 109.4.

Geomagnetic A indices were down, which is generally a good thing for HF propagation. The average daily planetary A index slipped from 25 to 11 and average daily mid-latitude A index from 19 to 9. All four of these average A indexes being whole integers is an odd occurrence.

Predicted solar flux is 108, 106, 104, and 105 on November 19-22, 103 on November 23-24, then 100, 105, and 110 on November 25-27, 115 on November 28-29, 120 on November 30 and December 1, 115 on December 2, 110 on December 3-4, and 105 on December 5-14. Flux values then drop to a low of 95 on December 17-18, then rise back to 120 on December 27-28.

Predicted planetary A index is 18 and 10 on November 19-20, 8 on November 21-22, 5 on November 23-25, 8 and 5 on November 26-27, 8 on November 28-29, 25 in November 30 and December 1, then 15, 8, 5, 12, 20, and 25 on December 2-7.

Sunspot numbers for November 12 through 18 were 29, 50, 48, 63, 44, 33, and 36, with a mean of 43.3. 10.7 cm flux was 103.5, 102.9, 106.3, 105.8, 105.6, 107.1, and 107.6, with a mean of 105.5. Estimated planetary A indices were 5, 14, 10, 9, 14, 8, and 17, with a mean of 11. Estimated mid-latitude A indices were 4, 12, 10, 7, 9, 7, and 14, with a mean of 9.

Please send your reports and observations to k7ra@....

929. Fw: Amateur Radio Month

Yahoo group: sloecc
Date: 2016-06-19 16:45:32 UTC
From: James Smith
Topic: 929 Message: 929

----- Forwarded Message -----
From: "Fortney, James T - K6IYK" <K6IYK@...>
To:
Sent: Saturday, June 18, 2016 10:53 PM
Subject: Amateur Radio Month

This is a special message from your ARRL Section Manager. It wouldbe great if you can support the following activity.

The San Luis Obispo Board of Supervisors will make a presentation onTuesday, June 21st, naming the month of June as Amateur RadioMonth in the County. They will be highlighting the activitieswe participate in, and recognizing the contributions Amateur Radio makesto the community. My request is that you attend this presentationif your schedule will allow. It is important that the Supervisorsand County Staff realize how many of their constituents are Amateur RadioOperators.

David Garth, W6DEG, the District Emergency Coordinator (DEC) for San LuisObispo County will be our primary representative accepting theResolution, but it is intended for all of you no matter what area ofAmateur Radio interest you represent.

The presentation will occur in the afternoon session which is scheduledto start at 1330 hours. What is expected to be a brief review ofBoard actions taken while in Executive Session will be first, with theAmateur Radio Month Resolution to immediately follow. You areencouraged to be seated by 1330.

The Board meets in the Board of Supervisors Chambers at 1055 MontereyStreet, San Luis Obispo. If you have questions or concerns, pleasecontact David, W6DEG.

Our Section Motto is Success Through Teamwork, and I want you tobe an active part of this Team. We need more team players in orderto accomplish all the goals necessary for us to be successful andsatisfied Amateurs. Our Section Website is at:http://ARRLSB.org and Iencourage you to bookmark this site. It is growing every week withmore important information about the Section, and the links to subscribeto the Section Announcements List along with Section Appointments andNets are available there.

Please do not hesitate to send me an email if you need help, or if youare interested in getting more involved. The Appointments List willhelp you identify where we have openings.

Thank You for participating.

73, - JimF K6IYK

James T. Fortney, K6IYK
Section Manager, ARRL Santa Barbara Section

937. RE: [sloecc] Board Meeting, Tuesday, 12 July 2016

Yahoo group: sloecc
Date: 2016-07-11 16:25:12 UTC
From: Fred Campbell
Topic: 936 Message: 937

All:

Thanks for keeping me on the list. I promise, I will make the meeting someday.

Tuesday I have a conflict with physical therapy.

My Nipomo repeater (147.990) is down at the moment. I observed excessive current draw on xmit last Tuesday. Suspect a shorted antenna or equivalent. The digipeaters are, I believe, fully functional (and with emergency power back-up).

955. Fwd: [CPARC] Ham Support for the Lighthouse Century Bike Ride

Yahoo group: sloecc
Date: 2016-09-01 16:35:06 UTC
From: Marcel S
Topic: 955 Message: 955

---------- Forwarded message ----------
From: Stanton Wu <stantonchuengwu@...>
Date: Thu, Sep 1, 2016 at 9:11 AM
Subject: [CPARC] Ham Support for the Lighthouse Century Bike Ride
To: calpolyradioclub <calpolyradioclub@...>

Hello again!

Just a reminder that the SLO Bike Club (SLOBC) is hosting their annual Lighthouse Century Bike Ride on Saturday, September 24th in Morro Bay and they're still looking for more volunteers. Because cell service is weak on the course, we will be providing communications support for the event to keep riders safe and happy!

The ride has three routes, which are 65, 80, or 100 miles long. We will have radio operators at rest stops, in vehicles patrolling the routes, and at the Morro Bay High School (start and finish) in case anyone needs assistance.

There is a meeting on Thursday, September 22nd in the library in downtown San Luis Obispo where they will teach you everything you need to learn for the event. For those of you operating radios in vehicles, you will get to meet your drivers during this meeting as well!

SLOBC hosts some of the friendliest bike rides around and helps our community by donating the money earned from these events to local groups and schools. If you're interested in helping out, please sign up with the link below! No experience, equipment, or callsign is needed to volunteer. Lunch and a free T-shirt will be provided for all volunteers! There will also be a complimentary dinner Sunday after the event.

Event Details
Date: Saturday, September 24th
Location: Morro Bay High School

976. Cal Poly ARC - Duplexer Presentation - Thursday 11/10 - 6:30pm

Yahoo group: sloecc
Date: 2016-11-05 21:53:48 UTC
From: Marcel S
Topic: 976 Message: 976

Hello SLOECC,

The Cal Poly Amateur Radio Club has a special meeting presentation on Thursday, November 10th about duplexers! If you're interested, come to Cal Poly, Building 20, Room 136 <http://w6bhz.org/content/meetings> at 6:30 pm. Talk-in on the W6BHZ repeaters: http://w6bhz.org/content/repeaters.

Topic: Duplexers and how to tune them!

Abstract
Duplexers are a special kind of cavity resonant filters that are a fundamental part of every normal 2-way radio repeater system. Yet duplexers are a mystery to most and considered part of the “RF Black Magic” that powers complex radio systems. This presentation aims to remove that mystery and reveal the magic that appears to control these filters. The first half of the forum covers the fundamentals of duplexers including basic types, functionality, usage, and construction. The second half of the forum will be a live tuning demo of a simple band-reject type duplexer. After attending this forum, you should have a basic understanding of how a cavity resonant filter works and have a comfortable familiarity with your new friend, the duplexer.

Biography
Marcel Stieber (AI6MS) graduated in 2012 from Cal Poly's 4+1 BMSEE program. His Master’s Thesis was Radio Direction Finding Network Receiver Design for Low-cost Public Service Applications. Marcel is currently an Electrical Engineering Systems Lead at Amazon Lab126 in Sunnyvale, CA and serves on the Cal Poly EE Industry Advisory Board. He is trustee and technical manager for the Cupertino ARES W6TDM repeater system and technical project lead for the ARKnet Project. Marcel is a technical advisor to several event management companies and volunteers regularly as a tower climber for local repeater groups. He was a former President and is currently an advisor to the Cal Poly Amateur Radio Club (www.w6bhz.org). Marcel is an ARRL Life Member and as a Volunteer Examiner has helped license over 1000 hams since 2009.

I hope to see you there!

Cheers,

-Marcel AI6MS

991. Radio Amateur Civil Emergency Service (RACES)

Yahoo group: sloecc
Date: 2016-12-16 05:12:07 UTC
From: thesysop@...
Topic: 991 Message: 991

Just for some fun factoids and FYI. I don't really think we have any "RACES Members" :D. You have to be a member of your local Civil Defense branch of government. Don't even know who that would be locally. I am posting just one section out of the info on the ARRLs site. The link to that information is below that.

I’ve heard that the FCC has in the past issued RACES licenses that can be used only for RACES activities. What’s the status of RACES licenses?-

There are fewer than 250 RACES station licenses and calls have been issued from the WC#$$$ call sign block such as WC1AAA. They’ve been assigned to certain civil defense organizations, not to individual amateurs. The FCC stopped issuing new RACES licenses in 1978, and it will not renew existing ones. The FCC will not issue WC#$$$ calls under the Vanity program.

ARES RACES FAQ http://www.arrl.org/ares-races-faq

ARES RACES FAQ http://www.arrl.org/ares-races-faq The American Radio Relay League (ARRL) is the national association for amateur radio, connecting hams around the U.S. with news, information and resources.

According to my records, you registered with Races on 10/9/2009. Many
ARES members are registered but not all of them.

Hi Ron, good to hear from you. Yes I remember registering with you. My understanding that was for ARES. Are we also registered with some Civil Defense organization? From what I read only those that are registered would be allowed to transmit on specific frequencies during a Presidential war act/declaration - Civil Defense type of emergency. Not that that will happen since there are so many ways to communicate these days. I can't seem to find any Amateur Radio organization on the internet that clearly defines how they are officially RACES.

You sent me a FSD-98 for ARES registration but you also registered with San Luis Obispo County having a background check and Live Scan performed. While there have been regular RACES drills, we have only been activated once in that time.

998. Active SLOECC Winlink Check Ins

Yahoo group: sloecc
Date: 2016-12-21 16:13:14 UTC
From: thesysop@...
Topic: 998 Message: 998

Hello SLOECC,
I have been getting back up to speed on packet and now I am working on getting Winmor up and running for HF Winlink. I have sent Winklink Check INs for ECCs 5 and 11 because I know they are active (and confirmed by KA9A - thanks). The question is; which other ECCs are active in taking weekly ARES net Check INs via Winlink?

Thanks
Jim

1005. FEMA Region 10 to Conduct Monthly Interoperability Communications Exercises during 2017

Yahoo group: sloecc
Date: 2017-01-05 20:51:11 UTC
From: thesysop@...
Topic: 1005 Message: 1005

I participated in a drill a couple months ago. Even though the contact I made was with another ham aparently she represented MARS so she said I would receive a QSL card for the Dept. of Defense (or maybe is was another dept. but I think it was DOD.)

FEMA Region 10 (Alaska, Idaho, Oregon, and Washington) will conduct interoperability communications exercises (COMMEX) during 2017 on the third Wednesday of each month, 1500-2100 UTC. The initial exercise will take place on January 18.

"The intent of this COMMEX is to test and exercise interoperable communications (federal/state/local/tribal/amateur) during a major disaster, where communications infrastructure would be significantly damaged or destroyed," FEMA Region 10 said in announcing the exercises. FEMA Region 10 will use the call sign WGY910. Others that may participate in this exercise include, but are not limited to, other FEMA stations, SHARES stations, and Air Force and Army MARS stations. All stations are encouraged to participate.

The COMMEX will use the five 60-meter channels: 5,330.5 kHz, 5,346.5 kHz, 5,357.0 kHz, 5,371.5 kHz, and 5,403.5 kHz. The area of operation is the Continental US

1014. Re: [sloecc] SLO AR Mesh Net

Yahoo group: sloecc
Date: 2017-01-13 21:44:40 UTC
From: John Bonnett
Topic: 1011 Message: 1014

I get email from the sloecc group. Apparently I can reply to the email as well.

However I do not care to login to Yahoo and have my personal data stolen and not have anybody notice for 3 years...

I note that the Winlink crowd is abandoning Yahoo for Google Groups. Not sure I'm big on Google as well (I use their search all the time, but avoid logging in), but at least we haven't heard that there has been a breach of a billion gMail users data. They sell that data for a living, so they are motivated to not have it stolen. Not sure what the difference is... :)

Some consideration for no longer using Yahoo's, or should I say Verzion's services is warranted.

For all who are interested, I have a Ubiquity link between my office in Los Osos and the Clark Repeater site. Running a RasPi with my repeater/node server with 1200 and 9600 baud data up there. For more information email be directly.

1016. [Mesh Net] Hamnet- Broadband or AREDN

Yahoo group: sloecc
Date: 2017-01-16 15:12:13 UTC
From: thesysop@...
Topic: 1016 Message: 1016

What is it?

Basically it’s a network made from routers that have been modified to form a self-configuring network.
What can it do?
Pretty much anything that is done on the internet can be done on a mesh net. It’s up to the individuals if they desire to provide services to the mesh or just have access to the mesh. Everyone who has a mesh router is a ‘node’ and is useful in ‘repeating’ and expanding the net. Individuals who desire to provide resources can provide the mesh with webservers, VOIP and other phone services [some mesh nets have complete telephone services using I.P. phone software], IRC, Email, etc.

What is the purpose?

You can look at this from many perspectives. My personal opinion, Amateur Radio should have an independent net for experimenting and learning. From an EmComm perspective, a mesh net needs very little backup electricity to run a node or even a webserver over a laptop providing services in the event of a loss of grid/internet.

What does it cost?

It can cost very little. That depends on which router you are buying. There are two different systems to choose from . Here is an example of the first option:
LMR-240 N Male to SMA Male coax cable $1.00 per foot
USED WRT54G Linksys Router $10- $20-
2.4GHz 20dBi Yagi http://www.ebay.com/itm/2-4GHz-20dBi-Yagi-802-11b-g-WiFi-Antenna-RP-SMA-WLAN-/190836223385?hash=item2c6eb9ad99:g:incAAOSwuWVWEzbG$9.00

For the other systems you might pay a little more for the other type of router and depending if you buy a new or used router. If you choose Ubiquiti devices you will not have to concern yourself with running coax. You mount the device up on a pole and run CAT cable to the device.

How do you set up a Node?

Installing the firmware is fairly simple. 1) Buy the proper router. 2) Download the firmware for configuration from the web site sponsoring that system for your router. 3) Access the router menu (that is usually done by typing in an IP address something like: 196.162.0.1 into your browser– may vary according to router.) 4) Find the item in the menu for updating the firmware and select the file on your computer that you downloaded. You now have a mesh node. There are other settings to consider (i.e. a setting for your longest expected distance for a connection) but we won’t go into that here.

Which system is best, Broadband-Hamnet (BBHN) or AREDN? (AREDN = Amateur Radio Emergency Data Network)

That is a good question. Even though I have 3 Hamnet nodes right now for experimenting, I think the best choice is actually AREDN. The firmware was written by the same group of Hams but the second group split off. AREDN has one distinct advantage; you have channels that are not the same as commercial router frequencies so your throughput is much better because you are not receiving interference from other neighbors on their 2.4 GHz routers. AREDN has a larger selection of routers/switches/etc to choose from. Though your average user will be on 2.4 GHz, they have equipment for several other bands (5 GHz, etc.) I have read the debate on both systems and you can find that on the Broadband-Hamnet website (BBHN.ORG). The advantage I have read for Broadband-Hamnet was that it is always on channel one of the 2.4 GHz band, you could go to any town and turn your node on and be connected to the local mesh net. In the debate of HNBB vs AREDN I read one comment that said their throughput went from 300baud on BBHN to 10mb on AREDN. If we wanted to run video (or have a fast network) 10mb is a must!

For now I personally will be experimenting using BBHN but willing to change if we decide on AREDN. I have already begun by installing a Web server with a forum on a laptop. Now I have to setup the router to port forward from the node to the laptop. I also desire to install “Ham chat” on the node that runs independently from the router.

Example Links (these links are for BBHN, AREDN would be similar but hardware will vary because of capability necessity)

Subject: [sloecc] [Mesh Net] Hamnet- Broadband or AREDN

What is it?

Basically it’s a network made from
routers that have been modified
to form a self-configuring network.

What can it do?

Pretty much anything that is done on the
internet can be done on a
mesh net. It’s up to the individuals if they desire to
provide
services to the mesh or just have access to the mesh.
Everyone who has
a mesh router is a ‘node’ and is useful in
‘repeating’ and
expanding the net. Individuals who desire to provide
resources can
provide the mesh with webservers, VOIP and other phone
services [some
mesh nets have complete telephone services using I.P. phone

software],
IRC, Email, etc.

What is the purpose?

You can look at this from many
perspectives. My personal opinion,
Amateur Radio should have an independent net for
experimenting and
learning. From an EmComm perspective, a mesh net needs very
little
backup electricity to run a node or even a webserver over a
laptop
providing services in the event of a loss of
grid/internet.

What does it cost?

It can cost very little. That depends on
which router you are buying.
There are two different systems to choose from . Here is an
example of
the first option:

LMR-240 N Male to SMA Male
coax cable $1.00 per foot

USED WRT54G Linksys Router $10- $20-

2.4GHz 20dBi Yagi [1]$9.00

For the other systems you might pay a
little more for the other type
of router and depending if you buy a new or used router. If
you choose
Ubiquiti devices you will not have to concern yourself with
running
coax. You mount the device up on a pole and run CAT cable to
the
device.

How do you set up a Node?

Installing the firmware is fairly simple.
1) Buy the proper router.
2) Download the firmware for configuration from the web
site
sponsoring that system for your router. 3) Access the router
menu
(that is usually done by typing in an IP address something
like:
196.162.0.1 into your browser– may vary according to
router.) 4)

Find the item in the menu for updating the firmware and select the file on your computer that you downloaded. You now have a mesh node.
There are other settings to consider (i.e. a setting for your longest expected distance for a connection) but we won't go into that here.

Which system is best, Broadband-Hamnet (BBHN) or AREDN? (AREDN = Amateur Radio Emergency Data Network)

That is a good question. Even though I have 3 Hamnet nodes right now for experimenting, I think the best choice is actually AREDN. The firmware was written by the same group of Hams but the second group split off. AREDN has one distinct advantage; you have channels that are not the same as commercial router frequencies so your throughput is much better because you are not receiving interference from other neighbors on their 2.4 GHz routers. AREDN has a larger selection of routers/switches/etc to choose from. Though your average user will be on 2.4 GHz, they have equipment for several other bands (5 GHz, etc.)

Hello!

The Cal Poly Amateur Radio Club is having a test session on Saturday, February 25th. Please fill out the first form below to preregister. The test is free to take and will be held in Building 20, Room 126 on the Cal Poly campus at 9 am. Please bring a photo ID, pencil, and have your SSID or FRN on the day of the test (instructions on how to get an FRN on the preregistration form below).

The second form is to sign up to help proctor the test.

Preregistration Form

Subject: [CPARC] Last Call to Signup for Next Week's Ham Test Session
To: calpolyradioclub <calpolyradioclub@...>

Just a reminder that the Cal Poly Amateur Radio Club is having a test session next Saturday, February 25th. If you are interested and haven't already preregistered, fill out the first form below. The test is free to take and will be held in Building 20, Room 126 on the Cal Poly campus at 9 am. Please bring a photo ID, pencil, and have your SSID or FRN on the day of the test (instructions on how to get an FRN is on the preregistration form below).

If you are interested in helping us proctor the exam, signup with the 2nd link below.

Link to Preregistration Form
https://docs.google.com/forms/d/e/1FAIpQLSej5S--lKdIQZ1w9GOi

1032. Fwd: Re: [w6fm] Tower Climber Needed!

Yahoo group: sloecc
Date: 2017-02-20 22:03:23 UTC
From: Ron Patterson
Topic: 1032 Message: 1032

Hello All,

I haven't had any luck finding help yet. I have an idea that will stabilize the reflector until a permanent repair can be made. I need someone who can climb the tower and use two large cable ties to secure the reflector to the driven element. Is there anyone who can help me with that? Do you know anyone who can help?

Thanks,

Ron

Hi Ron,I would love to help, however I do not have any more climbing
gear as I don't work for Charter.

Hi All,

My tribander at 48 feet on my north tower had the reflector come
loose
during yesterdays storm. Thankfully it slid along the boom and is up
against the driven element rather than falling to the ground. I am
going
to try to keep the antenna rotated so the prevailing wind blows the
reflector up against the driven element. It is quite loose and I
don't
know how long it will stay put.

I am looking for someone who can climb towers. The yagi will have to
be
brought down to have the element tightened up and reinstalled. Is
there
anyone on the list who has climbing gear and is proficient at tower
climbing? This needs to be taken care of ASAP to prevent any further
damage. I am looking to do the work at the next break in the weather.

Is there anyone who can help me?

Thanks,

Ron W6FM

I have a couple of body harnesses if you're comfortable climbing in someone else's gear.

Hi Mike,
glaring error, Next SLOECC meeting is in Cambria at Cambria file station. Topic is Packet Radio Training by John, KK6JRA and Dick, AF6MP on March 22. Schedule is Paso in May with Bill F.l talking about digital radio.
Also from last SLOECC general meeting, Board to discuss clothing once again, People want to order jackets and shirts but all is still on hold pending Board final decision.

Unfortunately I will not be at this meeting.

1048. Pismo Beach 440 Repeater

Yahoo group: sloecc
Date: 2017-03-15 00:44:38 UTC
From: John Henry
Topic: 1048 Message: 1048

The Pismo Beach repeater seems to be getting a lot of unlicensed use the last couple days. Sounds like a bunch of drunk whackers on the beach using police 10 codes and made up call signs.
I don't know who the trustee is for that repeater, so I'm posting here.

I normally monitor that repeater every Tuesday evening as we use it for our lds net for those who have ht's and cannot hit the orcutt repeater. I have only heard one other person other than our group in the past 2 years.
I will check it out tonight.

It's the Pismo heights repeater 444.600 plus 131.8 (yes it's not in SB cnty). I just heard 2 guys at O'Reilys and Autozone in Grover. Trustee is KB6BF but no email on QRZ. I do have a landline number if it still works.ErnieAE6ZV

The Pismo Beach repeater seems to be getting a lot of unlicensed use the last couple days. Sounds like a bunch of drunk whackers on the beach using police 10 codes and made up call signs.
I don't know who the trustee is for that repeater, so I'm posting here.

I'm thinking they may have high power mobiles parked on the output as I kerchunked the box after one of them finished talking and the repeater ided.

Sam Adam 83 seems to be the leader, was assigning call sign so based on birth year and initials last night. Hopefully they'll be on their way home soon.

Last night they were checking in "stations". At first I thought I was on a public safety channel until I looked at the radio. Certainly entertaining, but no legit callsigns anywhere. What is the protocol on this sort of thing?

Let the repeater trustee know by phone, email or show up at his door.
Monitor but do not respond to the unlicensed operation.

1063. Lopez Hill Repeater

Yahoo group: sloecc
Date: 2017-03-15 15:48:55 UTC
From: John Henry
Topic: 1063 Message: 1063

Good morning,

I've noticed the SLOECC Repeater Map shows a repeater on Lopez Mountain. Isn't the machine on Lopez Hill with all the CalFire radios, near Lopez Lake?

I've verified with an HT on very low power at Lopez Lake, which surely wouldn't be possible with the machine on Lopez Mountain.

Am I losing it?

John
W6JBH

You are correct, there is nothing on Lopez Mountain. Poorly labeled maps and not so clearly labeled repeater locations are the cause of the errant dot.

Mike, I believe that's the large public safety tower. This ham's house is
at the top of the hill, he doesn't need a tower for excellent coverage.

We need a few more volunteers for the Eroica Bike Ride on Sunday, April 9th. Below are the locations and the approximate times. The Santa Rita location could be divided into two shifts if we get the volunteers.

Cass Winery (Paso) 6:00-9:30
Olea Farm (Templeton) 7:15-12:00
Santa Rita (Templeton 9:30-6:00pm
Cypress Mountain (between Hwy 41 and Hwy 46) 7:30 am to early pm
Water stop TBD time not set yet

Please consider volunteering. Its great fun, good e-comm practice, and you can be an advertisement for Ham Radio!

I have attached a chart with more details if you are interested.

Thank you and 73's,

Mary Mason

1073. Repeater Equipment

Yahoo group: sloecc
Date: 2017-03-22 15:42:55 UTC
From: John Henry
Topic: 1073 Message: 1073

I figured I'd post this on here, if this isn't acceptable, please let me know.

Right now I have too much equipment sitting around doing nothing (ebay buying spree--ouch).

I have a DB404 that's in the 450-470 range and a brand-new Kenwood TKR-851 (euro model that is native 440-470). I'd like this equipment to be used for something other than collecting dust, so if you can think of a good use that would benefit the hams in the county, I'd love to hear it and possibly donate this equipment.

I bought the repeater and antenna to make two portable part 90 repeaters for HEET, but I think two is overkill and I'd rather one get used.

I also have a 175' of FSJ2 on a roll, brand new.

Please email me off-list.

Hello Gents

I think these same jokers described here below were on 146.700 tonite. They declared an emergency and we talked to them briefly, and then I told them I could tell they were a hoax and law enforcement wannabes. same stuff, 10 codes, pretending to be handling 2 emergencies, using the term "mayday", and sending OSO instead of SOS in Morse code, giving lat/long coordinates etc. I could not hear them at all on the input in Orcutt, but a station in Grover beach heard them very strong on the input. They were mentioning Lopez Lake and even mentioned the address of 980 Huasna. They did mention the 444.600 repeater, so that is a dead giveaway it is the same jerks.

I enjoy t hunting but I need to get up at 7:00 tomorrow. If this persists and it is convenient for me, I will go out if I see a pattern in the future

The Pismo Beach repeater seems to be getting a lot of unlicensed use the last couple days. Sounds like a bunch of drunk whackers on the beach using

police 10 codes and made up call signs.

I don't know who the trustee is for that repeater, so I'm posting here.

From: John Henry
Topic: 1048 Message: 1078

I'm wondering if they're spring breakers. I know my school is out this week, other campuses may be as well).

How were they sending Morse code? That would seem to indicate they aren't using dollar store Baofengs

1079. Re: [sloecc] Digital modes poll

Yahoo group: sloecc
Date: 2017-03-25 22:29:52 UTC
From: Ernest Davis
Topic: 1074 Message: 1079

Here is the first one. Some people in SLOECC are looking into digital repeaters. Personally, I think that would be nice, but in San Luis county (and north SS cry), I think we really need to get more people using existing repeaters. I have seen a noticeable decline in repeater usage as the SM Elks have gotten more inactive.If you want to joint the SLOECC Yahoo group, I think there is a link at the bottom. This group is unmoderated, and puts out two emails each week for the 19:45 county wide net. Other than that several others a month, except the Bonham usage which has been about 10 this last week. I have to go upstairs to forward those to you as the smart phone is akward.ErnieAE6AV

Hi All,

There are local open DMR repeaters if folks are interested in digital modes. There is 444.350 on Tassajara and 440.425 on Tepusquet. There was a repeater near Lompoc but it is no longer on the map so I am unsure of it's status. The map can be seen here:

http://norcal-brandmeister.org/network/repeater-map/

There are about a half dozen of us that have radios locally that I am aware of. There is very little local activity. Perhaps if more people purchased radios, that would change. There are cheap radios out there but they are full of bugs. I would recommend a Connect Systems CS-750 as a minimum (no longer a current model). The Motorola XPR series radios are nicer.

I will be giving a presentation on DMR at a future PRARC club meeting. I have no plans to replace my analog repeaters with digital at this time.

Ron W6FM

p.s. I am glad you didn't change your call Ernie.

I am the one that posted the poll. Thank you for responding. I and another Ham or three were interested in digital modes

I didn’t see any info on the SLOECC page about Digital modes other than packet, so I posted the poll.

Looking forward to your presentation.

http://norcal-brandmeister.org/network/repeater-map/

There are about a half dozen of us that have radios locally that I am aware of. There is very little local activity. Perhaps if more people purchased radios, that would change. There are cheap radios out there but they are full of bugs. I would recommend a Connect Systems CS-750 as a minimum (no longer a current model). The Motorola XPR series radios are nicer.

I will be giving a presentation on DMR at a future PRARC club meeting. I have no plans to replace my analog repeaters with digital at this time.

Ron W6FM

p.s. I am glad you didn't change your call Ernie.

On 03/25/2017 03:29 PM, Ernest Davis egd93420@... <mailto:egd93420@...> [sloecc] wrote:

Here is the first one. Some people in SLOECC are looking into digital repeaters. Personally, I think that would be nice, but in San Luis county (and north SS cry), I think we really need to get more people using existing repeaters. I have seen a noticeable decline in repeater usage as the SM Elks have gotten more inactive.

If you want to joint the SLOECC Yahoo group, I think there is a link at the bottom. This group is unmoderated, and puts out two emails each week for the 19:45 county wide net. Other than that several others a month, except the Bonham usage which has been about 10 this last week. I have to go upstairs to forward those to you as the smart phone is akward.

Hi All,

This hopefully will be the last post here on this topic. After an offline discussion it was decided to create a Central Coast DMR Yahoo group. This group is for anyone who is interested in DMR, P25, DStar or Fusion. The url is:

https://groups.yahoo.com/neo/groups/ccdmr

To prevent spam it is a restricted group. You will have to request to join the group if you want to participate.

73,

Ron W6FM

1088. Hands-free Public Safety Law

Yahoo group: sloecc
Date: 2017-03-31 20:41:53 UTC
From: Ron Patterson
Topic: 1088 Message: 1088
Attachments: 1 described; binary payloads are missing from this source WARC

Effective January 1, 2017, Section 23123.5 of the California Vehicle Code (CVC) was amended by Assembly Bill 1785 which was poorly written and appeared to make operating a two way radio illegal to operate while driving. CHP has sent an email to all commands on March 28th to clarify the enforcement of this section. The paragraph of the email that excludes permanently installed two way radios from this section is below.

For the purposes of Section 23123.5(f) CVC, a radio installed and mounted in a vehicle with a wired hand microphone (e.g., business band or citizen band [CB]radio) is not considered a wireless communication device, nor is it considered a specialized mobile radio device, and therefore is not subject to enforcement under this section.

The entire email is attached.

I am not a legal expert but it this email does say installed and mounted. I would think that unless you mount the HT it would not be legal to use while driving. Commercial handie talkies had a mobile charger with a pocket that they plugged into. Perhaps you could modify a cell phone mount for use with your HT.

From: John Bonnett
Topic: 1089 Message: 1090

I think one could argue that an HT sitting in a cup holder, with an external antenna, and a hand held mic, is "installed" because of the external antenna. Noting that without the external antenna, an HT inside a metal box is next to useless.

So holding the rubber duck out the window with one hand and holding the aux mic in the other, while driving... :)

It's about safety, and most of us do, and all of us should, not use the mic when it's unsafe. "Driving in traffic" is a well understood reply to a question asked over the radio.

At my work we have HTs in a holster on our sides with a speaker mic when we drive the vehicle, perfectly legal.

1096. [sloecc] Board Meeting, draft minutes from March

Yahoo group: sloecc
Date: 2017-04-11 14:31:33 UTC
From: Michael Lindsay
Topic: 1094 Message: 1096

Minutes from SLOECC Board Meeting

14 Mar. 2017

4/10/17 draft

President T. Tengdin called meeting to order at 09:10 at Dairy Creek Golf course, SLO.

*Attendees:*

N. Swanberg, M. Lindsay, D. Garth, W. Fageol, G. Lugo, R. Dickey, T. Tengdin, J. Wagner, J. Bonnett, M. Mason, R. Patterson, Scott Milner from OES.

*Secretary's Report*

Draft minutes from 2/14/17 were distributed and approved with several changes.

*Treasurer's Report*

No change at $8,317 not including gift cards.

Tom spent $187.94 on generator cable, packet switch, and insulator for tower trailer using PGE gift card.

*Old Business*

1.

T. Tengdin continues to assemble speakers for use with the noise canceling headphones.

2.

SLOECC will do a check of antennas at all the ECCs.

3.

T. Tengdin will pursue replacing the PCs at the EOC.

4.

SLOECC will use the results of the ARES/RACES training held at Santa Maria.

5.

John and Mike to put back up the HF antenna at EOC.

*New Business*

6.

Tom to ask PGE to help put up the ECC-6 antenna.

7.

Neal volunteers to help V make whatever changes the county wants to make to the RACES plan.

8.

Ron thinks we should inventory and bar code all the SLOECC radio equipment. Tom volunteered to make bar code labels. Tow to write emails to sites requesting number needed.

9.

Tass digipeater still needs fixing. As road is very poor, we will wait till county goes there.

10.

Neal will email south county re: date for So. County general meeting in September or October.

11.

Mary needs more hams for Eroica bike ride Apr. 8.

12.

Will Benedict needs hams for Wildflower bike ride Apr.9.

13.

Tassajara APRS digipeater was programmed to repeat more packets than it should. That was fixed.

14.

ECC-12 got permission to put up an HF antenna.

15.

ECC-3 ham shack: Ron working on ham shack suitable to the sergeant. See photos of space sent by email last night. John and Ron to visit with various proposals for approval. Also needs a printer.

16.

Dave met with ARRL section manager to discuss part-time connectivity of SLO repeater(s) with S. Barbara Co. Cactus net for weekly AES state-wide net. 2 options: 1-Cactus owned and operated at Tass. 2-repurpose Ron's repeater on Tass or Mt. Lowe with hardware

upgrades. Motion carried for Ron to pursue a Cactus Net connection in SLO Co.

17.

A new SLO airport building is being built which includes a new alternate EOC. Ham shack to be ready in a few more months.

18.

Dick messaged that he wanted guidance on SLOECC logos on new clothing orders. The decision was made previously that such could be ordered if the owner had a valid SLO RACES badge.

19.

Bill announced that ERC has purchased 10 dual-band Hts to give away to new ERC hams provided they agree to check into the weekly SLOECC net.

20.

Proposed La Panza county repeater site (near 35.1 -119.87): Tom and Ron to draft a letter (to be approved by this board) to request that the county include a ham repeater at this site to improve coverage in the East county.

21.

Dave is still working on trying to see the SLO fire chief to get on the agenda of the fire chief's meeting to promote use of hams in fire events.

22.

Consensus to change ?contact name? on ECC database to ?responsible person?

23.

John reported that the SLOECC packet system is down. The problem is at EOC. John will investigate tonight.

Meeting adjourned at 10:15. Next meeting is 11 Apr.

Mike Lindsay, AD7RZ, Secretary

Motion carried for Ron to pursue a Cactus Net connection in SLO Co.

17.

A new SLO airport building is being built which includes a new alternate EOC. Ham shack to be ready in a few more months.

18.

Dick messaged that he wanted guidance on SLOECC logos on new clothing orders. The decision was made previously that such could be ordered if the owner had a valid SLO RACES badge.

19.

Bill announced that ERC has purchased 10 dual-band Hts to give away to new ERC hams provided they agree to check into the weekly SLOECC net.

20.

Proposed La Panza county repeater site (near 35.1 -119.87): Tom and Ron to draft a letter (to be approved by this board) to request that the county include a ham repeater at this site to improve coverage in the East county.

21.

Dave is still working on trying to see the SLO fire chief to get on the agenda of the fire chief's meeting to promote use of hams in fire events.

22.

Consensus to change ?contact name? on ECC database to ?responsible person?

23.

John reported that the SLOECC packet system is down. The problem is at EOC. John will investigate tonight.

Meeting adjourned at 10:15. Next meeting is 11 Apr.

Mike Lindsay, AD7RZ, Secretary

1099. WB6FMC 70cm View Hill

Yahoo group: sloecc
Date: 2017-04-16 21:03:03 UTC
From: John Henry
Topic: 1099 Message: 1099

Good afternoon,

I've gotten in touch with Charlie WB6FMC about the non-operational 70cm machine on View Hill.

He had disabled repeat function some time ago due to abuse. It's is now operational again and may stay on 24/7 or follow the 2M machine's schedule of 0600 - 2100 hours.

I've tested and it works beautifully now. (No tone on output FYI).

Also the 2M View Hill machine is back to 24/7... really needed it the other night on a HEET call out but it was already shut off. Charlie resumed the normal schedule after I sent some details. It was in a spot Lopez and Orcutt didn't work well on.

It's been there since 2003. I modified the Mitreks, added the PL, donated and tuned the cavities and enclosure.

It has been pretty reliable for a long time. I talked on it last night as I was leaving Huasna, and will talk on it more since I am moving out there.

I will be moving my repeater that is on 146.175 to the area as well, but it will be a little higher when I am done with it.

I just keyed it a minute ago.. I have not maintained it much lately though since I know it is moving.

Actually, all I will be using are the cavities. The rest will be scrapped.

It's been there since 2003. I modified the Mitreks, added the PL, donated and tuned the cavities and enclosure.

It has been pretty reliable for a long time. I talked on it last night as I was leaving Huasna, and will talk on it more since I am moving out there.

I will be moving my repeater that is on 146.175 to the area as well, but it will be a little higher when I am done with it.

I do not know where you were at, but do you know there is a repeater in Hausna that has pretty good coverage. 147.030 + & 127.3. Met a heet person at the test last Sat and I think there was someone(s) taking the test.

Also the 2M View Hill machine is back to 24/7... really needed it the other night on a HEET call out but it was already shut off. Charlie resumed the normal schedule after I sent some details. It was in a spot Lopez and Orcutt didn't work well on.

I did know about Huasna but I was having issues getting the other operator to change channels. I have two direct channels programmed on her radio (Tass and View Hill).

Interestingly, on Sunday HEET responded to a fire on Camino Caballo in Nipomo and relocated three horses out of the smoke. The owner of the horses (and the barn that burned down) was Julie Klien... Charlie's daughter. Small world, especially considering we were on his repeater at the time.

1118. draft minutes--sloecc April

Yahoo group: sloecc
Date: 2017-04-27 04:29:46 UTC
From: Michael Lindsay
Topic: 1118 Message: 1118

Minutes from SLOECC Board Meeting

11 Apr. 2017

21 April draft

President T. Tengdin called meeting to order at 09:05 at Dairy Creek Golf Course, SLO.

*Attendees:*

Neal Swanberg, Mike Lindsay, Dave Garth, William Fageol, Greg Lugo, Richard Dickey, Tom Tengdin, John Bonnett, Mary Mason, Ron Patterson, George Rodriguez, Max Sicher, and V. Havandjian.

*Secretary's Report*

Draft minutes from 3/14/17 were distributed and approved with 3 minor corrections.

*Treasurer's Report*

No change at $8,317 not including 4 PGE gift cards which have been partially used.

We need new signatures for the bank account. Robobank has no fee for nonprofits. Also, the name of the bank has changed. The officers now are: president Tom, vice president John, secretary Mike, treasurer Richard.

*Old Business*

1.

Noise canceling headphones: Tom continues to assemble.

2.

SLOECC do SWR check of antennas at all the ECCs.

3.

ECC PCs: Tom pursue replacing the PCs at the EOC.

4.

SLOECC will use the results of the ARES/RACES training held at Santa Maria.

5.

EOC HF antenna: john looked more closely at the old HF antenna location at EOC. The tree tops are only 5 ft. below the LOSof the old antenna. We will need a new plan. Ron says a vertical antenna will not work well enough. We need 40, 80, 160 m. We should look at all options including loop. V. noted that vacant Camp SLO property is to the south of EOC. V. will be included in the planning.

6.

SLOECC radio equipment inventory and bar codes: It was suggested that comm shop phone number be used on the label.

7.

ECC-3 (Atascadero) ham shack: John and Ron visited. Ron says the design for a radio cabinet under the countertop has been approved by the sheriff. John estimates that the custom wood cabinet is under $250. A motion was approved for John to construct a wooden cabinet not to exceed $250. Tom will give John a PGE gift card. Ron says we need to remote control the radios to the countertop and put the HF radio on the top shelf of the cabinet under the shelf. He recommends we buy: a Kenwood TMD-710 which includes a TNC $550, a Kenwood V71A for $335, a data cable, a remote mount kit for the V71A, and a laser printer. The PC there is OK. Estimate total cost $1,250. The motion was approved to allow NTE $1,300 for the above to Ron.

8.

Cactus Intertie System: Rom reports discussions are ongoing & very positive. All links are RF. Motion carried for Ron to pursue a connection to Cactus in SLO Co.

9.

RACES plan: Neal to send the races plan to V.

10.

SLOECC packet system is still down. The PC is OK Suspects the satellite internet link (WildBlue/Exede). He is pessimistic that WildBlue will be helpful in resolving this. Looking at alternatives.

11.

Erection of ECC-12 HF antenna: Dave plans to talk to Steve Martin, mayor of Paso Robles.

12.

ECC-6 HF antenna: Tom to ask PGE to help put up.

13.

RACES plan: Neal send it to V. for final revisions.

14.

Fire chiefs meeting: Cal fire chief is Scott. Dave got on the agenda and attended the quarterly meeting for outsiders. They just sit and listen, no questions, and no notetaking, then they go into close session. No feedback to report.

*New Business *

6.

La Panza Site: V. reports the microwave is working and the tower is being built. The UHF and VHF Tate county repeaters are on order. They will need environmental impact studies for both the Cuesta and La Panza sites.

7.

Tom to make 3 to 6 headset adapters for the new Alinco radios.

8.

Joint SLOECC / PR club meeting: May 1 at the Warbird Museum, Paso Robles.
Subject: Data Mode Communications

9.

Tom to pay website renewal.

10.

SLOECC general meeting in So. county is set for Oct. 25 in Oceano Sherriff substation.

11.

A new SLO airport building is being built which includes a new alternate EOC. Ham shack to be ready in a few more months. V. already requested two dual-band radios. We agreed we should put the new radios at the EOC and move the old radios to the alternate EOC.

12.

George says there's a VOAD meeting on 26 April Wednesday at 2:30 PM. Dave says there will be a VOAD call-out test of the top tier only on or before that date.

13.

ECC-6 HF antenna: Dave to reach out to P.R. mayor Steve Martin and Police Chief.

14.

Emergency plans: Neil says there are many good & informational emergency response plans on the web. See: http://www.slocounty.ca.gov/OES/plans.htm

The meeting was adjourned at 10:02 AM.

Mike Lindsay, AD7RZ, Secretary

1119. Website Inaccuracies

Yahoo group: sloecc
Date: 2017-04-28 19:17:16 UTC
From: John Henry
Topic: 1119 Message: 1119

Hello Gents,

It appears there are a couple of errors on the SLOECC freqency list:

Lopez Hill shows the callsign as W6YDZ when it's a W6SLO repeater.

Cal Poly VHF shows a tone of 127.3. That repeater is a split tone system
(91.5 in, 127.3 out).

Also, maps are still showing Lopez Mountain instead of Lopez Hill.

John W6JBH

All,

SLOECC president and secretary are out of town this coming week, as is Neal and maybe others.

If there are no pressing issues, I propose we cancel the SLOECC Board meeting for this Tuedsay, May 9th.

If anyone has any pressing business for the board, please to me, otherwise we shall assume the meeting has been canceled.

Best!

John Bonnett
Vice-President

1139. Testing Digital AVL over SLOECC Repeater(s)

Yahoo group: sloecc
Date: 2017-06-10 01:36:47 UTC
From: John Henry
Topic: 1139 Message: 1139

Good afternoon gentlemen,

I seek your permission to run a series of tests during off-peak hours.

I would like to see the viability of using Kenwood's Fleetsync protocol for short messaging with GPS information over existing infrastructure.

While APRS is intriguing and very powerful, I'd like to experiment with this alternative as it doesn't require dedicated infrastructure like APRS does. It can be decoded with a low cost surplus Kenwood mobile radio and an AVL software (https://sites.google.com/a/morganized.com/radtext/)

With your permission, I would have a stationary mobile radio configured as a base station to recieve and decode the packets, which would then show up on a map display, very similar to APRS. I would do this on non-primary repeaters (such as Lopez Hill) rather than the county-wide machines like Tassajara.

Thank you for your time and consideration.

John W6JBH

1142. [sloecc] draft minutes--sloecc April

Yahoo group: sloecc
Date: 2017-06-12 00:48:52 UTC
From: Michael Lindsay
Topic: 1118 Message: 1142

Minutes from SLOECC Board Meeting

11 Apr. 2017

21 April draft

President T. Tengdin called meeting to order at 09:05 at Dairy Creek Golf Course, SLO.

*Attendees:*

Neal Swanberg, Mike Lindsay, Dave Garth, William Fageol, Greg Lugo, Richard Dickey, Tom Tengdin, John Bonnett, Mary Mason, Ron Patterson, George Rodriguez, Max Sicher, and V. Havandjian.

*Secretary's Report*

Draft minutes from 3/14/17 were distributed and approved with 3 minor corrections.

*Treasurer's Report*

No change at $8,317 not including 4 PGE gift cards which have been partially used.

We need new signatures for the bank account. Robobank has no fee for nonprofits. Also, the name of the bank has changed. The officers now are: president Tom, vice president John, secretary Mike, treasurer Richard.

*Old Business*

1.

Noise canceling headphones: Tom continues to assemble.

2.

SLOECC do SWR check of antennas at all the ECCs.

3.

ECC PCs: Tom pursue replacing the PCs at the EOC.

4.

SLOECC will use the results of the ARES/RACES training held at Santa Maria.

5.

EOC HF antenna: john looked more closely at the old HF antenna location at EOC. The tree tops are only 5 ft. below the LOSof the old antenna. We will need a new plan. Ron says a vertical antenna will not work well enough. We need 40, 80, 160 m. We should look at all options including loop. V. noted that vacant Camp SLO property is to the south of EOC. V. will be included in the planning.

6.

SLOECC radio equipment inventory and bar codes: It was suggested that comm shop phone number be used on the label.

7.

ECC-3 (Atascadero) ham shack: John and Ron visited. Ron says the design for a radio cabinet under the countertop has been approved by the sheriff. John estimates that the custom wood cabinet is under $250. A motion was approved for John to construct a wooden cabinet not to exceed $250. Tom will give John a PGE gift card. Ron says we need to remote control the radios to the countertop and put the HF radio on the top shelf of the cabinet under the shelf. He recommends we buy: a Kenwood TMD-710 which includes a TNC $550, a Kenwood V71A for $335, a data cable, a remote mount kit for the V71A, and a laser printer. The PC there is OK. Estimate total cost $1,250. The motion was approved to allow NTE $1,300 for the above to Ron.

8.

Cactus Intertie System: Rom reports discussions are ongoing & very positive. All links are RF. Motion carried for Ron to pursue a connection to Cactus in SLO Co.

9.

RACES plan: Neal to send the races plan to V.

10.

SLOECC packet system is still down. The PC is OK Suspects the satellite internet link (WildBlue/Exede). He is pessimistic that WildBlue will be helpful in resolving this. Looking at alternatives.

11.

Erection of ECC-12 HF antenna: Dave plans to talk to Steve Martin, mayor of Paso Robles.

12.

ECC-6 HF antenna: Tom to ask PGE to help put up.

13.

RACES plan: Neal send it to V. for final revisions.

14.

Fire chiefs meeting: Cal fire chief is Scott. Dave got on the agenda and attended the quarterly meeting for outsiders. They just sit and listen, no questions, and no notetaking, then they go into close session. No feedback to report.

*New Business *

6.

La Panza Site: V. reports the microwave is working and the tower is being built. The UHF and VHF Tate county repeaters are on order. They will need environmental impact studies for both the Cuesta and La Panza sites.

7.

Tom to make 3 to 6 headset adapters for the new Alinco radios.

8.

Joint SLOECC / PR club meeting: May 1 at the Warbird Museum, Paso Robles.
Subject: Data Mode Communications

9.

Tom to pay website renewal.

10.

SLOECC general meeting in So. county is set for Oct. 25 in Oceano Sherriff substation.

11.

A new SLO airport building is being built which includes a new alternate EOC. Ham shack to be ready in a few more months. V. already requested two dual-band radios. We agreed we should put the new radios at the EOC and move the old radios to the alternate EOC.

12.

George says there's a VOAD meeting on 26 April Wednesday at 2:30 PM. Dave says there will be a VOAD call-out test of the top tier only on or before that date.

13.

ECC-6 HF antenna: Dave to reach out to P.R. mayor Steve Martin and Police Chief.

14.

Emergency plans: Neil says there are many good & informational emergency response plans on the web. See: http://www.slocounty.ca.gov/OES/plans.htm

The meeting was adjourned at 10:02 AM.

Mike Lindsay, AD7RZ, Secretary

1150. Re: [sloecc] Testing Digital AVL over SLOECC Repeater(s)

Yahoo group: sloecc
Date: 2017-06-25 01:49:58 UTC
From: John Bonnett
Topic: 1139 Message: 1150

The problem with embedded data on a voice channel is that if you transmit the data at the beginning, everyone will have to learn to not begin talking for about 2 seconds after pressing the transmit button or the first few words will be lost, which would be who you are calling to start with, and the first half of every sentence.

I don't think it will take too many "could you repeat" requests before you bring all the radios back in to turn off the data. And besides, we get a lot of "could you repeat" just because of the hills in our county. Don't need to make it worse.

Then there is training people to remember to wait. Ah, good luck with that... :)

If fleet-sync data is set to transmit after, then everyone has to wait for the tail before reply, and you'll get "could you repeat".

Then, everyone without a fleetsync radio would have to put up with the squawk, which after just a few minutes you'll just want to turn your radio off. I worked a ride using a repeater that had three tones at the end of the repeater tail. It was awful. Never want to do that again. But it was a good way for the repeater owner to keep people from using his repeater...

I have a Kenwood D-710 with APRS on B and voice on A. Nice for one radio, but because of the APRS I get dropouts on voice. This is Ok for ragchewing while driving around town, but when SAGging or Sweep on a run/ride I really need to have a separate tracking radio as the dropouts are a bigger liability than the position is an asset. If I was working an emergency, I would ditch the APRS, I can call in my position if needed without risk of voice dropouts.

To answer your question, SLOECC doesn't mind if you test this. But it's not a practical solution for tracking as the drawbacks are greater than the gain.

John

From: John Henry
Topic: 1139 Message: 1151

Thank you for the input. Just from my personal testing, I found out that beginning of transmit IDs are extremely frustrating.

My proposed implementation would have the radios set up with this ability on a per-channel basis. In addition, the radios could also be configured on a Poll-Only basis, meaning they would only transmit their position when requested. They would never be configured to transmit automatically like an APRS station.

John

1154. SLOECC board minutes final 11 April

Yahoo group: sloecc
Date: 2017-06-27 14:17:12 UTC
From: Michael Lindsay
Topic: 1154 Message: 1154

Minutes from SLOECC Board Meeting

11 Apr. 2017

27 June final

The May meeting was cancelled due to absence of 2 officers.

President T. Tengdin called meeting to order at 09:05 at Dairy Creek Golf Course, SLO.

*Attendees:*

Neal Swanberg, Mike Lindsay, Dave Garth, William Fageol, Greg Lugo, Richard Dickey, Tom Tengdin, John Bonnett, Mary Mason, Ron Patterson, George Rodriguez, Max Sicher, and V. Havandjian.

*Secretary's Report*

Draft minutes from 3/14/17 were distributed and approved with 3 minor corrections.

*Treasurer's Report*

No change at $8,317 not including 4 PGE gift cards which have been partially used.

We need new signatures for the bank account. Robobank has no fee for nonprofits. Also, the name of the bank has changed. The officers now are: president Tom, vice president John, secretary Mike, treasurer Richard.

*Old Business*

1.

Noise canceling headphones: Tom continues to assemble.

2.

SLOECC do SWR check of antennas at all the ECCs.

3.

ECC PCs: Tom pursue replacing the PCs at the EOC.

4.

SLOECC will use the results of the ARES/RACES training held at Santa Maria.

5.

EOC HF antenna: john looked more closely at the old HF antenna location at EOC. The tree tops are only 5 ft. below the LOSof the old antenna. We will need a new plan. Ron says a vertical antenna will not work well enough. We need 40, 80, 160 m. We should look at all options including loop. V. noted that vacant Camp SLO property is to the south of EOC. V. will be included in the planning.

6.

SLOECC radio equipment inventory and bar codes: It was suggested that comm shop phone number be used on the label.

7.

ECC-3 (Atascadero) ham shack: John and Ron visited. Ron says the design for a radio cabinet under the countertop has been approved by the sheriff. John estimates that the custom wood cabinet is under $250. A motion was approved for John to construct a wooden cabinet not to exceed $250. Tom will give John a PGE gift card. Ron says we need to remote control the radios to the countertop and put the HF radio on the top shelf of the cabinet under the shelf. He recommends we buy: a Kenwood TMD-710 which includes a TNC $550, a Kenwood V71A for $335, a data cable, a remote mount kit for the V71A, and a laser printer. The PC there is OK. Estimate total cost $1,250. The motion was approved to allow NTE $1,300 for the above to Ron.

8.

Cactus Intertie System: Ron reports discussions are ongoing & very positive. All links are RF. Motion carried for Ron to pursue a connection to Cactus in SLO Co.

9.

(deleted)

10.

SLOECC packet system is still down. The PC is OK Suspects the satellite internet link (WildBlue/Exede). He is pessimistic that WildBlue will be helpful in resolving this. Looking at alternatives.

11.

Erection of ECC-12 HF antenna: Dave plans to talk to Steve Martin, mayor of Paso Robles.

12.

ECC-6 HF antenna: Tom to ask PGE to help put up.

13.

RACES plan: Neal send it to V. for final revisions.

14.

Fire chiefs meeting: Cal fire chief is Scott. Dave got on the agenda and attended the quarterly meeting for outsiders. They just sit and listen, no questions, and no note-taking, then they go into close session. No feedback to report.

*New Business *

6.

La Panza Site: V. reports the microwave is working and the tower is being built. The UHF and VHF Tate county repeaters are on order. They will need environmental impact studies for both the Cuesta and La Panza sites.

7.

Tom to make 3 to 6 headset adapters for the new Alinco radios.

8.

Joint SLOECC / PR club meeting: May 1 at the Warbird Museum, Paso Robles.
Subject: Data Mode Communications

9.

Tom to pay website renewal.

10.

SLOECC general meeting in So. county is set for Oct. 25 in Oceano Sheriff substation.

11.

A new SLO airport building is being built which includes a new alternate EOC. Ham shack to be ready in a few more months. V. already requested two dual-band radios. We agreed we should put the new radios at the EOC and move the old radios to the alternate EOC.

12.

George says there's a VOAD meeting on 26 April Wednesday at 2:30 PM. Dave says there will be a VOAD call-out test of the top tier only on or before that date.

13.

ECC-6 HF antenna: Dave to reach out to P.R. mayor Steve Martin and Police Chief.

14.

Emergency plans: Neil says there are many good & informational emergency response plans on the web. See: http://www.slocounty.ca.gov/OES/plans.htm

The meeting was adjourned at 10:02 AM.

Mike Lindsay, AD7RZ, Secretary

1160. draft minutes from June SLOECC board meeting

Yahoo group: sloecc
Date: 2017-07-11 05:27:20 UTC
From: Michael Lindsay
Topic: 1160 Message: 1160

Minutes from SLOECC Board Meeting

13 June 2017

9 July draft

President T. Tengdin called meeting to order at 09:01 at Dairy Creek Golf Course, SLO.

*Attendees:*

Tom Tengdin, Mike Lindsay, Bill Bailey, Bill Fageol, Mary Mason, John Bonnett, Richard Dickey, George Rodriguez, Dick Watts, Jim Wagner, Neal Swanberg, Greg Lugo, and V. Havandjian.

_*Secretary's*__*Report*_

Draft minutes from 4/11/17 were distributed and approved with 2 minor corrections: spelling error of Ron. & # 13 & 9 are duplicates.

*Treasurer's Report*

No activity and no change at $8,317.

Signatures are on hold until July 17. The four officers need to sign signatures card with the new bank: “Pacific Premier Bank”. There is a 30 page change document. Some of the changes are not defined. need to pay approximately $30 for endorsement stamp . Routing number and account numbers will change. also need new credit cards.

*Old Business*

1.

Noise canceling headphones: Tom continues to assemble.

2.

SLOECC do SWR check of antennas at all the ECCs.

3.

ECC PCs: Tom pursue replacing the PCs at the EOC. Tom to get prices.

4.

Tom is the POC for the sloecc.org website renewal for one year with network solutions. sloecc.com is not up for renewal yet. V--next month the county website will be updated. V. will review.

5.

SLOECC will use the results of the ARES/RACES training held at Santa Maria. Dick--add attendees to our training records. If anyone takes FEMA training (100 200 700 800) or ARRL EMCOM training they should send training records to Dick.

6.

EOC HF antenna: John--new location chosen is slope down to hill directly south of pole on EOC. Comm Shop has a pole for the hill end. Tom has 3/16 inch cord for guying which is probably not good enough.

7.

SLOECC radio equipment inventory and bar codes: It was suggested that comm shop phone number be used on the label.

8.

ECC-3 (Atascadero) ham shack.

9.

Cactus Intertie System.

10.

SLOECC packet system went back up by Tom 3 weeks ago. He rebooted all hardware. Today the packet is down again. John plans to reboot today.

11.

Erection of ECC-12 (Cambria) HF antenna.

12.

Tom to make 3 to 6 headset adapters for the new Alinco radios.

13.

ECC-6 (PR) HF antenna: Dave to reach out to P.R. mayor Steve Martin and Police Chief. Tom to ask PGE to help put up.

*New Business *

1.

ICS agency rep training--Tom--Tom approved in Santa Barbara June 19 all day training session.

2.

New county repeater--V.--Site near highways 41/46 junction was funded and then pulled. It probably will be refunded sometime in the future.

3.

County exercise--George--There will be a county EMAD (evacuee monitoring and decontamination) exercise 20 September and 25 October. same people should be at work should work both dates. First one is a practice the second one is the real thing. FEMA will evaluate it. Put on by the county. we probably want a couple people at a couple of ECCs. It will be based at Camp Roberts. Volunteers should contact V. Assume 4 volunteers. Not planning to use EOC is not expected to be used assume for volunteers now.

4.

New Ham--Tom--V. did ham-cram in April. He has a PowerWerx $150 Tera dual band HT.

5.

New airport terminal building--V.--moving along in construction. New radio equipment is to go to the EOC, and the old EOC equipment is to go to the airport alternate DOC. V to determine what to do about computer and a printer. John said Kenwood FM has a built-in TNC.

6.

Donated Radios--We received 8ea. Kenwood TK790H VHF and 1ea. TK890 UHF mobile radios from PG&E. Temporarily stored in John's office. We asked PG&E for more radios. A 4' x 4' x 2' crate arrived at Tom's house from PG&E full of radios. Tom to inventory. They need to be reprogrammed by PG&E before they can be released to us. Need to see if TK5710 will be discontinued at the end of the year. We typically use those to replace the packet radios (GM 300). The 790 has DTMF decoder so perhaps could be used for after hours alerting--something we need. CHIRP does not work with these radios--need to use Kenwood software. V. says the Comm shop can fix these radios & they have all the spare parts.

7.

Training--Tom sent to George CSTI 100, 300, 700, (800?) earthquake scenario training this year for train the trainers. Next year the actual training will take place.

8.

Monthly general SLOECC meeting--EMAD Nuclear 101 training confirmed for August 23.

9.

Script--Dick--The new script for SLOECC net is on the website.

10.

SLOECC General Meeting-- for June is HT training. Tom can also program radios . Mary recommends to put manuals in iBooks.

11.

Request from HEET--John reported that John Henry from HEET is requesting permission to use the SLOECC recruiters for testing purposes adding GPS position similar to APRS on each transmission. NBC1200 FleetSync. We agree that it is OK. Our concern is that the noise may be annoying and the required waits may be problematic. The good news is it helps stuck mic problem because it allows us to know where the stuck mic is if the transmission is put at the beginning of the transmission.

12.

Siren Test--John--John will be on vacation part of time between now and test. The WarBird Museum people wants to help staff the test.

13.

CD--Richard Dickey found a 2004 CD from Avery for the historian to put away.

14.

County proclamation--Dick--Received SLO county proclamation for ham radio in June. This is the 3rd proclamation. Tom to frame it on the wall at the EOC. Have still photos and a 95 MB video. Discovered that Councilman Gibson is a ham. Tom will write a paragraph to it and how many knee and many hams we have lights in the county meeting.

The meeting was closed at 09 56.

1162. Posted to the SHARES (FEMA) Training group

Yahoo group: sloecc
Date: 2017-07-11 21:45:34 UTC
From: John Bonnett
Topic: 1162 Message: 1162

This arrived in my Inbox after the SLOECC Board meeting today. For those not familiar with SHARES, it's a network of mostly Hams and Mars operators located mostly on the east coast and mid-west. For us it would be an earthquake rather than a funnel cloud.

I thought the timing was good.

--
TO ALL SHARES STATIONS
UNCLAS

SUBJ: Training Tip 12-17 (Question)

1. The skies are dark, lightning is striking across the horizon in all directions, the rains are pouring down, and the winds are howling! Off in the horizon a "funnel" cloud is observed that appears to be on the ground. Debris is flying all around and you have your televisions, radios, and other alerting systems on. Severe and heavy damaging storms are occurring in your area when all of a sudden the power goes off and all alerts and systems you depend on for information is no longer available. You are prepared (aren't you) so you go out and switch on your emergency power only to find that none of your alert systems for information is available. You turn to your SHARES radio system to send a message to your RCS and Net Control stations to alert them to your situation!

2. You bring up your SHARES system and are feeling great now because you will be able to let someone know what it happening and that assistance may be needed. After preparing your message and posting it in Winlink Express you "send" the message. All of a sudden you get an error saying the message could not be delivered because there is no CMS available. You check everything and all your setting are correct but, you check the internet connection and low and behold the connection that NEVER goes down is now not available.

3. You scratch your head and try to remember how to work the system WITHOUT an internet connection. No good, you just can't recall how to do it because you have not used the RADIO capability of the system in months or years!

4. Could this scenario be you and your station?? (ECC5, for instance)

Minutes from SLOECC Board Meeting

13 June 2017

12 July final--no change from draft

President T. Tengdin called meeting to order at 09:01 at Dairy Creek Golf Course, SLO.

*Attendees:*

Tom Tengdin, Mike Lindsay, Bill Bailey, Bill Fageol, Mary Mason, John Bonnett, Richard Dickey, George Rodriguez, Dick Watts, Jim Wagner, Neal Swanberg, Greg Lugo, and V. Havandjian.

_*Secretary's*__*Report*_

Draft minutes from 4/11/17 were distributed and approved with 2 minor corrections: spelling error of Ron. & # 13 & 9 are duplicates.

*Treasurer's Report*

No activity and no change at $8,317.

Signatures are on hold until July 17. The four officers need to sign signatures card with the new bank: “Pacific Premier Bank”. There is a 30 page change document. Some of the changes are not defined. need to pay approximately $30 for endorsement stamp . Routing number and account numbers will change. also need new credit cards.

*Old Business*

1.

Noise canceling headphones: Tom continues to assemble.

2.

SLOECC do SWR check of antennas at all the ECCs.

3.

ECC PCs: Tom pursue replacing the PCs at the EOC. Tom to get prices.

4.

Tom is the POC for the sloecc.org website renewal for one year with network solutions. sloecc.com is not up for renewal yet. V--next month the county website will be updated. V. will review.

5.

SLOECC will use the results of the ARES/RACES training held at Santa Maria. Dick--add attendees to our training records. If anyone takes FEMA training (100 200 700 800) or ARRL EMCOM training they should send training records to Dick.

6.

EOC HF antenna: John--new location chosen is slope down to hill directly south of pole on EOC. Comm Shop has a pole for the hill end. Tom has 3/16 inch cord for guying which is probably not good enough.

7.

SLOECC radio equipment inventory and bar codes: It was suggested that comm shop phone number be used on the label.

8.

ECC-3 (Atascadero) ham shack.

9.

Cactus Intertie System.

10.

SLOECC packet system went back up by Tom 3 weeks ago. He rebooted all hardware. Today the packet is down again. John plans to reboot today.

11.

Erection of ECC-12 (Cambria) HF antenna.

12.

Tom to make 3 to 6 headset adapters for the new Alinco radios.

13.

ECC-6 (PR) HF antenna: Dave to reach out to P.R. mayor Steve Martin and Police Chief. Tom to ask PGE to help put up.

*New Business *

1.

ICS agency rep training--Tom--Tom approved in Santa Barbara June 19 all day training session.

2.

New county repeater--V.--Site near highways 41/46 junction was funded and then pulled. It probably will be refunded sometime in the future.

3.

County exercise--George--There will be a county EMAD (evacuee monitoring and decontamination) exercise 20 September and 25 October. same people should be at work should work both dates. First one is a practice the second one is the real thing. FEMA will evaluate it. Put on by the county. we probably want a couple people at a couple of ECCs. It will be based at Camp Roberts. Volunteers should contact V. Assume 4 volunteers. Not planning to use EOC is not expected to be used assume for volunteers now.

4.

New Ham--Tom--V. did ham-cram in April. He has a PowerWerx $150 Tera dual band HT.

5.

New airport terminal building--V.--moving along in construction. New radio equipment is to go to the EOC, and the old EOC equipment is to go to the airport alternate DOC. V to determine what to do about computer and a printer. John said Kenwood FM has a built-in TNC.

6.

Donated Radios--We received 8ea. Kenwood TK790H VHF and 1ea. TK890 UHF mobile radios from PG&E. Temporarily stored in John's office. We asked PG&E for more radios. A 4' x 4' x 2' crate arrived at Tom's house from PG&E full of radios. Tom to inventory. They need to be reprogrammed by PG&E before they can be released to us. Need to see if TK5710 will be discontinued at the end of the year. We typically use those to replace the packet radios (GM 300). The 790 has DTMF decoder so perhaps could be used for after hours alerting--something we need. CHIRP does not work with these radios--need to use Kenwood software. V. says the Comm shop can fix these radios & they have all the spare parts.

7.

Training--Tom sent to George CSTI 100, 300, 700, (800?) earthquake scenario training this year for train the trainers. Next year the actual training will take place.

8.

Monthly general SLOECC meeting--EMAD Nuclear 101 training confirmed for August 23.

9.

Script--Dick--The new script for SLOECC net is on the website.

10.

SLOECC General Meeting-- for June is HT training. Tom can also program radios . Mary recommends to put manuals in iBooks.

11.

Request from HEET--John reported that John Henry from HEET is requesting permission to use the SLOECC recruiters for testing purposes adding GPS position similar to APRS on each transmission. NBC1200 FleetSync. We agree that it is OK. Our concern is that the noise may be annoying and the required waits may be problematic. The good news is it helps stuck mic problem because it allows us to know where the stuck mic is if the transmission is put at the beginning of the transmission.

12.

Siren Test--John--John will be on vacation part of time between now and test. The WarBird Museum people wants to help staff the test.

13.

CD--Richard Dickey found a 2004 CD from Avery for the historian to put away.

14.

County proclamation--Dick--Received SLO county proclamation for ham radio in June. This is the 3rd proclamation. Tom to frame it on the wall at the EOC. Have still photos and a 95 MB video. Discovered that Councilman Gibson is a ham. Tom will write a paragraph to it and how many knee and many hams we have lights in the county meeting.

The meeting was closed at 09 56.

1168. N Connector D Hole Punch

Yahoo group: sloecc
Date: 2017-07-28 02:17:25 UTC
From: John Henry
Topic: 1168 Message: 1168

Hello group,

Does anyone here happen to have a D-hole punch?
I'm trying to install an N bulkhead connector onto a through panel.

The connector diagram:
https://www.amphenolrf.com/downloads/dl/file/id/3196/product/5461/082_66_customer_drawing.pdf

(Technically, this is a double flat sided 5/8 hole with a .531 diameter on the flats).

Any help would be appreciated. If not, thanks for your time.

John

John,

I have never used a D-hole punch for type N bulkhead connectors. If you tighten the nut sufficiently, they do not rotate and I have never had one come loose.

1174. Draft Minutes from SLOECC Board Meeting,,11 July 2017

Yahoo group: sloecc
Date: 2017-08-08 04:36:23 UTC
From: Michael Lindsay
Topic: 1174 Message: 1174

Minutes from SLOECC Board Meeting

11 July 2017

7 Aug DRAFT

Vice President John Bonnett called meeting to order at 09:00 at Dairy Creek Golf Course, SLO. President Tom is out of town.

*Attendees:*

Fred Campbell, Mike Lindsay, Bill Bailey, Bill Fageol, Mary Mason, Dave Garth, John Bonnett, Richard Dickey, George Rodriguez, Dick Watts, Greg Lugo, and V. Havandjian.

_*Secretary's*__*Report*_

Draft minutes from 6/13/17 were distributed and approved without change.

*Treasurer's Report*

No activity and no change at $8,317.

New bank is at 1144 Morro St. SLO. The four officers to sign at the bank within 1 year of the bank name change.

*Old Business*

1.

Noise canceling headphones: No update--Tom not present.

2.

SLOECC do SWR check of antennas at all the ECCs. Mike tested ECC-11 and the packet antenna has bas SWR but continutes to work. He plans to investigate cause.

3.

ECC PCs: Tom pursue replacing the PCs at the EOC. No update--Tom not present.

4.

EOC HF antenna: John--have all needed hardware. Will put it up soon.

5.

SLOECC radio equipment inventory and bar codes:

6.

ECC-3 (Atascadero) ham shack. No update.

7.

Cactus Intertie System. No update.

8.

SLOECC packet system: Continues to fail but work when rebooted. Most believe the problem is with Wild Blue. Competition is Hughes. Bill B. will call Wild Blue to come out and check system. Possibility of replacement with mesh network. V says county planning to move to mesh. County has its own IP backbone. Public server only. Need to create a working group.

9.

Erection of ECC-12 (Cambria) HF antenna. No update--Ron not present.

10.

Tom to make 3 to 6 headset adapters for the new Alinco radios. No update--Tom not present.

11.

ECC-6 (P.R.) HF antenna: No update--Ron not present.

*New Business *

1.

Slow progress on old business--Suggestion that actions should always be assigned to names, and not to people who are likely too busy to complete.

2.

County exercise--George--There will be a county EMAD (evacuee monitoring and decontamination) exercise 20 September and 25 October. Looking for volunteers to be evacuees. See flier from Julia Forrest.

3.

Donated PGE Radios--John--25 VHF radio with heads work. Have to type all the data in one time by hand. John will program them and keep track. All of them have their programming cleared. Two UHF radios work. One dual band radio--that is two bodies with one head work. Fred at ECC-15 needs some.

4.

Fires--John: 147.000 MHz at Broadcast Peak burned. Don't know about the UHF repeater. Greg and John to clean the brush away around the Clark repeater. Forest service standard is 30 feet. They will probably not do that much.

5.

Red Cross--Dave--Red Cross (RC) contacted Dave for more coordination. The new head is Kurt Russell. Kurt greed more R C people should get ham licenses. Dave agreed more hams should get Red Cross certification. The next day was a big fire & Dave Garth got a call from RC. They asked for training. Dave said not during an emergency. Dave said an emergency is is when someone is dying. It was an intense exchange. Dave has applied to be Red Cross volunteer. RC doesn't know what they have for radio equipment. RC doesn't know which license to get or even if a license is required. RC doesn't know where repeaters are. Dave is discussed with Ron. Dave got a call from OES that Kelly Tempest Gate threatened.. It was intense exchange. RC did not have VOAD (Rick London) phone number. Also the fire was not in our county. Not in our building. RC sold some of their vehicles without first removing the radios. Dave thinks RC doesn't have a relationship with Santa Barbara hams. Dave will look at the the existing national MOU between ARRL and RC. http://www.arrl.org/files/file/Public%20Service/MOUs/2016_01_06_MOU_ARRL_Red%20Cross_FINAL.pdf

6.

General meeting topic--Mary--Paul Merrill W7IV DXpedition. Paul will be back in town October or November. Island in south Atlantic ocean. Maybe a joint meeting with Paso Robles.

The meeting was closed at 10:03

RE: Item 8 of old business, I'd like to suggest that SLOECC look into contacting the Local WISP (wireless internet service providers) as they usually are on the mountaintops already. RanchWifi is on Tassajara and Rocky Butte. Maybe something could be worked out with them. Then you lose the high latency and poor reliability associated with satellite.

As some of you may have noticed, i resumed testing last night using Lopez Hill. After making a few settings adjustment to the base radio, I determined this round of testing a success.
(Tested was delayed due to misplacing of my gps speaker mic)
Test was using a 5W portable, through repeater, to a base unit at home. The only issue I could tell was when polling the radio for its position, I wouldn't get a good ACK message if the signal was weak. The radio would transmit automatically via end of transmit PTT ID, but wouldn't respond to the poll properly. I was able to test this morning from work (much closer to Lopez) and was successfully able to poll the radio. I imagine it also depends on the repeater hang time. I had to increase the ACK wait time to 5 seconds to clear the squelch tail.
My next test will likely be tomorrow night, using Cuesta. Playtime is usually around 10pm. Further tests will include a GPS attached to a mobile radio with 50W out to determine if that improves the position polling.
This is relevant as the radios HEET is using do have a basic GPS AVL option board. This would be a plus in my mind as we could reuse the existing repeaters with only a 2-3 second MSK string at end of transmit.
We've been trying to come up with solutions to GPS tracking of HEET teams. Many have offered APRS as a solution. I (and others) feel that this is not an appropriate solution for HEET:1.) location information is not private and is easily accessed via aprs.is for years--HEET needs to keep the locations of pickups somewhat confidential 2.) aprs requires either another radio and another antenna (or else a big expensive radio) and a learning curve for the user with that. Not to mention most home brew APRS units leave much to be desired aesthetically. Our units need to be easily transportable from vehicle to vehicle as assignments change 3.) many hams forget the target audience. APRS is powerful and has many features--too many for our use4.) poor digipeater coverage in the remote parts of the county--where we will be most of the time

The plug in GPS board will cost around $140 per radio and is turn-key.
We are open to all options and ideas that you may have in this regard. Thank you for your time today.

Good afternoon gentlemen,
I seek your permission to run a series of tests during off-peak hours.
I would like to see the viability of using Kenwood's Fleetsync protocol for short messaging with GPS information over existing infrastructure.
While APRS is intriguing and very powerful, I'd like to experiment with this alternative as it doesn't require dedicated infrastructure like APRS does. It can be decoded with a low cost surplus Kenwood mobile radio and an AVL software (https://sites.google.com/a/morganized.com/radtext/)
With your permission, I would have a stationary mobile radio configured as a base station to recieve and decode the packets, which would then show up on a map display, very similar to APRS. I would do this on non-primary repeaters (such as Lopez Hill) rather than the county-wide machines like Tassajara.
Thank you for your time and consideration.

Minutes from SLOECC Board Meeting

8 Aug. 2017

DRAFT11 Sept. 2017

President Tom Tengdin called meeting to order at 09:05 at Charlie's Place restaurant, 981 Foothill, SLO.

*Attendees:*

Fred Campbell, Dave Garth, Mary Mason, Dick Watts, Bill Fageol, George Rodriguez, Mike Lindsay, Richard Dickey, Gene Nelson, Greg Lugo, Max Sicher, Bill Bailey, V. Havandjian, & Tom Tengdin.

_*Secretary's*__*Report*_

Draft minutes from 6/13/17 were distributed:

Corrections to last month's minutes:

New Bus. #5: Red Cross. shorten to say meeting was held and worked on coordination and cooperation issues. delete that a need working group needed.

Old Bus. #2: Change “bas” to “bad”.

Change “OES” to “EO”.

New Bus. #5: Change radio to radios.

*Treasurer's Report*--Richard

No activity and no change at $8,317. Tom said that he and Richard need to figure out what is needed before the officers go to the bank to sign new signature cards.

*Old Business*

1.

Noise canceling headphones--Tom--No progress.

2.

SLOECC do SWR check of antennas at all the ECCs. Mike has not yet investigated bad VSWR on antenna 3 at ECC-11.

3.

New ECC PCs--Tom--recommends a particular all-in-one PC. He will (re)send email to board on details.

4.

EOC HF antenna--Mike--The antenna is now up and tested for 40, 80, and 160 m thanks to John, Mike, and Neal. It slopes south to the fence line over grass and brush.

5.

SLOECC radio equipment inventory and bar codes--Tom--will send out the request to all POCs of ECCs to inventory all their equipment.

6.

ECC-3 (Atascadero) ham shack. No update.

7.

Cactus Intertie System--Dave--No news to report. It will come to SLO county because both parties are interested.

8.

SLOECC packet system: Discussion whether packet system should be fixed, changed, or a backup system created.

9.

Erection of ECC-12 (Cambria) HF antenna.--Tom--There is no emergency coordinator currently at Cambria because of the passing of Ron M. We will wait on this till we get a new one.

10.

Tom to make 3 to 6 headset adapters for the new Alinco radios. No progress.

11.

ECC-6 (P.R.) HF antenna--Dave--Dave says he will poke the mayor of Paso Robles.

12.

County Exercise--George--The county exercises which had been scheduled for 20 and 25 October may be postponed, and possibly moved to a new venue.

13.

Clearing the Brush around Clark Repeater--Greg--The brush work was done but not completely around the repeater and not to the full 30 feet. V says that the forest service now wants clearance of 400 feet of brush.

14.

Donated PGE Radios--Of the radios we recently received from PG&E with many heads not present--Ron has a source for used heads.

*New Business *

1.

Red Cross--Gene--checked the Red Cross ham equipment. The packet is not working. VHF and the UHF radios are OK. The ERV vehicle was not checked. FYI: Now the chapter is larger and now called Central Coast. The Red Cross vehicles use 150 W radios at 47.42 MHz primary and 47.50 secondary.

2.

Dick. Training for this month (August) is Nuclear 101. Dick says ICS forms training will come later. Tom is to send the 2015 Santa Maria ICS training records to Dick for archiving. Dick requests all relevant ham and ICS training certificates be sent to him for archiving.

3.

Bill Bailey. Tested 10 qty. GM 300 spare radios. Five tested good and five tested bad. The bad ones need to be sent to V for disposition.

4.

Regarding 147.000 repeater on broadcast peak during recent fire. We don't think it was burned/destroyed but that power was lost.

The meeting was closed at 09:40

Just as a heads up to the SLOECC group as I've run across this "ham" a couple of times on Tassajara and have heard him on View Hill. He is calling himself Elmer, but doesn't know any ham related terms and has a 1960s callsign and doesn't sound a day over thirty. Thus, a little digging was in order.

WB6JKL expired in 1998. See the following:
http://wireless2.fcc.gov/UlsApp/UlsSearch/license.jsp?licKey=895062

See post three for the indication that the actual WB6JKL would be 96 this year. The fellow we have is most likely this grandson:
http://newbeetle.org/forums/photos-new-beetles/9004-ham-radio-2002-vw-beetle-k4sfd.html

So FYI, communicating with him is in violation of 97.111(a)(1):
"a) An amateur station may transmit the following types of two-way communications:

(1) Transmissions necessary to exchange messages with other stations in the amateur service,"

See:
https://transition.fcc.gov/eb/AmateurActions/files/Churo14_05_31_5502.oth.html

Good night,

From: w6hd@...
Topic: 1187 Message: 1187

I am looking for 4 volunteer ham radio operators for the Paso Robles Half Marathon on Sunday, November 12th. This fun event is held in Paso Robles as shown on the map in the attached link.

This is a great opportunity for those who have not participated in such an event to gain experience as it is similar to a larger event- only on a smaller scale. We can all learn together. Of course, we welcome experienced operators as well.

The time commitment requires showing up at your assigned location at 6 AM, and we should be all done by about noon. There will be water and a portable toilet at each location that we will serve.

Thanks to Ron K6JTA, Jim KK6SMU, and Rick KK6PTW for stepping up to help with this. We need 3 or 4 additional operators.

Please send me your name, email address, and telephone number if you can make a commitment for this worthwhile activity. I also need to know if you have a radio that will operate on the UHF (70cm, "440") amateur band. If not, we may have a loaner radio, or will use 2 meters.

Feel free to email or call me if you have any questions. I will be sending out more information for the volunteers as it becomes available.

Thanks for your consideration.

73, John W6HD

new - a Mobile App for disaster-recovery help!
Newton, MA -- Just in time for disaster season, The Systems Audit Group, Inc. announces the release of its mobile App, the Disaster Recovery Pocket SourceT disaster recovery help directory.

It is a unique compilation of specialty vendors in thousands of locations throughout North America, divided into hundreds of categories of hard-to-find disaster-recovery help - ranging from "document-drying" to "trauma-counselors," "ransomware mitigation," "secure data-destruction," "planning for pets," "mobile kitchens," "crime-scene cleanup," "data-recovery," etc, etc. Clicking on a provider takes you their website, with the option of returning to the app.

It also includes tutorial sections on "getting started" in disaster planning, and "have you forgotten," covering many commonly-overlooked areas.

The Disaster Recovery Pocket SourceT is an essential reference for facility managers, computer operations managers, emergency personnel, risk managers, security managers, librarians, record managers, systems executives, and business recovery coordinators,as well as claims adjusters, insurance agents, and any others responsible for putting organizations "back to normal" after a crisis.

The Disaster Recovery Pocket SourceT is also available in a stand-alone version, delivered on a USB flash drive (aka "thumb drive" or "stick drive") and will work on PC's, MAC's or other devices with web browsers and USB ports.

The App is priced at $19.99 and can be downloaded from all App stores (eg, iPhone/Apple, Android/GooglePlay, Kindle, Windows/Microsoft) by searching for "disaster recovery directory" on the App store product locator.

The stand-alone version is available via Amazon (click here, or go to www.Risk-Help.com) or by searching for "disaster recovery directory" on Amazon's product locator, and is priced at $79.95 per copy plus $4.99 for shipping and handling.

The Disaster Recovery Pocket SourceT is based on over 25 years' experience in disaster recovery and business continuity by The Systems Audit Group, Inc., working with hundreds of practitioners in organizations ranging from banks and insurance companies to manufacturers, software developers, retailers, colleges, local governments, and many others.

To learn more about and/or buy the Disaster Recovery Pocket SourceT Click here or go to www.Risk-Help.com

Click here to learn about and/or buy the Disaster-Recovery Pocket SourceT disaster recovery directory Click here or go to www.Risk-Help.com
(available as a mobile App or stand-alone for PC/Mac)

1190. Fwd: [CPARC] CPARC Fall Ham Cram

Yahoo group: sloecc
Date: 2017-10-16 15:07:10 UTC
From: Marcel S
Topic: 1190 Message: 1190

---------- Forwarded message ----------
From: "Jack Gallegos" <jeakish98@...>
Date: Oct 16, 2017 1:54 AM
Subject: [CPARC] CPARC Fall Ham Cram
To: "Cal Poly Amateur Radio Club, Local" <calpolyradioclub@...>
Cc:

CPARC will be having our Annual Fall Ham Cram *Saturday, October 21st* in Building 33, Room 286 on the Cal Poly Campus!

Do you want to get your Amateur Radio license in a day but don't know where to begin? Let us teach you!

The Ham Cram will start around 8:30 AM, and the testing session will begin around 3 PM.

We will be offering the *Technician exam only*. The cost is $15 for the exam and cram, and $10 for just the exam. The cram cost includes snacks and drinks to your heart's content, as well as top-notch instruction and test prep from CPARC members, officers, and alumni.

Regardless of whether you sign up for the cram & exam or just the exam, please *sign up for an FCC Registration Number (FRN)* here:
https://apps.fcc.gov/coresWeb/publicHome.do

Doing this helps us minimize the use of your Social Security Number when processing your exam and makes things easier for us in general.

Here's the signup link for the cram/exam:
https://docs.google.com/forms/d/e/1FAIpQLSfostNdAJQlKHSk6S9l_Pe5n5XCM9LU-HOgF8og5HjoaPJQTQ/viewform

The signup link will close this Thursday evening, so don't wait to sign up!

If you have *any* questions,comments,or concerns, please don't hesitate to email calpolyradioclub@.... We're always happy to help.

Sincerely,

Jack Gallegos KK6YWG
VP, Cal Poly Amateur Radio Club
jgalle05@...

Hi,
My husband lost his hearing aid outside, in the leaves under a tree he was cutting, I think. It's small but has a battery in it.
If you have a metal detector that might be able to detect that, and your willing, it would be greatly appreciated! We're located on the east side of Templeton, Paso about 8 minutes out.

1197. Food for Thought / Website Updates

Yahoo group: sloecc
Date: 2017-11-27 18:34:42 UTC
From: John Henry
Topic: 1197 Message: 1197

Good morning,

The SLOECC websites really need an information update.

SLOECC:
http://www.sloradio.net/sloecc3.html

The original 4-site MW linked system is still showing. This should be updated to reflect recent changes and the abandoning of those frequencies no longer used.

444.200 WB6FMC should have a note that it is usually disabled. This repeater shouldn't be counted on in any function as Charlie has chosen to turn it off.

146.670 Cal Poly--the split PL tone needs to be more obvious. It should use IN and OUT next to the appropriate tone. (also, consider marking a * next to repeaters that don't transmit PL so that radios aren't programmed incorrectly and miss traffic).

146.800 - should be W6SLO callsign per all other information

Printable list:
http://www.sloecc.org/frequencies/rptr-master.pdf

Needs an update with same changes.

Estero Club Site:
http://www.sloradio.net/repeaters/index.html

Same traffic regarding the old MW system and the new simulcast system.

Cal Poly doesn't have correct tone (if you're only going to display one, make it the input tone--the important one--not the output tone).

146.940 should be corrected to Lopez Hill (there is a difference!)

444.200 (a note that this machine isn't reliable or remove from list).

At the bottom of the page, W6YDZ strikes again--don't know how this made it so far and for so long.... 146.940 is a W6SLO machine not W6YDZ.

As another note, all of the ECC simplex frequencies (except for 146.520 and 146.550) are not in the NARCC bandplan. While not mandatory, is it not in good practice to follow the area's band plan? Or do we only recognize their authority on repeater coordination and ignore the rest?

146.400, 146.430, 146.460, 146.490, 146.580, 147.410, 147.440, 147.470, 147.500, 147.530, 147.560 are all splinters and will interfere with the

band plan frequencies

See: http://www.narcc.org/Rptr_Lists/2Mchart-20080107.pdf

John.

Thanks for the corrections. Not aware 444.2 is off again.

I will incorporate your suggestions. Our web guy will soon get my changes and he will update both sites.

BTW, SLOECC just voted to change all of the simplex ECC secondary frequencies to 146.52. This eliminates the majority of them.

444.200 has been on only a handful of days in the last few years. It was on barely a week after the last time I got in touch with Charlie.

1200. Proposal for SLOECC simplex frequencies

Yahoo group: sloecc
Date: 2017-12-05 05:52:46 UTC
From: Michael Lindsay
Topic: 1200 Message: 1200
Attachments: 1 described; binary payloads are missing from this source WARC

At the last SLOECC meeting, we voted to make all ECC's secondary frequency 146.52 (no PL). Before that change, we were using 13 simplex frequencies. After that change, we were using 10 simplex frequencies. The reason that there are more that you might expect is because most ECCs have a primary AND a secondary simplex frequency, even though most also have a primary repeater frequency.

The SLOECC President, Tom, asked me to investigate reducing the simplex list even further to a number like a half dozen. These can be assigned, in some cases permanently (such as ECCs which don't depend on a repeater), and also as-needed by an incident commander.

As you probably know, simplex signals in SLO county valleys do not propagate very far.

*The proposal *: 7 simplex frequencies (No PL) and their shorthand names:

Tac	
0	146.52
1	146.55
2	147.42
3	147.45
4	147.48
5	147.54
6	147.57

Note that Tac0 is the national call-in frequency and also the secondary frequency for all ECCs.

John Henry W6JBH noted that narcc.org (N. Cal. repeater council) band plan limits the number of simplex frequencies more than the ARRL does (see below). The proposed list is consistent with narcc.org.

Mike Lindsay AD7RZ

SLOECC Secretary

As I mentioned in an earlier email, I operate an IRLP/Echolink node on 147.45 at Mt Lowe. Simplex nodes are a common use of two meter simplex channels although they are typically not at a high level site. A footnote might be appropriate in regards to 147.45 indicating my operation.

DRPS_APP_Announcement New Mobile Phone App helps Disaster-Recovery!

Newton, MA -- Just in time to help cope with "disaster season," The Systems Audit Group, Inc. announces the release of its Mobile Phone App, the Disaster Recovery Pocket Source™ disaster recovery help directory. (more details, click here, or go to www.Risk-Help.com)

It is a unique compilation of specialty vendors in thousands of locations throughout North America, divided into hundreds of categories of hard-to-find disaster-recovery help - ranging from “document-drying” to “trauma-counselors,” “ransomware mitigation,” “secure data-destruction,” “planning for pets,” “mobile kitchens,” "crime-scene cleanup," “data-recovery,” etc, etc. Clicking on a provider takes you their website, with the option of returning to the app.

It also includes tutorial sections on “getting started” in disaster planning, and “have you forgotten,” covering many commonly-overlooked areas.

The Disaster Recovery Pocket Source™ is an essential reference for public-safety workers, facility managers, computer operations managers, emergency personnel, risk managers, security managers, librarians, record managers, systems executives, and business recovery coordinators, as well as claims adjusters, insurance agents, and any others who help or are responsible for putting organizations "back to normal" after a crisis.

The Disaster Recovery Pocket Source™ is also available in a stand-alone version, delivered on a USB flash drive (aka “thumb drive” or “stick drive”) and will work on PC’s, MAC’s or other devices with web browsers and USB ports.

The Mobile App is priced at $19.99 and can be downloaded from all App stores (click on: iPhone/Apple, or Android/Google, or Windows/Microsoft, or Kindle) or by searching for “disaster recovery directory” on your App store product locator.

The stand-alone version is available via Amazon (click here) or by searching for “disaster recovery directory” on Amazon’s product locator, and is priced at $79.95 per copy plus $4.99 for shipping and handling.

The Disaster Recovery Pocket Source™ is based on over 25 years’ experience in disaster recovery and business continuity by The Systems Audit Group, Inc., working with hundreds of practitioners in organizations ranging from banks and insurance companies to manufacturers, software developers, retailers, colleges, local governments, and many others.

To learn more about and/or buy the Disaster Recovery Pocket Source™ Click here

(or go to www.Risk-Help.com)

Ron, does 444.525 still support echolink and IRLP? I heard the I'd the other day and it indicated 525 was stifling an IRLP/echolink node.

Does w6fm still have a paypal account?

Hi Pat,

Due to various issues, the IRLP/Echolink node was moved to 147.45 two
years ago. I hope to move it back to 444.525 eventually.

Yes, the Paypal link on the w6fm website is still active.

73,

Ron W6FM

1217. Silent Key - Lewis M Goldsmith KG6WSH

Yahoo group: sloecc
Date: 2018-01-29 06:25:10 UTC
From: Marcel S
Topic: 1217 Message: 1217
Attachments: 2 described; binary payloads are missing from this source WARC

It is with sadness that I share the passing of Lewis M Goldsmith KG6WSH on Sunday, Jan 21, 2018. At his request, no services will be held. He will be interned with his wife in Bakersfield, there are no surviving family.
http://chapeloftheroses.tributes.com/dignitymemorial/obituary/Lewis-Melvin-Goldsmith-105755961

"Goldsmith" (as he was known locally) could almost always be found monitoring the W6FM repeaters Mt Williams/Mt Lowe (146.73/147.36) and would grace listeners with the frequent and familiar confirmation: "Affirmative!"

In his own words from his QRZ page (www.qrz.com/db/kg6wsh):

> *Was first licensed as a novice ham in 1958. My inability to reach 13wpm
> code led to my letting my license lapse. Was out of radio until the 11
> Meter craze came about, and I soon became a licensed CB operator, and have
> continued to work 11 meters ever since,*
>
> * In the summer of 2004 I discovered that 5wpm code was all that was
> required. In October of 2004 I took the Tech Plus test and have been back
> on the air ever since.*
>
> * Currently spend most of my time on either 2 Meters or 10 Meters. Most of
> my air time is QRP, but I do run 100 Watts on 10 Meter SSB. Hope to hear
> you on 10.*
>
[image: Inline image 1]

Clark Turner, WA3JPG, also shared the photo below stating: "Just for fun, here is a key, manufactured by American Morse in SLO, designed by Goldsmith. He gave me one and its a very fine key. I will really miss this guy."

[image: Inline image 2]

Goldsmith will be dearly missed on the repeaters. Now there is another ham on the air chasing the real DX many light-years away.

On behalf of the Cal Poly Amateur Radio Club and the San Luis Obispo County ham radio community, we're saying 73s friend, may you rest in peace.

Regards,

-Marcel AI6MS

Footnote: "Silent Key", refers to a ham radio operator that has passed away, with his morse code paddle now going silent.

To: "Cal Poly Amateur Radio Club, Local" <calpolyradioclub@...>

Hello CPARC!

Back by popular demand..... We're hosting a ham radio license testing session! All levels of license tests will be offered.

It will be in Building 192 (Engineering IV), Room 321 on Sunday, March 4th at 1:00 PM. The doors will be locked due to it being the weekend but CPARC members will be there to open them for you. This event is free and open to the public, however, we kindly ask that you register in advance through our form:

https://docs.google.com/forms/d/e/1FAIpQLSex1TI1Qmh5q18YWL1hsWEo0ve9VoMhFM5pzWhtBm8dZ12K7Q/viewform

Parking is generally free on weekends (consult the Cal Poly parking website <https://afd.calpoly.edu/parking/parkingoncampus/> for details). If you have any questions, please don't hesitate to contact us at calpolyradioclub@... or by calling 805-756-2737 <(805)%20756-2737>.

1235. NEWS - Disaster App released

Yahoo group: sloecc
Date: 2018-03-20 13:25:12 UTC
From: <StevenL@...>
Topic: 1235 Message: 1235
Attachments: 2 described; binary payloads are missing from this source WARC

EDITORS-PressRel DRPSapp
Disaster Recovery Pocket SourceT Released to Help Keep Up and Running in Event of Disaster

Available as a mobile phone App or stand-alone for PC/Mac

. . . includes active links to vendor websites. . .

Just in time to help cope with "disaster season," The Systems Audit Group, Inc. announces the release of its mobile App, the Disaster Recovery Pocket SourceT (www.Risk-Help.com/Sample.html)

This is a unique compilation of specialty vendors in thousands of locations throughout North America, divided into hundreds of selected categories of hard-to-find disaster-recovery help - ranging from "document-drying" to "trauma-counselors," "ransomware mitigation," "secure data-destruction," "planning for pets," "mobile kitchens," "crime-scene cleanup," "data-recovery," etc, etc.

It also includes tutorial sections on "getting started" in disaster planning, and "have you forgotten," covering many commonly-overlooked areas.

To see a sample of the Disaster Recovery Pocket SourceT Click here or go to www.Risk-Help.com/Sample.html

The Disaster Recovery Pocket SourceT is an essential reference for facility managers, computer operations managers, emergency personnel, risk managers, security managers, librarians, record managers, systems executives, public-safety personnel, and business recovery coordinators, as well as claims adjusters, insurance agents, and any others responsible for helping to put organizations "back to normal" after a crisis.

The Mobile App is priced at $19.99 and can be downloaded from all App stores:

(based on your device, click on:

iPhone/Apple, or Android/Google, or Windows/Microsoft, or Kindle),

or by searching for "disaster recovery directory" on your App store product locator.

The Disaster Recovery Pocket SourceT is also available in a stand-alone version, delivered on a USB flash drive (aka "thumb drive" or "stick drive") and will work on PC's, MAC's or other devices with web browsers and a drive port.

The stand-alone version is available via Amazon (click here) or by searching "disaster recovery pocket source" on Amazon's product locator, and is priced at $79.95 per copy plus $4.99 for shipping and handling.

The Disaster Recovery Pocket SourceT is based on over 25 years' experience in disaster recovery and business continuity by The Systems Audit Group, Inc., working with hundreds of

practitioners in organizations ranging from banks and insurance companies to manufacturers, software developers, retailers, colleges, local governments, and many others.

For more information, or to see a sample of the Disaster Recovery Pocket SourceT Click here or go to www.Risk-Help.com/Sample.html

1236. Santa Barbara (SYP)/Ventura (Sulphur) Linked System

Yahoo group: sloecc
Date: 2018-03-24 02:15:01 UTC
From: John Henry
Topic: 1236 Message: 1236

Good afternoon,

I've worked in the past with an individual (Bill Talanian W1UUQ, trustee of Santa Barbara ARC K6TZ) who is interested in expanding their existing system into SLO County.

Currently they have 2-meter repeaters linked via RF (no internet to worry about failing) in Ventura and Santa Barbara counties. (145.160 PL 127.3 at Santa Ynez Peak is our closest endpoint)

See: https://www.pvarc.club/repeater-systems/

and: https://www.sbarc.org/repeaters-data-systems/

They want to establish a presence for this system in SLO County. I am simply attempting to make introductions but I will support the effort 100% if SLOECC is interested.

As an active HEET member, this would be greatly beneficial. While we have plenty of repeaters in SLO County, Santa Barbara county isn't as organized. When HEET responds into Santa Barbara County, we lose ability to communicate with Dispatch as soon as they pass Mount Solomon and drop into the Santa Ynez Valley.

I can provide more details if the powers that be show interest.

John Henry

1239. RE: [sloecc] draft SLOECC board mtng. minutes march

Yahoo group: sloecc
Date: 2018-04-09 18:59:14 UTC
From: Fred Campbell
Topic: 1238 Message: 1239

Mike:

Just a minor correction regarding item 19, my Nipomo repeater.

I have had 3 repeaters fail. The first was due to the classic “hair problem” in a tuning slug. (Generic failure of GE MII’s).

The last two were, indeed, power amp failures in my replacement GE MIII repeater. I will have to analyze the antenna system to assure that the load is not the problem (Yes, I have checked impedances and all seems well, but…).

No need to correct the minutes unless someone wants more detail on the failures…….

1245. Re: [sloecc] draft SLOECC board meeting minutes March 2018

Yahoo group: sloecc
Date: 2018-04-10 06:10:06 UTC
From: Gene Nelson, Ph.D.
Topic: 1238 Message: 1245

Dear John and Tom:

I clearly indicated my interest in being part of
the SHARES group when I handed Tom Tengdin a
large packet of information regarding SHARES
at the 28 February 2018 SLOECC general monthly
meeting in which I presented information about
converting a small 800 Watt gasoline-powered inverter generator to propane.

Tom informed me that he handed off the packet of
information to you, John. Thus, the information
that I included in my revision of the draft
minutes reflected those interactions.

I respectfully request that my revisions to item 11 remain.

Gene

1247. SLOECC board meeting for May Canceled

Yahoo group: sloecc
Date: 2018-05-06 04:16:26 UTC
From: John Bonnett
Topic: 1247 Message: 1247

All,

It does not appear that we will have a quorum this Tuesday as president, vice president and one director will be unable to attend.

Our next meeting will be June 11.

John

1254. Re: [sloecc] draft minutes for June SLOECC Board meeting [1 Attachment]

Yahoo group: sloecc
Date: 2018-07-01 18:27:29 UTC
From: Marcel S
Topic: 1253 Message: 1254

Slight correction to the table of ECCs. For ECC-16 the comments should indicate that for "VHF Repeater ONLY, PL 91.5 IN, 127.3 OUT". It's backwards in the notes. The UHF repeater is 127.3 IN/OUT.

Reference: https://w6bhz.org/content/repeaters

Thanks,

-Marcel AI6MS
